Nuclear security federal and state action needed to improve security of sealed radioactive sources ,     **No End in Sight** Nathan E. Busch,2014-10-17 The global threat of nuclear weapons is one of today s key policy issues Using a wide variety of sources including recently declassified information Nathan E Busch offers detailed examinations of the nuclear programs in the United States Russia China Iraq India and Pakistan as well as the emerging programs in Iran and North Korea He also assesses the current debates in international relations over the risks associated with the proliferation of nuclear weapons in the post Cold War world Busch explores how our understanding of nuclear proliferation centers on theoretical disagreements about how best to explain and predict the behavior of states His study bridges the gap between theory and empirical evidence by determining whether countries with nuclear weapons have adequate controls over their nuclear arsenals and fissile material stockpiles such as highly enriched uranium and plutonium Analyzing the strengths and weaknesses of various systems of nuclear weapons regulation Busch projects what types of controls proliferating states are likely to employ and assesses the threat posed by the possible theft of fissile materials by aspiring nuclear states or by terrorists No End in Sight provides the most comprehensive and up to date analysis of issues at the forefront of contemporary international affairs With the resurgence of the threat of nuclear terrorism Busch s insights and conclusions will prove critical to understanding the implications of nuclear proliferation     *Who Needs Nuclear Power* Chris Anastasi,2020-10-13 Who Needs Nuclear Power challenges conventional thinking about the role of civil nuclear power in a rapidly changing energy context where new energy carriers are penetrating markets around the world Against the backdrop of a global energy transition and the defining issue of Climate Change Chris Anastasi assesses new nuclear build in a fast moving sector in which new technologies and practices are rapidly emerging He considers various countries at different stages of nuclear industry development and discusses their political legal and technical institutions that provide the framework for both existing nuclear facilities and new build as well as a country s technical capability He also highlights the critical issue of nuclear safety culture exploring how organisations go about instilling it and maintaining it in their operations and encouraging it in their supply chains the critical role played by independent regulators and international institutions in ensuring the integrity of the

industry is also highlighted This book provides a balanced and holistic view of nuclear power for both an expert and non expert audience and a realistic assessment of the potential for this technology over the critical period to 2050 and beyond

**South Asia's Nuclear Security Dilemma** Lowell Dittmer,2015-04-08 The nuclear test explosions in India and Pakistan in 1998 followed by the outbreak of hostilities over Kashmir in 1999 marked a frightening new turn in the ancient bitter enmity between the two nations Although the tension was eclipsed by the events of 9 11 and the subsequent American attacks on Afghanistan and Iraq it has not disappeared as evidenced by the 2001 attack in the Indian Parliament by Islamic fundamentalists out of Kashmir By 2002 these two nuclear armed neighbors seemed to be once again on the brink of war This book outlines the strategic structure of the rivalry and the dynamic forces driving it and investigates various possible solutions The expert contributors focus on the India Pakistan rivalry but also consider the China factor in South Asia s nuclear security dilemma Although essentially political strategic in its approach the book includes coverage of opposing military arsenals and the impact of local terrorism on the delicate balance of power Nuclear Security United States. General Accounting Office,2003 Weak and Failing States Liana Sun Wyler,2010-10 Although long a component of U S foreign policy strengthening weak and failing states has increasingly emerged as a high priority U S national security goal since the end of the Cold War The threats from these states include providing safe havens for terrorists organized crime and other illicit groups causing conflict regional instability and humanitarian emergencies and undermining efforts to promote democracy good governance and economic sustainability This report 1 Provides definitions of weak states and describes the links between weak states U S national security and development challenges 2 Surveys recent key U S programs and initiatives designed to address threats emanating from weak states Illustrations **Legislation to Improve Safety and Security in the Department of Energy** United States. Congress. House. Committee on Commerce. Subcommittee on Energy and Power,2000 Calculated Risks Kenneth A. Rogers,Marvin G. Kingsley,2016-04-15 This well documented study examines one of the increasingly pressing problems for US homeland security the storage and management of radioactive waste Despite pressing homeland security and energy security concerns associated with highly radioactive waste political considerations have prevented policy makers from adopting adequate long term solutions to the problem This book explores nuclear waste problems through the broader lens of federal state and local government and the resultant constraints on policy that emerge within the American political system Presenting specific case studies to highlight the deficiencies in current policy and planning as well as the possibility of terrorist activity it is highly suited to courses on security studies and environmental politics *Security at the Department of Energy* United States. Congress. House. Committee on Science,2000 **Indexes for Abstracts of Reports and Testimony** ,1994 **Comptroller General's Annual Report** United States. General Accounting Office,1991 **International Security Studies** Peter Hough,Andrew Moran,Bruce Pilbeam,Wendy Stokes,2015-02-20 This new textbook provides students with a comprehensive and accessible introduction to

the subject of security studies with a strong emphasis on the use of case studies In addition to presenting the major theoretical perspectives the book examines a range of important and controversial topics in modern debates covering both traditional military and non military security issues such as proliferation humanitarian intervention food security and environmental security Unlike most standard textbooks the volume also offers a wide range of case studies including chapters on the USA China the Middle East Russia Africa the Arctic the Middle East Europe and Latin America providing detailed analyses of important global security issues The 34 chapters contain pedagogical features such as textboxes summary points and recommended further reading and are divided into five thematic sections Conceptual and Theoretical Military Security Non Military Security Institutions and Security Case Studies This textbook will be essential reading for all students of security studies and highly recommended for students of critical security studies human security peace and conflict studies foreign policy and International Relations in general

**National Security Strategy of the United States (2010)**, 2010-10 Contents 1 Overview 2 Strategic Approach The Strategic Environment The World as It Is The Strategic Approach Pursuing Comprehensive Engagement Promoting a Just and Sustainable International Order Strengthening Nat Capacity 3 Advancing Our Interests Strengthen Security and Resilience at Home Disrupt Dismantle and Defeat Al Qa ida and Its Violent Extremist Affiliates in Afghanistan Pakistan and Around the World Reverse the Spread of Nuclear and Biological Weapons and Secure Nuclear Materials Secure Cyberspace Achieve Balanced and Sustainable Growth Accelerate Sustainable Development Values Promote Democracy and Human Rights Abroad International Order 4 Conclusion

**Energy Security in Asia and Eurasia** Mike M. Mochizuki, Deepa M. Ollapally, 2016-12-01 Many states appear to have strong sentiment on energy security and energy transit vulnerability Some analysts see the rapidly increasing demand for energy and competition for energy resources leading to nationalistic energy policies Others argue that global trends with efficient energy markets and growing options on renewables suggest more relaxed energy outlooks This book focuses on Asia where global demand for energy is now concentrated in the aspiring and rising powers of the region China India Japan and South Korea and also recognises the importance of Russia as a growing energy supplier Contributions by experts in the field provide detailed and parallel case studies Shedding light on the ongoing debate in the literature regarding energy outlooks of major Asian states they analyse whether energy policies are expected to evolve along market oriented cooperative lines or more competitive and even destructive mercantile nationalist lines The book argues that states are not unitary actors even in the key energy security arena and there are competing and contrasting viewpoints in Asian states on energy security It suggests that domestic debates structure thinking on energy security making energy policy more contingent than assumed by purely market or geopolitical logics Providing a strong contribution to comparative energy security studies the book fills an important gap in the literature on energy and national security and offers a basis for conducting further inter state interactive analysis It will be of interest to researchers on Asian Studies energy politics and international relations
