Nuclear Reactions Science And Transscience Masters Of Modern Physics:

Nuclear Reactions Alvin M. Weinberg, 1992-11-18 Blurb Contents Marvelous reading with few problems of the interaction between science technology and society left untouched One need not always agree but one cannot come away without a better education I found the parts on scientific administration and on the interaction of science and society excellent and provocative reading and the parts on energy and nuclear energy very much to the point American Journal of Physics Alvin Weinberg explores through these collected essays the ever troublesome relationship between science technology and society The title is taken from Weinberg s assertion that most of the issues arising at the intersection of science and society depend upon answers to questions that lie outside the power of science issues that are trans scientific Weinberg who during World War II helped develop the first nuclear reactors has much to say on the current role of nuclear power and the possibilities for the future Other topics include strategic defenses and arms control the role of the science administrator and the way in which time energy and resources are allocated to public problems In this remarkable record of a half century of public oriented work Weinberg lays the foundation for a philosophy of scientific administration parallel to the more established philosophy of science Confessions of a Technophile Lewis M. Branscomb, 1997-05-07 In this technologically adventurous book Lewis Branscomb distinguished physicist who once headed the National Bureau of Standards and later was IBM s Chief Scientist explores the wise and creative uses of our nation s science from the boundless faith in science after the Second World War into the age of technology which says Branscomb is an expression of the values of the society that creates and uses it Branscomb examines emerging information technologies computer software electronic libraries video disks and the information superhighway always exploring the way people are affected Here readers can share his vision of how we can use both science and politics to improve the prospects for humankind **Bulletin of the Atomic Scientists** , 1993-12 *Essays of a Soviet Scientists* Vitalii Iosifovich Gol'danskii, 1997 The essays articles and interviews that make up *Essays of a Soviet Scientist* offer a revealing portrait of Vitalii Gol danskii and his generation Here are Gol danskii s reminiscences of his extraordinary scientific mentors and colleagues his reflections on science s obligations to humanity his writings on the arts and the media his courageous and passionate arguments against nuclear weapons and his warnings about the resurgence of anti Semitism in today s Russia Through the compassionate authoritative perspective of Vitalii Gol danskii we find in the life of a man and a nation many lessons for us all The role of science and the scientist in society the oppressive influence of authoritarianism on a nation s intelligentsia scientific integrity versus political expedience the endurance of a people riding the great emotional pendulum of history *Essays of a Soviet Scientist* has much to say about these and other crucial matters **Of One Mind** John Ziman, 1997-05-08 This superb collection by the eminent physicist and critic John Ziman opens with an album of portraits of scientists Albert Einstein Freeman Dyson Lev Landau Mark Azbel Andrei Sakharov Ziman takes readers into the world of the contemporary scientist showing how discoveries are made and

how claims are tested He then travels into the minds of scientists as they are drawn into competing directions Here Ziman exposes the path of discovery which is strewn with complex human needs governmental restrictions the desire for profits and the exercise of technical virtuosity

Arms and the Physicist Herbert F. York, 1997-05-07 From the very start at the age of twenty one Herbert York was swept into the century's most daring and dangerous technical achievement the making of the atomic bomb In *Arms and the Physicist* York takes us backstage to witness key events of our time to the Manhattan Project for the birth of the atomic bomb to Lawrence Livermore where the H bomb was built to Washington to eavesdrop on how post war history was being forged and to Geneva where he tried to stem the madness Readers will meet some of our greatest heroes and villains Lawrence Oppenheimer Weisskopf Teller General Groves President Eisenhower and a cast of hundreds friends colleagues enemies who for more than half a century held the fate of the world in their hands

A Distant Light Henry W. Kendall, 2013-12-23 A collection of essays by a Nobel Prize Laureate on a wide range of critical issues facing the world and the role of scientists in solving these problems Kendall has been closely involved with the Union of Concerned Scientists a group that began as an informal association at MIT in 1969 to protest US involvement in Vietnam and is today an organization with an annual budget exceeding 6 million with 100 000 supporters worldwide UCD is today a voice of authority in US government science policy particularly with regard to environment issues most recently the worldwide initiatives on global warming Together these essays represent both the successes and failures of science to impact public policy the challenges facing scientists and offers practical guidelines for involvement in science policy The essays are roughly chronological organized by subject with introductions beginning with the controversies on nuclear power safety and Three Mile Island then followed by sections on national security issues global environmental and resource problems and radioactive cleanup and other current issues Kendall's Nobel Prize lecture as well as a more popular version thereof is also included and is the only really technical material in the book The photos in the book are Kendall's from an 1992 exhibition of his work Henry Kendall was awarded the Nobel Prize in physics jointly with J I Friedman and R E Taylor in 1990 for his research in the structure of the proton and neutron In 1969 he was one of a group of physicist who founded the Union of Concerned Scientists UCS and is currently Chairman of its Board of Directors

Nothing Is Too Wonderful to Be True Philip Morrison, 1997-05-08 Here is a provocative collection of essays by Philip Morrison widely known for his work on the Manhattan project and later for his involvement in quantum and nuclear physics and high energy astrophysics Morrison offers a stimulating look at diverse subjects ranging from cosmology particularly interstellar communication to nuclear disarmament to creative ways of teaching science He also offers his own perspective on his inspiring friendships with Niels Bohr Richard Feynman Bernard Peters and other physics giants

This Gifted Age John C. Gibbons, 1997-10-01 This welcome collection provides a glimpse of the power of a scientific training combined with a humane outlook in approaching major issues of public policy Few people have spoken more wisely to the larger issues of science and technology in our national life Frank T Rhodes President

Emeritus Cornell University *Cosmic Enigmas* Joseph I. Silk, 1997-05-08 The dominant figures of postwar astrophysical cosmology have been the late Yakov Zel'dovich of Moscow and Jim Peebles of Princeton But running a close third in influence has been Joseph Silk This collection is essential reading for the cosmological enthusiast Nature These essays represent Joseph Silk's own meandering around cosmic themes The topics span the beginning of time until its end and encompass the enigma of the evolution of large scale structure culminating in the formation of the galaxies Dr Silk has taken these writings from pieces written over the years many commissioned to highlight a new look at a new discovery in cosmology Some have been rewritten to capture a modern perspective while others remain as written to encapsulate his thoughts of a decade ago
