Economy, Society and Politics Christian Fridrich, Udo Hagedorn, Reinhold Hedtke, Philipp Mitnik, Georg Tafner, 2024-04-05 The interconnections of economy society and politics so obviously determine socio economic and political structures and problem situations current ways of thinking and acting as well as the collective perception of solution options that their still low attention in university teaching and school education is surprising Phenomena such as pandemics climate change migration or authoritarianism make the close complex and contradictory connections between economy society and politics tangible Against this background socioeconomic research teaching and education are urgently needed The theme volume aims to contribute to this by presenting research contributions on problem complexes such as economy and democracy perspectivity and multiperspectivity situation interest and politics subject and subjectification and discipline and curriculum

Ghana Wisdom J. Tettey, Korbala P. Pupilampu, Bruce J. Berman, 2003-01-01 This volume provides a comprehensive and integrated analysis of contemporary Ghanaian politics and economy and their relationship to culture It combines rich recent empirical material with sophisticated theoretical analyses bringing fresh and unique interdisciplinary perspectives to bear on the issues examined The SAGE Handbook of Comparative Politics Todd Landman, Neil Robinson, 2009-06-16 The SAGE

Handbook of Comparative Politics presents in one volume an authoritative overview of the theoretical methodological and substantive elements of comparative political science The 28 specially commissioned chapters written by renowned comparative scholars guide the reader through the central issues and debates presenting a state of the art guide to the past present and possible futures of the field *Neoliberalism as a State Project* Asa Maron, Michael Shalev, 2017 This book explores the politics and institutional dynamics of neoliberal restructuring in Israel It puts forward a bold theoretical proposition that the very creation of a neoliberal political economy may be largely a state project Correspondingly neoliberal restructuring and the institutionalization of permanent austerity are dependent on reconfigured power relations between state actors manifested in a new institutional architecture of the state This architecture in turn is the context in which efforts to change social and employment policies play themselves out The volume frames the coming of neoliberalism in Israel as a set of concrete and far reaching changes in the power and modes of operation of the key players in the political economy organized labor big business and the state These changes undermined and neutralized veto players and enabled the ascendance of macroeconomic state agencies which gained greatly augmented authority and autonomy The key agents of innovation were politicians and economists in state agencies and their initiatives combined processes of both punctuated and incremental change Within the overarching transformation of the state the book explores case studies of specific social and labor market policies These reveal a close elective affinity between programmatic neoliberal reforms and the proactive drive of the Ministry of Finance to enhance its control over public spending and policy design The case studies also document instances in which neoliberal reforms were blocked undermined or overturned by opposition from inside or outside the state

Assessing MENA Political Reform, Post-Arab Spring Brian Robert Calfano, 2014-10-29 The euphoria and promise that accompanied the Arab Spring has been replaced with a business as usual tone in the MENA Revolutionary shifts in political and religious power have been tempered and in some cases reversed Observers should not be surprised at these outcomes

but skeptics would be advised to remain attentive to regional factors that continue to present potentials for reform This volume examines a variety of such factors as mediators of MENA political reform including Islam political party and government relations regime type elite influence and Internet access By providing both a broad review of the relevant literatures and a flexible assessment of the region s political prospects in the post Spring period the volume leverages insights from a series of regional experts and political analysts to offer a useful contribution to the continuing work of reform by MENA scholars policymakers and the general public The Political Economy of Elites in Latin America Jan

Ickler,Rebeca Ramos Padrón,2024-12-31 Recent years have seen renewed interest in elites around the world and their interconnection with power privilege social stratification and social change The contributors to this edited volume explore the many facets of the role of elites in the political economy of Latin America their position within society their impact upon the economy and their influence within governing institutions The book demonstrates that in Latin America as in many other parts of the world structural change and movements toward more just inclusive and sustainable societies seem impossible without the involvement of elites at some level This raises important questions Under what conditions do elites push for reform How do elites react to societal and economic challenges and changes To what extent can popular classes successfully pressure elites Bringing together a selection of case studies covering different Latin American countries the book focuses on three key themes to address these questions first it explores how elites react to economic and societal challenges with some chapters looking at moments of change as well as measures taken by individual elites to alter the status quo Second it seeks to understand the interrelation between external and domestic factors that engender elite action including global markets geopolitics state institutions social forces and the internal structure of elite groups Third it reflects upon methodological questions of studying elites in Latin America laying bare the potential pitfalls and offering possible routes to further inquiry This book will be vital reading for researchers in political economy development economics economic sociology and Latin American studies more broadly Announcement Washington State University,1913 **Welfare in an Idle Society?**

