Principles Of Environmental Geochemistry:

Principles of Environmental Geochemistry G. Nelson Eby, 2016-04-20 Many geochemists focus on natural systems with less emphasis on the human impact on those systems Environmental chemists frequently approach their subject with less consideration of the historical record than geoscientists The field of environmental geochemistry combines these approaches to address questions about the natural environment and anthropogenic effects on it Eby provides students with a solid foundation in basic aqueous geochemistry before discussing the important role carbon compounds isotopes and minerals play in environmental issues He then guides students through how these concepts apply to problems facing our atmosphere continental lands and oceans Rather than broadly discussing a variety of environmental problems the author focuses on principles throughout the text leading students to understand processes and how knowledge of those processes can be applied to environmental problem solving A wide variety of case studies and quantitative problems accompany each chapter giving each instructor the flexibility to tailor the material to his her course Many problems have no single correct answer illustrating the analytical nature of solving real world environmental problems

A History of Geochemistry and Cosmochemistry, from Prehistory to the End of the Classical Period Robert W. Boyle, 2024-05-01 Since Mendeleev outlined the modern periodic table in 1869 many new uses have been found for the 92 naturally occurring elements This book travels back in time to describe the utilization of materials familiar gold copper iron and arcane arsenic boron red ochre and their practical history mining metallurgy and crafts with evidence from archaeology and geology Together with the technological developments author Robert Boyle portrays the advances in our understanding of materials science which led to modern geological and environmental sciences It is a source book valuable to students of history and archaeology mining and metallurgy as well as to geologists mineralogists and geochemists everywhere

Environmental Geochemistry J. A. C. Fortescue, 2012-12-06 It is the policy of the federal Canadian Forestry Service to sponsor research initiatives from the private sector that are judged to be pertinent to its mandate and offer particular promise towards the optimal management of Canadian forest resources This book is based on such an initiative It represents the philosophy of the author himself and is in no way constrained by the views of the sponsoring agency Over the past two decades Dr J A C Fortescue has become well known at a number of research centers throughout the world He has pioneered the approach to

environmental understanding that is comprehensively developed in this text The limitations of traditional compartmentalized approaches are deprecated and the case is made for a holistic rethinking of basic concepts and principles Landscape Geochemistry is the disciplinary outcome that gives expression to this rethinking It may be viewed as the minimum scale of conceptual approach necessary in the environmental sciences to solve present day problems and to exploit future opportunities

Fundamentals of Environmental and Toxicological Chemistry Stanley E. Manahan,2013-02-25

Fundamentals of Environmental and Toxicological Chemistry Sustainable Science Fourth Edition covers university level environmental chemistry with toxicological chemistry integrated throughout the book This new edition of a bestseller provides an updated text with an increased emphasis on sustainability and green chemistry It is organized based on the five spheres of Earth s environment 1 the hydrosphere water 2 the atmosphere air 3 the geosphere solid Earth 4 the biosphere life and 5 the anthrosphere the part of the environment made and used by humans The first chapter defines environmental

chemistry and each of the five environmental spheres The second chapter presents the basics of toxicological chemistry and its relationship to environmental chemistry Subsequent chapters are grouped by sphere beginning with the hydrosphere and its environmental chemistry water pollution sustainability and water as nature's most renewable resource Chapters then describe the atmosphere its structure and importance for protecting life on Earth air pollutants and the sustainability of atmospheric quality The author explains the nature of the geosphere and discusses soil for growing food as well as geosphere sustainability He also describes the biosphere and its sustainability The final sphere described is the anthrosphere The text explains human influence on the environment including climate pollution in and by the anthrosphere and means of sustaining this sphere It also discusses renewable nonpolluting energy and introduces workplace monitoring For readers needing additional basic chemistry background the book includes two chapters on general chemistry and organic chemistry This updated edition includes three new chapters new examples and figures and many new homework problems

Biodiversity Enrichment in a Diverse World Gbolagade Akeem Lameed, 2012-08-29 This book Biodiversity Enrichment in a Diverse World considered biodiversity plants animals fungi and microbes from three different angles genetics species and ecosystems The relationships between them are complex and it looks at these aspects from different angles and also various interventions at different levels The scientific approach of the book demonstrates that the three levels are closely inter connected and action is therefore needed to conserve and protect the systems if the benefits provided to human life will continue to be available However conservation of the biological diversity is essentially an umbrella term for traditional species relationship to human health ecosystem conservation and the need to manage the human use of the species and ecosystems in a sustainable way
