Remaking Europe The European Union And The Transition Economies:

Remaking Europe Jozef M. van Brabant, 1999 A watershed in efforts to integrate Europe the plans to widen the EU will inevitably conflict with forces for deepening integration Focusing on economic factors this volume explores the key questions of widening including why the negotiations are likely to be contentious for all concerned **Norms and Nannies** Ronald Haly Linden, 2002 As the Central and East European states seek to join the European Union and NATO they face challenging demands to adhere to specific European norms and standards In this first comprehensive analysis contributors examine how this process operates in a variety of domains including civil military relations social labor and regional relations economic and information policies and foreign policy Each author considers what norms are generated by or absent from European international organizations how they are communicated to prospective members and most important what impact they have had on the policies and actions of individual countries as well as on the region as a whole These on the ground studies provide the empirical foundation needed to support theories of norm diffusion constructivism and liberalism in international relations and comparative politics alike **Enlargement of the European Union** Allan F. Tatham, 2009-01-26 The development of EU enlargement has raised many thorny issues unanticipated by the framers of the EC Treaty A significant upshot of these issues is that the concept of European identity defined in terms of such factors as culture history and economics has supplanted the long dominant theme of widening and deepening particularly since the Union's expansion has become primarily eastward The major contribution of this important book lies in its analysis of the conceptualization and perception of enlargement from various points of view focusing on the concerns of stakeholders and the identity conflicts and uncertainties incurred by enlargement initiatives In the course of its presentation it details the actual pre accession Europeanization process and its complex history Among the key elements discussed are the following the conflict between widening and deepening and the effect on EU institutional reform institutional requirements on candidate countries pre accession criteria and negotiations administrative capacity judicial capacity and legal approximation in accession states capacity of the EU to absorb new Member States and EC law as part of European identity Also covered are specific historical details of particular pre accession negotiations e g Greece Spain Portugal Malta and Cyprus the still inconclusive negotiations with Turkey and the Western Balkan states and political factors involved in the non accession of Norway Iceland and Switzerland Assembling powerful evidence and applying incisive analysis the author's conclusion shows that absent further and major EU institutional reform it will be difficult for an enlarging Union to continue to deliver the goods A watershed in the continuing great debate on the fulfilment of the EC Treaty's determination to foster and promote an ever closer union of the peoples of Europe this book will prove invaluable to anybody interested in the European integration project particularly lawyers academics officials and policymakers in the EU Member States Annuaire Europeen 2000/European Yearbook 2000 Francis Rosensteel, 2001-07-01 The year 2000's most significant international event was

almost certainly neither political nor military but scientific the announcement in June that the human genome had been almost totally decoded Future generations may well see this as a major turning point opening the way to radical changes in diagnosis prognosis and medical treatment Often compared with the space programme this vast enterprise still generates misgivings this new power which human beings now have to modify the genetic heritage of living creatures raises fundamentally new ethical questions and society as a whole will have to find the answers In fact the accelerating pace of scientific and technical progress seems to be reviving atavistic anxieties some rational others less so Recent public health crises including the mad cow disease scare which lasted into 2000 have fuelled these fears The public's rejection of GMOs Genetically Modified Organisms verging on a crusade in some countries tells its own story As regards conflict 2000 saw the Middle East peace process grind to a halt and the Intifada resume In Europe the situation in Kosovo and Chechnya both the scenes of fighting in 1999 stayed precarious Peace and democracy did score some successes however particularly in Europe the centre left's victory in Croatia sweeping former President Tudjman's party off the scene the democratic party's triumph in Bosnia and the fall of the Milosevic regime in Serbia

