

Now I Lay me down
to sleep, I pray the Lord
my soul to keep, If I
should die before I wake,
I Pray to my Lord
my soul to take.

Language Interrupted John McWhorter,2007-06-18 Foreigners often say that English language is easy A language like Spanish is challenging in its variety of verb endings the verb speak is conjugated hablo hablas hablamos and gender for nouns whereas English is more straight forward I speak you speak we speak But linguists generally swat down claims that certain languages are easier than others since it is assumed all languages are complex to the same degree For example they will point to English s use of the word do Do you know French This usage is counter intuitive and difficult for non native speakers Linguist John McWhorter agrees that all languages are complex but questions whether or not they are all equally complex The topic of complexity has become a hot issue in recent years particularly in creole studies historical linguistics and language contact As McWhorter describes when languages came into contact over the years when French speakers ruled the English for a few centuries or the vikings invaded England a large number of speakers are forced to learn a new language quickly and this came up with a simplified version a pidgin When this ultimately turns into a real language a creole the result is still simpler and less complex than a non interrupted language that has been around for a long time McWhorter makes the case that this kind of simplification happens in degrees and criticizes linguists who are reluctant to say that for example English is simply simpler than Spanish for socio historical reasons He analyzes how various languages that seem simple but are not creoles actually are simpler than they would be if they had not been broken down by large numbers of adult learners In addition to English he looks at Mandarin Chinese Persian Malay and some Arabic varieties His work will interest not just experts in creole studies and historical linguistics but the wider community interested in language complexity

Religion for the 21st Century Stephen Gislason,2018-05-30 This book provides a fresh perspective on world religions I describe some of the more obvious religious traditions on the planet and note similarities and differences I am writing brief descriptions as if I were a tour guide introducing a stranger to the history real and imagined of five of the more obvious religions My wish is that even people who live in the cognitive box created by one group will take a vacation fly outside of

your container and enjoy an overview of humans past present and future If you can go beyond beliefs faith claims arguments and the narcissism that afflicts all of us then you ask does membership in any religious group bring us closer to living in a peaceful constructive sustainable society From the Preface Any discussion of religion invites misunderstanding and conflict Humans have convened in small groups for thousands of years to celebrate to appease evil spirits and to encourage good spirits to offer more privileges and benefits Humans continue to dress up in costumes beat drums chant sing and dance and make offerings to innumerable gods These celebrations help to maintain group unity and often induce euphoric feelings in the participants While there has always been an archetypal form to these group activities each local group develops its own version of myths rituals and celebrations The belief in spirits is the universal form The names number and idiosyncratic expressions of the spirits is the local content If you consider religious expressions around the world and throughout history you would notice that there a number of basic themes with thousands of imaginative variations You also notice that in every tribe village or city people believe they have special relationships with gods and spirits not enjoyed elsewhere No discussion of religion will make sense until the importance of group identity is understood Humans may sometimes look like individuals but the truth is that all humans are members of local groups that determine what they know how they communicate and how they treat other humans Each local group develops stories beliefs and rules Collections of local groups with special beliefs into larger organizations are often described as religion Members of local groups are described as religious if they recite group slogans attend meetings and celebrations Religions often claim special privileges for their members so that the term religious is used to claim advantages and superior moral authority where none actually exists The tendency for selective even exclusive group membership is deeply embedded in the human mind and shows up everywhere and at all times The key elements of group identity are recognizable appearance enhanced by costumes common language common beliefs and common behaviors especially ritualistic behaviors Download eBook in PDF format **Railway Conductors' Monthly** ,1885

Defining Creole John H. McWhorter,2005-02-03 A conventional wisdom among creolists is that creole is a sociohistorical term only that creole languages share a particular history entailing adults rapidly acquiring a language usually under conditions of subordination but that structurally they are indistinguishable from other languages The articles by John H McWhorter collected in this volume demonstrate that this is in fact untrue Creole languages while complex and nuanced as all human languages are are delineable from older languages as the result of their having come into existence only a few centuries ago Then adults learn a language under untutored conditions they abbreviate its structure focusing upon features vital to communication and shaving away most of the features useless to communication that bedevil those acquiring the language non natively When they utilize their rendition of the language consistently enough to create a brand new one this new creation naturally evinces evidence of its youth specifically a much lower degree of the random accretions typical in older languages which only develop over vast periods of time The articles constitute a case for this thesis based on both

broad cross creole ranges of data and focused expositions referring to single creole languages The book presents a general case for a theory of language contact and creolization in which not only transfer from source languages but also structural reduction plays a central role based on facts whose marginality of address in creole studies has arisen from issues sociopolitical as well as scientific For several decades the very definition of the term creole has been elusive even among creole specialists This book attempts to forge a path beyond the inter and intra disciplinary misunderstandings and stalemates that have resulted from this and to demonstrate the place that creoles might occupy in other linguistic subfields including typology language contact and syntactic theory *The Price Guide to Limited Edition Collectibles 2001* Mary L.
