The Independent Farmstead Beth Dougherty, Shawn

Dougherty, 2016 Twenty years ago when authors Shawn and Beth Dougherty purchased the land they would come to name the Sow s Ear the state of Ohio designated it not suitable for agriculture Today their family raises and grows 90% of their own food Such self sufficiency is largely the result of basing their farming practices around intensive pasture management Pioneered by such luminaries as Allan Savory Greg Judy and Joel Salatin the tenets of holistic grazing employed mostly by larger scale commercial operations have been adapted by the Doughertys to fit their family s needs In The Independent Farmstead The Sow s Ear model for regenerating the land and growing food the best you ever tasted is elucidated for others to use and build upon In witty and welcoming style The Independent Farmstead covers everything from choosing a species of ruminant and incorporating it into a grass based system to innovative electric fencing and watering systems to what to do with all of the milk meat and yes manure that the self sustaining farm produces COVER Bulletin Pennsylvania. Local Places, Global Processes Peter Coates, David Moon, Paul Warde, 2016-02-29 We live in an age of unprecedented environmental change global interconnected and universal Yet though our lives are inextricably connected to global processes and increasingly mobile we still live in particular places Our perceptions of change and what kind of change might be for good or ill are shaped by the interaction of localised experience and the wider forces of transformation Local Places Global Processes examines how these relationships have been shaped in Britain over time in three ways First through essays addressing influential ways of understanding and debating questions of the state of nature These are complemented by case studies on conservation landscape change and management and how perceptions of environmental change have emerged or been discarded over time Chapters also draw on a series of site based workshops that brought together historians landscape managers and artists to discuss and reflect on particular sites Wicken Fen in Cambridgeshire owned by the National Trust and the first British nature reserve the Quantock Hills Area of Outstanding Natural Beauty in Somerset England s first AONB and a landscape enriched by Romantic association and the landscape of Kielder Water and Forest a land of superlatives in Northumberland in north eastern England the largest planted forest and artificial lake in northern Europe The multi disciplinary approach draws together the exchanges artworks and writing assembled at these workshops and afterwards This opens up how being in a place and engaging with ideas attached to it shape perceptions of the environment It provides resources with which landscape managers can think about their tasks and engage various

publics in discussion about future environments in light of these histories of place Rather than a history of these three places
