Secular and Religious Dynamics in Humanitarian Response Olivia J. Wilkinson, 2019-11-28 This book investigates the ways in which the humanitarian system is secular and understands religious beliefs and practices when responding to disasters The book teases out the reasons why humanitarians are reluctant to engage with what are seen as messy cultural dynamics within the communities they work with and how this can lead to strained or broken relationships with disaster affected populations and irrelevant and inappropriate disaster assistance that imposes distant and relatively meaningless values In order to interrogate secular boundaries within humanitarian response the book draws particularly on qualitative primary data from the aftermath of Typhoon Haiyan in the Philippines The case study shows how religious

practices and beliefs strongly influenced people's disaster experience yet humanitarian organisations often failed to recognise or engage with this. Whilst secularity in the humanitarian system does not completely exclude religious participation and expression it does create biases and boundaries. Many humanitarians view their secularity as essential to their position of impartiality and cultural sensitivity in comparison to what were seen as the biased and unprofessional beliefs and practices of religions and religious actors even though disaster affected people felt that it was the secular humanitarians that were less impartial and culturally sensitive. This empirically driven examination of the role of secularity within humanitarianism will be of interest to the growing field of pracademic researchers across NGOs, government consultancy and think tanks as well as researchers working directly within academic institutions.

Encyclopaedia of Religion and Ethics
 James Hastings, John Alexander Selbie, Louis Herbert Gray, 1928 Truth Seeker, 1925 There is a Crack in Everything—Education and Religion in a Secular Age K. H. (Ina) ter Avest, 2019-11-22

There are two constants in academic and theological discourse throughout history: they are the debate around secularization and the dialogue concerning the intersection of religion and education. Each age has had its debate about modernizing forces that drive concerns of impending secularization. In this publication, this theme is approached from perspectives of teachers of students of policy makers and situated in a politico-historical context. Aware of the fact that in today's plural societies one sacred canopy is non-existent anymore, cracks of the sacred canopy canopies are described as well as the light that gets in the possible and challenging ways out are roughly sketched.

Education, Politics and Religion James Arthur, Liam Gearon, Alan Sears, 2010-06-28

In recent years a number of popular books have savaged religion, arguing it is a dangerous delusion that poisons human societies and relationships. This is but the most recent manifestation of a secularising agenda that has been sweeping contemporary democratic societies since the Enlightenment. This book pushes back against that agenda, examining its key assumptions and arguing that the exclusion of religious people and ideas from education and the public square is both undemocratic and unwise. For the most part, the book draws arguments and examples from Christianity, the religious tradition of the authors, but it recognises that many religions share the concerns and possibilities examined. The book examines contemporary expressions of the secularising agenda in Western

democracies with particular focus on how that is played out in education It demonstrates how republican theory understood within a faith perspective provides a shared understanding and substantive basis for education within a Western democracy It explores the historical connections and disconnections between religion and civic life in the West from ancient to contemporary times and examines religiously based civic action and pedagogical approaches contending both have the potential to contribute greatly to democracy It will be of value to any who are interested in exploring how democracies can include the voices of all their citizens the religious and the secular
