Tomlinson,2014-05-09 In the World Library of Educationalists series international experts themselves compile career long collections of what they judge to be their finest pieces extracts from books key articles salient research findings major theoretical and practical contributions so the world can read them in a single manageable volume Readers will be able to follow the themes and strands and see how their work contributes to the development of the field Professor Sally Tomlinson brings together 12 of her key writings in one place including chapters from her best selling books and articles from leading journals In this landmark publication she reviews and recounts the history and development of her research and writing over 30 years that is concerned with the politics of education systems especially special education and the place of social classes and ethnic and racial minorities in the systems Social class race and gender have historically always been essential markers in deciding who would receive a minimum or inferior education and thus fail to obtain whatever were currently acceptable qualifications Definitions of the less able or ineducable were based on beliefs in the biological and cultural inferiority of lower social classes racial and immigrant groups Professor Tomlinson s aim in her work has always been to introduce sociological historical and political perspectives into an area dominated by psychological administrative and technical views and to explain how the individual problems were connected to wider social structures and policies This unique collection illustrates

the development of Professor Tomlinson's thinking over the course of her long and esteemed career The State and Politics In Japan Ian Neary, 2019-05-20 Politics in Japan is undergoing a major transformation Under the leadership of Prime Minister Abe Shinzo the ruling Liberal Democratic Party has since 2012 embarked upon an ambitious programme of policy reforms as well as changes to Japan's governing structures and processes At the heart of this policy agenda is Abenomics a set of measures designed to boost Japan's flagging economy but one which is yet to deliver on its promises In this fully revised and updated second edition of his classic text Ian Neary explores the dynamics of democracy in Japan introducing the key institutions developments and actors in its politics from the end of the Second World War to the present day Packed with illustrative material and examples this comprehensive study traces the continuities and the changes that are underway in five major policy areas foreign and defence industry social welfare the environment and human rights Assuming no prior knowledge of Japan this textbook will be an invaluable and welcome resource for all students interested in the government and politics of contemporary Japan and its international profile **Comparative Sociological Research in the 1960s and 1970s** Armer, Marsh, 2022-03-28 *Cities, Politics & Power* Simon Parker, 2010-11-02 Traditionally the study of power in the city was confined to the institutions of urban government and the actors involved in contesting and making political decisions in and for metropolitan societies Increasingly however attention has turned to the function of the city not only as a centre of urban governance but as a major economic social cultural and strategic force in its own right Cities Politics and Power combines this traditional concern with how the cities in which we live are organized and run with a broader focus on cities and urban regions as multiple sites and agents of power This book is divided into five sections with a short introduction outlining the argument and organisation of the text Part two charts the development of the urban polity and considers the ways in which coercion and force continue to be used to segregate oppress and annihilate urban populations Part three critically examines the key collective actors and processes that compete for and organise political power within cities and how urban governance operates and interacts with lesser and greater scales of government and networks of power Part four then explores the ways in which the political is constituted by urban inhabitants and how social identity information and communication networks and the natural and built environment all comprise intersecting fields of urban power The conclusion calls for a broader theoretical and thematic approach to the study of urban politics This book makes extensive use of comparative and historical case studies providing broad coverage of politics and urban movements in both the Global North and the Global South with a particular focus on the UK USA Canada Latin America and China It is written in an accessible and lucid style and provides suggestions for further reading at the end of each chapter **Social Security in Contemporary Japan** Mari Osawa, 2013-06-17 The present study analyzes the livelihood security system of contemporary Japan in international comparison from a historical and gender perspective It posits livelihood security systems rather than welfare states or welfare regimes as its object of analysis to enter the role of non governmental institutions and of

governmental policies reaching beyond income transfers into vision Based on rich statistical materials the evolution of Japan's livelihood security system in recent decades is traced to reveal a rigid male breadwinner orientation increasingly out of step with social realities The need for remedying the gender bias built into Japan's social insurance schemes has been politically highlighted since the late 1990s but legislative action has continued to be deferred The author argues that at present the livelihood security system of Japan is not only dysfunctional but actually functioning in reverse in a sense of furthering social exclusion The study concludes with suggestions for a possible reconstruction of Japan's social security system arguing for an increased role of the third sector or social economy in livelihood security and care provision This book will appeal to scholars and students with an interest in social policy welfare economics and gender studies as well as Japanese politics and society
