Nothing Permanent Todd Cronan, 2023-06-20 A critical look at the competing motivations behind one of modern architecture s most widely known and misunderstood movements Although mid century modern has evolved into a highly popular and ubiquitous architectural style this term obscures the varied perspectives and approaches of its original practitioners In *Nothing Permanent* Todd Cronan displaces generalizations with a nuanced intellectual history of architectural innovation in California between 1920 and 1970 uncovering the conflicting intentions that would go on to reshape the future of American domestic life Focusing on four primary figures R M Schindler Richard Neutra and Charles and Ray Eames *Nothing Permanent* demonstrates how this prolific era of modern

architecture in California rather than constituting a homogenous movement was propelled by disparate approaches and aims Exemplified by the twin pillars of Schindler and Neutra and their respective ideological factions these two groups of architects represent opposing poles of architectural intentionality embodying divergent views about the dynamic between interior and exterior the idea of permanence and the extent to which architects could exercise control over the inhabitants of their structures Looking past California modernism's surface level idealization in present day style guides home decor publications films and television shows Nothing Permanent details the intellectual aesthetic and practical debates that lie at the roots of this complex architectural moment Extracting this period from its diffusion into visual culture Cronan argues that mid century architecture in California raised questions about the meaning of architecture and design that remain urgent today

NorCalMod Pierluigi Serraino, 2006-08-03 Many people think modernist architecture never flowered in California north
 of the San Fernando Valley NorCalMod dispels that notion in a copiously illustrated history showcasing extraordinary
 examples of its proud contribution to the Bay Area and environs As a style modernist architecture was hotly debated in its
 day why create modern structures where such distinctive Victorian and Arts and Crafts buildings already existed pulling
 heavyweights such as Frank Lloyd Wright Lewis Mumford and Walter Gropius into the fray Ultimately that existing Bay
 Region Style would remain the area's architectural hallmark but not before hundreds of important modernist projects many
 still standing yet unjustly neglected today had been established The remarkable photos in this book open our eyes to a long
 lost chapter in the history of California architecture and make NorCalMod a volume to be enjoyed by those interested in
 California history and style as well as by architecture students and professionals The Modern Steel House Neil
