Nuclear Deterrence In A Regional Context:

Nuclear Deterrence in a Regional Context Dean Wilkening, Kenneth Watman, 1995 Addresses the question how can regional opponents best be dissuaded from using nuclear weapons against the United States its troops overseas or its allies Also explores the implications of a failure to develop an adequate U S deterrent strategy Nuclear Deterrence in a Regional Context ,1994 This report examines the broad outlines of U S strategies of deterring nuclear use by regional adversaries and when deterrence may be ineffective for defeating such threats It represents an application of the concepts contained in a companion document Watman and Wilkening 1994 in which the basic ideas underlying deterrence have been reformulated to make them more applicable to regional conflicts Regional nuclear confrontations will involve brinkmanship i e a competition in risk taking in which the side that is more risk acceptant and that can credibly make sufficiently devastating threats has the upper hand Credibility in turn is determined by the balance of resolve and the balance of power between the contestants **The Dynamics of Coercion** Daniel Byman, Matthew Waxman, 2002-02-04 Successful coercion should be relatively simple for the United States Since the demise of the Soviet Union the United States is without rivals in military might political influence or economic strength Yet despite the lopsided US edge in raw power regional foes persist in defying the threats and ultimatums brought by the United States and its allies This book examines why some attempts to strong arm an adversary work while others do not It explores how coercion today differs from coercion during the Cold War It describes the constraints on the United States emanating from the need to work within coalitions and the restrictions imposed by domestic politics and it assesses the special challenges likely to arise when an adversary is a non state actor or when the use of weapons of mass destruction is possible **Deterring America** Derek D. Smith, 2006-05-25 Faced with America s military superiority many countries are turning to weapons of mass destruction WMD as a means to deter United States intervention However the events of September 11 awakened America to a degree of vulnerability it had never experienced before making it increasingly unwilling to tolerate such weapons in the hands of unstable and unpredictable regimes Through theoretical historical and prescriptive lenses this book explores the modern security dilemma created by the twin fears of American encroachment and vulnerability which form a vicious cycle of insecurity that challenges traditional notions of deterrence Using Iraq and North Korea as case studies Smith argues that the United States may need to re evaluate its foreign policy strategies against WMD proliferation giving renewed attention to defensive measures negotiated disarmament interdiction and perhaps preemption *The DTIC Review* ,1995-08 South Asia's Nuclear Security Bhumitra Chakma, 2014-12-17 South Asia is often viewed as a potential nuclear flashpoint and a probable source of nuclear terrorism But how valid are such perceptions This book seeks to address this question and assesses the region s nuclear security from two principal standpoints First it evaluates the robustness of the Indo Pakistani mutual deterrence by analysing the strength and weaknesses of the competing arguments regarding the issue It also analyses the causes and consequences

of nuclear arms race between India and Pakistan the nature of deterrence structure in the region and the challenges of confidence building and arms control between the two countries in order to assess the robustness of South Asia's nuclear deterrence Second it assesses the safety and security of the nuclear assets and nuclear infrastructure of India and Pakistan The author holds that the debate on South Asia's nuclear security is largely misplaced because the optimists tend to overemphasise the stabilising effects of nuclear weapons and the pessimists are too alarmists It is argued that while the risks of nuclear weapons are significant it is unlikely that India and Pakistan will give up their nuclear arsenals in the foreseeable future Therefore what needs to happen is that while nuclear elimination should be the long term goal in the interim years the two countries need to pursue minimum deterrence policies to reduce the likelihood of deterrence failure and the possibility of obtaining fissile materials by non state actors

Wirtz, 2018-10-12 Whether one is interested in learning about anthrax sarin the neutron bomb or any other weapon of mass destruction this thorough and detailed reference is the place to find answers The threat posed by weapons of mass destruction WMD whether nuclear radiological chemical or biological is the number one topic of concern for the intelligence community first responders policymakers and myriad non governmental organizations and many members of the general public This authoritative reference will serve all of those parties by covering the full spectrum of mass casualty weapons The guide will not only enable people to educate themselves but also to separate the truth from the spurious information that abounds The book offers an A to Z listing of major topics making finding information about concepts scientific theories and realities of WMD fast and easy While the framework of WMD goes back centuries the major focus of this reference is on weapons that date from the use of chemical warfare in World War I The book also covers WMD from the early nuclear era World War II the Cold War and the present Syria North Korea etc Each entry is written in a clear accessible style and includes crucial background information making this book an essential resource for both lay readers and specialists Armed with this portable database readers will have the confidence to deal with discuss or write about WMD of all kinds based on an understanding of relevant concepts policies and scientific fundamentals

