Religious Politics in Global and Comparative Perspective William H. Swatos Jr., 1989-09-07 Current social and political theories which tend to dismiss religious resurgence as a deviant occurrence in the broad sweep of history do not provide an adequate framework for the study of the dramatic resurgence of religion as a worldwide political force This book is the first to address the interplay of religion and politics

systematically and on a global scale. Offering interpretive essays as well as quantitative comparative analyses, it develops a comprehensive theoretical framework and presents the most complete comparative account available of the realities of religious politics in the contemporary world. The first of the interpretive chapters focuses on the cultural factor as a means of clarifying the role of religion in the modern world system. The next two chapters examine the concept of the self in the context of globalization and the absence of solidarity as a unifying force in societal systems. The role of ultimate values in politics and the reasons for the emergence of militant religious movements in nation states is also considered. A worldwide study of religious change between 1900 and 1980 gives a clear picture of contemporary global religious movements and formulates a tentative set of explanations of change based on data analysis. The statistical links between religious beliefs and political views and between religion and democracy are explored. The editor's concluding chapter looks at the implications of the authors' findings for general theory in the sociology of religion. The editor stresses the need for reconceptualizing basic theoretical constructs, particularly the concept of religion itself. An important contribution to our understanding of the religious and political forces that are shaping the modern world, this work will be of interest to academics, researchers, and students of world religions, sociology, and political science.

*International Handbook of Inter-religious Education* Kath Engebretson, Marian de Souza, Gloria Durka, Liam Gearon, 2010-08-17. This Handbook is based on the conviction of its editors and contributing authors that understanding and acceptance of, as well as collaboration between, religions has essential educational value. The development of this Handbook rests on the further assumption that interreligious education has an important role in elucidating the global demand for human rights, justice, and peace. Interreligious education reveals that the creeds and holy books of the world's religions teach about spiritual systems that reject violence and the individualistic pursuit of economic and political gain and call their followers to compassion for every human being. It also seeks to lead students to an awareness that the followers of religions across the world need to be and to grow in dialogical relationships of respect and understanding. An essential aim of interreligious education is the promotion of understanding and engagement between people of different religions, and therefore it has great potential to contribute to the common good of the global community. Interreligious education has grown from the interfaith movement whose beginning is usually identified with the World Parliament of Religions held in Chicago in 1893. This was the first time in history that leaders of the eastern and western religions had come together for dialogue and to consider working together for global unity.

Wedemeyer, Wendy Doniger, 2010-03-08 This volume comprises papers presented at a conference marking the 50th anniversary of Joachim Wach's death and the centennial of Mircea Eliade's birth Its purpose is to reconsider both the problematic separate legacies of these two major twentieth century historians of religions and the bearing of these two legacies upon each other Shortly after Wach's death in 1955 Eliade succeeded him as the premiere historian of religions at the University of Chicago As a result the two have been associated with each other in many people's minds as the successive leaders of the so called Chicago School in the history of religions In fact as this volume makes clear there never was a monolithic Chicago School Although Wach reportedly referred to Eliade as the most astute historian of religions of the day the two never met and their approaches to the study of religions differed significantly Several dominant issues run through the essays collected here the relationship between the two men's writings and their lives and in Eliade's case the relationship between his political commitments and his writings in fiction history of religions and autobiography Both men's contributions to the field continue to provoke controversy and debate and this volume sheds new light on these controversies and what they reveal about these two scholars legacies Global Eastern Orthodoxy Giuseppe Giordan, Siniša Zrinščak, 2020-02-19
