Managing Martians Donna Shirley, 1999-06-01 Donna Shirley's 35 year career as an aerospace engineer reached a jubilant pinnacle in July 1997 when Sojourner the solar powered self guided microwave oven sized rover was seen exploring the Martian landscape in Pathfinder's spectacular images from the surface of the red planet The event marked a milestone in space but for Donna Shirley the leader of the mostly male team that designed and built Sojourner and the first woman ever to manage a NASA program it marked a triumph of another kind Managing Martians is Shirley's captivating memoir of a life and career spent reaching for the stars From her seemingly outlandish aspiration at age ten to build aircraft to abandoning high school Home Ec in favor of mechanical drawing and at sixteen becoming a licensed pilot Shirley defied expectations from the beginning In a vivid narrative rich with anecdotes and thrilling turning points Shirley recounts the intense battles she waged to defend her vision and the ingenuity and resourcefulness of her committed team Her moment by cliffhanging moment account of Pathfinder's landing and Sojourner's first tentative foray across the sands of Mars brilliantly captures the fulfillment of a lifelong dream as it heralds a brave new era of space exploration Managing Martians Donna Shirley, 2010-06-09

Project Management: The Managerial Process 6e Erik Larson, Clifford Gray, 2014-07-16 Project Management The Managerial Process 6e Wired for War P. W. Singer, 2009-01-22 Singer's enthusiasm becomes infectious Wired for War is a book of its time this is strategy for the Facebook generation Foreign Affairs An engrossing picture of a new class of weapon that may revolutionize future wars Kirkus Reviews P W Singer explores the great est revolution in military affairs since the atom bomb the dawn of robotic warfare We are on the cusp of a massive shift in military technology that threatens to make real the stuff of I Robot and The Terminator Blending historical evidence with interviews of an amazing cast of characters Singer shows how technology is changing not just how wars are fought but also the politics economics laws and the ethics that surround war itself Travelling from the battlefields of

Iraq and Afghanistan to modern day skunk works in the midst of suburbia Wired for War will tantalise a wide readership from military buffs to policy wonks to gearheads *Lady Astronauts, Lady Engineers, and Naked Ladies* Karin Hilck, 2019-07-08

The book *Lady Astronauts Lady Engineers and Naked Ladies* is a gender history of the American space community and by extension a social history of American society in the twentieth century during the Cold War In order to expand and differentiate the prevalent postwar narrative about gender relations and cultural structures in the United States the book analyzes several different groups of women interacting in different social spaces within the space community It therewith grants insight into the several layers of female participation and agency in the community and the gender and race based obstacles and hurdles the female prospective astronauts scientists engineers artists administrators writers hostesses secretaries and wives were faced with at NASA and in the space industry In each chapter a different social space within the space community is analyzed The spaces where the women lived and worked are researched from a media individual and institutional angle ultimately revealing the differing gender philosophies communicated in the public sphere and the space community workplaces by government and space community officials While women were publicly encouraged to participate in the American space effort to beat the Soviet Union in the race to the moon women had to deal with gender based barriers which were integral to the structures of the space community just as they were an intrinsic component of all societal structures in the United States in the 1960s The female space workers who were often perceived as disrupters of the prevalent social order in the space community and discriminated by some of their male colleagues and bosses on a personal basis still managed to assert themselves They molded pockets of agency in the space community workspaces without the facilitation of regulations on the part of NASA that might have provided them with easier access or more agency Thus the space community a place of technological innovation was not necessarily also a place of social innovation but a community with a government agency at its center that mainly mirrored the current changing social order conventions and policies in the 1960s as well as in the 1970s and 1980s Nevertheless the women presented in this book were instrumental in advancing and consolidating the social transformation that happened within the space community and the United States and therefore make intriguing subjects of research Thus this systematic analysis of the connection between gender space and the Cold War adds a new dimension to space history as well as expands the discourse in American history about gender relations and the opportunities of women in the twentieth century **Life Stories** Maureen O'Connor, 2011-08-23