Nuclear Proliferation Dynamics in Protracted Conflict Regions Saira Khan, 2017-11-01 This title was first published in 2003 Using extensive case studies of the nuclear weapons programmes of India Pakistan Israel Iraq Iran Egypt and Syria this important work shows that a higher than normal probability of war in protracted conflict regions prompts states to search for credible deterrents such as nuclear weapons The book rigorously examines the factors that affect the pace of this proliferation such as regional power structures and geographical proximity and challenges many prevailing theories on proliferation This compelling text convincingly argues that simple conflict relationships are not sufficient for countries to go nuclear thus providing insight into the true complexity of the issue Explaining the similarities and differences between the nuclear policies of states in protracted conflict regions the book commands the attention of anyone interested in nuclear proliferation and regional conflict

Unthinkable Kenneth

Pollack,2014-09-30 Examines Iran s current nuclear potential while charting America s future course of action recounting the prolonged clash between both nations to outline options for American policymakers **The Second Nuclear Age** Colin S.

Gray,1999 The author takes issue with the complacent belief that a happy mixture of deterrence arms control and luck will enable humanity to cope adequately with weapons of mass destruction arguing that the risks are ever more serious

Critical Reflections on Security and Change Stuart Croft,Terry Terriff,2013-02-01 The contributors reflect critically on security studies since the 1980s They conclude that analysts and policy makers have not been able to respond well to the changes that have occurred and that they must revise their approach if they are to meet the challenges of the future **U.S.**

Holcomb,2001 For more than 3 decades the U S Army War College USAWC Department of National Security and Strategy has faced the challenge of educating future strategic leaders on the subject of national security or grand strategy Fitting at the top of an officer s or government official s career long professional development program this challenge has been to design a course on strategy that incorporates its many facets in a short period of time all within the 1 year senior service college curriculum To do this a conceptual approach has provided the framework to think about strategy formulation The purpose of this volume is to present the USAWC strategy formulation model to students and practitioners This book serves as a guide to one method for the formulation analysis and study of strategy an approach which we have found to be useful in providing generations of strategists with the conceptual tools to think systematically strategically critically creatively and big Balancing what is described in the chapters as ends ways and means remains at the core of the Army War College s approach to national security and military strategy and strategy formulation RAND Research Brief: Regional Deterrence: The Nuclear Dimension ,1995 The United States in pursuing its interests over the next decade may well come into conflict with regional adversaries armed with nuclear weapons How best to deter nuclear threats by regional states is thus an important question for U S national security strategy In a recent RAND report Nuclear Deterrence in a Regional Context Dean Wilkening and Kenneth Watman outline an approach to answering this question Nuclear confrontations between the United States and nuclear armed regional adversaries will be games of brinkmanship i e a competition in risk taking where threats to cross the nuclear brink are made for strategic objectives The outcomes of such interactions will be determined by the risk taking propensities of each side and by the credibility of the opponent s threat to cross the nuclear threshold first the likely consequences of the threatened attack and the credibility and severity of U S retaliatory threats Credibility in turn depends on perceptions of each side s resolve and capability *Arms Control And International Security* Roman Kolkowicz,2019-08-27 Designed to introduce the reader to the critical issues of arms control and international security in the 1980s this collection of provocative and challenging articles encourages a rethinking of conventional wisdom on strategic policy The authors succinctly convey the tensions existing between those who would eliminate the weapons on which strategic deterrence has rested and those who

see the Soviet nuclear buildup as a challenge that must be met with increased armaments They reflect as well on the conceptual tension between eliminating nuclear weapons and answering the question of how defense can be managed in the nuclear era Their contributions are at times compelling at times frustrating but at all times informative and of critical importance Department of Defense Authorization for Appropriations for Fiscal Year 1991 United States.
