Politics Of Ritual Kinship Confraternities And Social Order In Early Modern Italy:

The Politics of Ritual Kinship Nicholas Terpstra, 2000 Confraternities were the most common form of organized religious life in medieval and early modern Europe They were at once the lay face of the church the spiritual heart of civic government and the social kin who claimed the allegiance of peers and the obedience of subordinates In this 1999 collection fifteen scholars examine the development of confraternities in Italy where they emerged first and had the greatest impact Individual essays explore a common set of themes across Italy from the twelfth to the eighteenth centuries the ubiquity of confraternities social construction and devotional ethos their ritual culture and civic religion their antagonistic and collaborative relations with both civic and ecclesiastical authorities and their role in social welfare and social control of marginal groups The authors demonstrate how the ritual kinship expressed in confraternities emerged in the Middle Ages and became a powerful force in civilizing early modern Italian society

Episcopal Reform and Politics in Early Modern Europe Jennifer Mara DeSilva, 2012-09-18 In the tumultuous period of the sixteenth and seventeenth centuries when ecclesiastical reform spread across Europe the traditional role of the bishop as a public exemplar of piety morality and communal administration came under attack In communities where there was tension between religious groups or between spiritual and secular governing bodies the bishop became a lightning rod for struggles over hierarchical authority and institutional autonomy These struggles were intensified by the ongoing negotiation of the episcopal role and by increased criticism of the cleric especially during periods of religious war and in areas that embraced reformed churches This volume contextualizes the diversity of episcopal experience across early modern Europe while showing the similarity of goals and challenges among various confessional social and geographical communities Until now there have been few studies that examine the spectrum of responses to contemporary challenges the high expectations and the continuing pressure bishops faced in their public role as living examples of Christian ideals Contributors include William V Hudon Jennifer Mara DeSilva Raymond A Powell Hans Cools Antonella Perin John Alexander John Christopoulos Jill Fehleison Linda Lierheimer Celeste McNamara Jean Pascal Gay

Guilds, Labour and the Urban Body Politic Bert De Munck, 2017-12-01 This book presents a new view on the relation between labour and community through a focus on craft guilds In the Southern Netherlands occupational guilds were both powerful and governed by manufacturing masters enabling the latter to imprint their mark upon urban society in an economic socio cultural and political way While the urban community was deeply indebted to a corporative spirit and guild ethic originating in medieval Germanic and Christian traditions guild based artisans succeeded in being accepted as genuine political and hence rational actors their political identity and agency being based upon their skills and trustworthiness In the long run this corporative spirit and power inexorably waned Yet this book shows that an adequate understanding of the development of European modernity i e proletarianisation and the emergence of a modern economy and modern economic and political thinking requires taking seriously the ruins upon which it is build These

histories can actually be recounted as purifications of sorts in which the economic was separated from the political the individual from the social and the transcendent from the material While the religiously inspired corporative nature of the urban body politic waned the urban artisans lost their credibility as political and rational actors

Court and Politics in Papal Rome, 1492-1700 Gianvittorio Signorotto, Maria Antonietta Visceglia, 2002-03-21 This 2002 book attempts to overcome the traditional historiographical approach to the role of the early modern papacy by focusing on the actual mechanisms of power in the papal court The period covered extends from the Renaissance to the aftermath of the peace of Westphalia in 1648 after which the papacy was reduced to a mainly spiritual role Based on research in Italian and other European archives the book concentrates on the factions at the Roman court and in the college of cardinals The sacred college came under great international pressure during the election of a new pope and consequently such figures as foreign ambassadors and foreign cardinals are examined as well as political liaisons and social contacts at court Finally the book includes an analysis of the ambiguous nature of Roman ceremonial which was both religious and secular a reflection of the power struggle both in Rome and in Europe

explanations for de Paul's prominence in the devout reform movement that emerged in the wake of the Wars of Religion the volume explores how he turned a personal vocational desire to evangelize the rural poor of France into a congregation of secular missionaries known as the Congregation of the Mission or the Lazarists with three inter-related strands of pastoral responsibility the delivery of missions the formation and training of clergy and the promotion of confraternal welfare Alison Forrestal further demonstrates that the structure ethos and works that de Paul devised for the Congregation placed it at the heart of a significant enterprise of reform that involved a broad set of associates in efforts to transform the character of devotional belief and practice within the church The central questions of the volume therefore concern de Paul's efforts to create characterize and articulate a distinctive and influential vision for missionary life and work both for himself and for the Lazarist Congregation and Forrestal argues that his prominence and achievements depended on his remarkable ability to exploit the potential for association and collaboration within the devout environment of seventeenth century France in enterprising and systematic ways This is the first study to assess de Paul's activities against the wider backdrop of religious reform and Bourbon rule and to reconstruct the combination of ideas practices resources and relationships that determined his ability to pursue his ambitions A work of forensic detail and complex narrative Vincent de Paul the Lazarist Mission and French Catholic Reform is the product of years of research in ecclesiastical and state archives It offers a wholly fresh perspective on the challenges and opportunities entailed in the promotion of religious reform and renewal in seventeenth century France

The Jewish Body Robert Jütte, 2020-11-27 An encyclopedic survey of the Jewish body as it has existed and as it has been imagined from biblical times to the present That the human body can be the object not only of biological study but also of historical consideration and cultural criticism is now widely accepted But why Robert Jütte asks should a historian bother with the Jewish body in particular And is the Jewish body as much a concept constructed over the course of centuries by Jews and non Jews alike as it is a physical reality To comprehend the notion and existence of a Jewish body he contends one needs to look both at the images and traits that have been ascribed to Jews by themselves and others and to the specific bodily practices that have played an important role in

creating the identity of a religious and cultural community. Jtte has written an encyclopedic survey of the Jewish body as it has existed and as it has been imagined from biblical times to the present often for anti Jewish purposes. He examines the techniques for caring for the body that Jews acquire in childhood from parents and authority figures and how these have changed over the course of a more than 2000 year history most of it spent in exile. From consideration of traditional body stereotypes such as the so called Jewish nose to matters of gender and sexuality sickness and health and the inevitable end of the body in death *The Jewish Body* explores the historical foundations of the human physis in all its aspects. *Children of the Promise* Lorenzo Polizzotto, 2004. Lorenzo Polizzotto examines the educational religious political and philanthropic practices of the Florentine youth confraternity of the Purification Founded in 1427 at a time of unbounded optimism in Florence's future the Purification was entrusted with the socialization of the youths. With the right education and training these youths were expected eventually to lead Florence to its manifest destiny. The Purification's educational practices were solidly grounded in religious and humanist principles. In concert with the other youth confraternities the Purification pioneered an educational programme which influenced pedagogical practices throughout Europe until the middle of the twentieth century. Its success made it an attractive prize for the contending political forces in Florence becoming first an instrument of Medici ambitions and then of Savonarola's radical millenarism. Once Florence fell under the permanent rule of the Medici the Purification sought to serve the city by turning to philanthropy which it dispensed as a moral and educational duty.

The essays in this work contend that these models and tools had an ongoing effect far into the sixteenth century on all sides of the emerging confessional divide. At the same time the controversies surrounding Observant reforms resulted in new sensibilities with regard to religious practices and religious nomenclature which would fuel many of the early sixteenth century controversies.