Special Bibliography Series United States Air Force Academy. Library, 2001 *Special Bibliography Series*, 1957 *Transnational Politics of the Environment* Liliana B. Andonova, 2003-11-21 A study of the effect of EU membership on Central and Eastern European environmental policy and the interplay of political incentives and industry behavior that determines policy In *Transnational Politics of the Environment* Liliana Andonova examines the effect of the European Union EU on the environmental policies of Bulgaria the Czech Republic and Poland Compliance with EU environmental regulations is especially onerous for Central and Eastern European countries because of the costs involved and the legacy of pollution from communist era industries But Andonova argues that EU integration has a positive impact on environmental policies in these countries by exerting a strong influence on the environmental interests of regulated industries With her empirical study of chemical safety and air pollution policies from 1990 to 2000 she shows that export competitive industries such as the chemical industry that would benefit from economic integration have an incentive to adopt EU norms By contrast industries such as electric utilities that primarily serve the domestic market remain opposed to EU environmental standards and must be prodded by their own governments to implement environmental protection measures These differences in domestic interests greatly influence the course of reforms and the adoption of EU standards *Transnational Politics of the Environment* challenges the current focus on intergovernmental cooperation between East and West by highlighting the roles of industries transnational norms and domestic institutions in promoting change in environmental regulation It offers a generalizable framework for understanding the politics of environmental regulation in emerging market economies and helps bridge the divide between the study of domestic and international environmental politics *The Changing Geopolitics of Eastern Europe* Dr A H Dawson, Rick Fawn, 2013-11-05 This work covers the uncertain geopolitical situation of some countries of Central and Eastern Europe

Integrating Europe J.M. Van Brabant, 2012-12-06 Bringing the eastern European economies in transition defined more precisely in the Introduction under the economic political and security umbrella of the European Union ED has been an ambition of many of these countries from the very start of the so called annus mirabilis in 1989 The road to gratification of this aspiration since then has been rather bumpy however one wants to look at recent events Indeed since 1989 the relationship between the EU and the economies in transition has been ebbing and flowing with the evolution of two main strands of policy stances in the EU One has been deep skepticism about bringing these countries into the Union at all in any foreseeable future This in spite of the fact that after long hesitation in mid 1993 the EU Member States committed themselves eventually to explore accession with selected transition economies as well as Cyprus and Malta The other has been their evolving attitude toward their own integration endeavors Hence the dilemmas in the EU's parlance of the deepening versus widening conundrum That indeed constitutes the paramount issue addressed in the present investigation

Jovanović,2015-05-29 The dissipating multilateral trading system and splintering in a number of trading blocs and arrangements has been one of the most important issues in international economics particularly after the establishment of the World Trade Organisation in 1995 Palgrave Dictionary of Emerging Markets and Transition Economics Jens Hölscher,Horst Tomann,2015-10-21 The period of transition from socialism to capitalism in parts of Europe and Asia over the past 25 years has attracted considerable interest in academia and beyond From the Editors of Palgrave s iconic series Studies in Economic Transition comes the Palgrave Dictionary of Emerging Markets and Transition Economics This dictionary addresses the needs of students lecturers and the interested general

The Political Economy of the European Social Model Philip Whyman, Mark Baimbridge, Andrew Mullen, 2012 This book seeks to analyse the development of the European Union EU which was founded upon the principle of the free movement of capital goods services and people in 1957 Its central thesis is that from a practical and theoretical point of view such a basis is fundamentally at odds with the creation of an interventionist regime that the construction of a social Europe would require The authors argue convincingly that economically the EU does not currently possess the budget or the economic tools to pursue such a strategy politically close to none of the institutions of the EU have backed such a policy practically conservative and neo liberal forces among member states and the institutions of the EU have repeatedly thwarted any moves in this direction In reality the Single Internal Market Economic and Monetary Union enlargement the Lisbon Agenda and European Constitution projects all prioritise supply side measures and expanding the scope of the market rather than the boosting of demand and other economic intervention Consequently constructing a social Europe in the face of this would appear problematic Hence in both theory and practice the idea that there can be a social Europe vis vis neoliberalisation is a contradiction in terms This controversial book will be an educating and refreshing read for advanced students and academics involved with European politics the European Union European Economics and Economic institutions
