The Political Economy of the Welfare State in Latin America Alex Segura-Ubiergo,2007-06-25 This book is one of the first attempts to analyze how developing countries through the early twenty first century have established systems of social protection and how these systems have been affected by the processes of globalization and democratization The book focuses on Latin America to identify factors associated with the evolution of welfare state policies during the pre globalization period prior to 1979 whilst studying how globalization and democratization have affected governments fiscal commitment to social spending In contrast with the Western European experience more developed welfare systems evolved in countries relatively closed to international trade while the recent process of globalization that has swept the region has put substantial downward pressure on social security expenditures Health and education spending has been relatively protected from greater exposure to international markets and has actually increased substantially with the shift to democracy

FDI, Regionalism, Government Policy and Endogenous Growth Anthony Bende-Nabende,2018-08-20 Published in 1999 this text investigates whether FDI caused spill over effects which have led to the economic growth of the ASEAN 5 economies and if that it so whether the ASEAN Preferential Trade Agreement APTA had a significant effect in attracting FDI to the region It takes into account the different levels of economic development of the countries under analysis The results from the structural static model suggest that FDI has stimulated economic growth through the human factors followed by technology transfer international trade and learning by doing and that the formation of APTA had a lagged influence on FDI inflows into the advantage of the more developed member countries and the disadvantage of the less developed countries Those from the multiplier dynamic effects analysis demonstrate that whereas the impact is immediate in the more developed politically stable and foreign investment friendly economies there is a time lag in those economies which are less developed and more hostile to FDI The analysis presents an empirical comparison of how the level of economic development affects the interaction of FDI regionalism and economic growth