Bernd Marin,2017-10-24 The modern welfare state is indeed one of the greatest achievements of the post war 20th century With its key aims of eradicating the five giant social ills of Want Ignorance Disease Squalor and Idleness it aimed to providing a minimum standard of living with all people of working age paying a weekly contribution in return benefits would be paid to anyone who was sick unemployed retired or widowed The modern welfare state therefore is about maintaining a delicate equilibrium between dependent social groups on the one hand and the active working classes on the other In the case of old age security this balance is being achieved or not by the so called Generation Contract This social pact is more of an implicit unwritten and unspecified social contract This ground breaking book demonstrates how countries are addressing population ageing challenges in depth using the case study of Austria to gain the required complexity and differentiation in a comparative European framework of empirical evidence This is a broad social science study in political economy and

sociology not an economic analysis Though focusing on pensions it centres on the im balance between work and non work issues of health work ability employability and benefit receipt from old age security to disability allowance It will be required reading for all sociologists and social policy experts and academics working within this area *Political Economy of Globalization: Financialization & Crises* Mehak Anjum Siddiquei, Giorgi Benashvili, Hamza Şimşek, Sidar Atalay Şimşek, Berna Uymaz, Orhan Şimşek, Nalan Kangal, İlhan Eroğlu, Mustafa Necati Çoban, Kaan Yiğenoğlu, Nagehan Karanfil, Ümit İzmen, Barış Kocaarslan, Başak Ergüder, Ömer Yalçinkaya, Halil İbrahim Aydın, 2016-12-28 This edited book is a collection of selected papers presented at the International Conference of Political Economy ICOPEC 2016 The deliberate employment of the term political economy in the title International Conference of Political Economy implies the fact that economics is perceived as an integral part of social phenomena in the International Conference of Political Economy ICOPEC Accordingly even if economic institutions and relations form the foundations of society in the contemporary world economic development is dependent on social power and dynamics while economic policies per se are shaped by not only technical processes but also diverse interests and choices Within this context politics is involved in every encounter between different economic classes social groups and genders being shaped by the visions of a better life as the subject matter of philosophy ethics and religion and at times it finds its best expression in art Law on the other hand is the embodiment of all social relations which are in their essence political Thus this conference does not reduce society to market relations only despite positioning the economy in the heart of social relations Above all it considers the society as a political entity Indeed everything constitutes the subject matter of politics The arguments in favour of purifying market relations from the influence of politics and the discourse that they take place on their own right serve to disguise the conflicts of interest and power asymmetries inherent therein This conference regards man as homo politicus as Aristoteles put it rather than homo economicus In 2016 ICOPEC conferences were turned into a conference series with its 7th conference and the main theme of the 7th conference was determined as State Economic Policy Taxation and Development IJOPEC Publication has undertaken to publish selected papers presented at this conference in English and Turkish in five different edited books In the 90s the phenomena of globalization managed to dominate political popular and academic debates While reading a newspaper or a book watching television surfing the Internet or participating in a demonstration we come across the links of globalization in our everyday lives Globalization as a wide term is variously blamed or credited with a huge range of negative effects e g it is often related to social problems ranging from famine to floods from pollution to poverty and from rural depopulation to urban overcrowding On the contrary globalization can be also considered as the source of success in development for instance decrease in the poverty levels economic prosperity and growth better services and enhanced awareness of human rights Nevertheless some sceptics of the benefits from globalization have also described the potential ways in transforming political economic and social relations within and between countries This transformation may lead to the benefit of human welfare worldwide T smail iriner Bryan

Christiansen Julia Dobрева Introduction Political Economy of Globalization Financialization Stockhammer 2013 One key component is the magnificent growth of the financial sector Greenwood although to a softer scope similar processes can also be observed in other OECD countries Philippon Reshel 2013 The financial rise has its base in the deregulation and liberalization of the financial and economic system From this point of view financialization is the cause rather than the effect This is the major difference compared to the other approaches Financialization can affect the macro economy through four main channels These are income distribution investment in capital stock household debt and net exports and current account balances As a correction it is discussed that economic structures governed by financialization should be addressed on four dimensions a re regulation and reduction of the financial sector b redistribution of income from top to bottom and from capital to labour c re orientation of macroeconomic policies to stabilize domestic demand at non inflationary full employment levels and eventually d re creation of international monetary and economic policy coordination

Congress of Arts and Science: Economics. Politics. Jurisprudence. Social Science Howard Jason Rogers,1906

Conceptualising an Alternative Political Economy of Sustainability Arturo Hermann,2025-06-26 Engagement with and between a plurality of progressive non neoclassical traditions is an important step in fostering a more capacious understanding of sustainability both as a concept and as a political objective To that end this book provides a far reaching overview of the development of radical ecology and heterodox economics on the issues of sustainability highlighting the

presence of different but largely complementary perspectives and arguing that greater engagement between these schools of thought is required to help formulate viable alternatives to the prevailing neoliberal ideology The chapters of this volume demonstrate from various theoretical perspectives of radical ecology and heterodox economics in particular degrowth ecosocialism original institutional economics theories of complex systems the conceptual ontological epistemological and political economic limitations of existing mainstream accounts of sustainability grounded as they are in neoclassical environmental economics The international cast list of contributors argues in favour of heterodox theories to inform an alternative political economy of socially just sustainability by considering how these are grounded in a more realistic holistic and critical economics Each chapter in this section examines how the schools of thought under consideration articulate the political economic foundations of sustainability and in turn what these mean in practice over how in policy action sustainability should be achieved This volume is essential reading for anyone concerned with a viable alternative conception of sustainable economy and in particular with readers from all strands of radical ecology and heterodox economics policy makers institutions and organisations dealing with the issues of sustainability *The Oxford Handbook of Historical Political Economy* Jeffery A.
