Looking After Your Computer For The Older Generation:

The Essential Family Guide to Caring for Older People Deborah Stone, 2019-11-14 No one wants to think about getting older. It's true. At any age when things are moving along normally day to day and everyone seems fit and well there seems no reason to think about future problems that your friends and relatives might and probably will come across as they age. In fact it might even seem a little morbid to think such thoughts or possibly even tempting fate. Yet there will come a time when you must raise these issues and ideally this should be before any problems arise. The Essential Family Guide to Caring for Older People is the ultimate source of information and help for families with care responsibilities. Deborah Stone draws on her extensive experience working in elder care to offer practical advice on every aspect of the field in depth. Topics range from how to get help immediately, legal information, care funding options, a guide to useful technology and advice on the main physical and mental health issues that affect older people. Plus guidance is given on dealing with social services and ensuring you choose the right care for your situations. Crucially the book also offers help on how to cope as a carer with practical advice on juggling family work and your caring responsibilities while looking after yourself. **The Destiny Series Books**

Yoga and The Portal , Families, Young People, Physical Activity and Health Symeon Dagkas, Lisette Burrows, 2016-05-05

The family is an important site for the transmission of knowledge and cultural values. Amidst claims that young people are failing to follow health advice, dropping out of sport and at risk of an ever expanding list of lifestyle diseases, families have become the target of government interventions. This book is the first to offer critical sociological perspectives on how families do and do not function as a pedagogical site for health education, sport and physical activity practices. This book focuses on the importance of families as sites of pedagogical work across a range of cultural and geographical contexts. It explores the relationships between families, education, health, physical activity and sport, and also offers reflections on the methodological and ethical issues arising from this research. Its chapters discuss key questions such as: how active living messages are taken up in families; how parents perceive the role of education, physical activity and sport; how culture, gender, religion and social class shape engagement in sport; how family pedagogies may influence health education, sport and physical activity now and in the future. This book is essential reading for anyone with an interest in health, physical education, health education, family studies, sport pedagogy or the sociology of sport and exercise.
