Nuclear Weapons in a Changing Europe Vilho Harle, Pekka Sivonen, 1991      Nuclear Weapons in the Changing World Patrick J. Garrity, Steven A. Maaranen, 2012-12-06 Lawrence Freedman One of the major bonuses of the collapse of communism in Europe is that it may never again be necessary to enter into a sterile debate about whether it is better to be red or dead This appeared as the ultimate question in the great nuclear debate of the early 1980s When put so starkly the answer appeared obvious better to live and struggle in a totalitarian system than to destroy totalitarian and democratic systems alike There were a number of points to be made against this Communist regimes had demonstrated the possibility of being both red and dead while the West had managed successfully to avoid the choice If we allowed nuclear disarmament to become an overriding priority this might encourage excessive respect for Soviet interests and a desire to avoid any sort of provocation to Moscow a point not lost on those in Eastern Europe who were then struggling against repression and could not see why disarmament should be given a higher priority than freedom Now that the old communist states have liberated themselves and the West no longer risks conspiring in their enslavement there is a correspondingly reduced danger of mass death As a result and with so much else of immediate Lawrence Freedman Department of War Studies King's College University of London London WC2R 2LS England Nuclear Weapons in the Changing World Perspectives from Europe Asia and North America

The New Germany and the New Europe Paul B. Stares, 2010-12-01 Since the first heroic and largely spontaneous acts precipitated the end of the Cold War Europe has been transformed in a truly remarkable and wholly unforeseen manner Germany has been unified the Warsaw Pact has collapsed and the Soviet Union has disintegrated leaving in its wake many new independent states These momentous events have taken place so rapidly and often in such confused circumstances that their full meaning

has barely been comprehended let alone assimilated A clearer and deeper appreciation of the forces and processes unleashed by the recent changes is vitally important however to meet the challenges and exploit the opportunities that now present themselves in Europe This volume therefore is intended to promote wider understanding of the key issues and it represents the most comprehensive assessment to date of the new Germany and the new Europe The volume begins with detailed accounts by U S and German scholars of how unification came about and the resulting changes to the political economy security policy and foreign relations A complementary section discusses the implications for the rest of Europe as well as Japan While the focus of the book is on the new Germany two separate chapters provide specific designs for a new adoption of a general system of cooperative security      *Democracy and Deterrence* Philip Bobbitt,1988-01-01      Soviet Military Power In A Changing World Susan L Clark,2019-06-04 Many people have been instrumental in helping see this book through to completion First I want to thank Robbin Laird not only for his professional encouragement over the years but especially for his suggestion to do this book in the first place Nor would this effort have been possible or nearly as enjoyable without the support and friendship of Susan McEachern I would also like to thank Jackie Evans for her assistance in helping to prepare the manuscript      **Beyond Deterrence** Hugh Miall,Oliver Ramsbotham,2016-07-27 The collapse of communism in Eastern Europe the unification of Germany the withdrawal of Soviet troops the possible disintegration of the Soviet Union disengagement of the United States and creation of a federal Europe all this has changed the security context in Europe and stimulated a Europe wide debate about the future Deep questions about the nature of security itself have been raised This book will add fuel to the debate      **The START Treaty in a Changed World** United States.
