*Moving the Force* Scott W. Conrad, 1994 **Moving the Force: Desert Storm and Beyond** Scott Conrad, National University, 2012-07-06 Without oil no engine can run Movement is the oil that enables America's military forces to sustain an operation and nothing happens until something moves As America's military priorities are reordered the ability to move quickly sustain forces anywhere in the world and pre position equipment and material near likely areas of crisis is more important than ever Because of the apparent ease of movement during Desert Shield and Desert Storm however decision makers may in the afterglow of the Desert Storm victory be prone to misinterpret the lessons of the Gulf War and fail to address movement capabilities properly for the future A good example is a recent Congressional decision to divert funds from salted improvement to the Army's afloat pre positioning capability to the building of an amphibious assault ship The capacity to foster global stability and defend our national interests depends upon correct long range planning for transport Logistics especially mobility has long been a bill payer for combat equipment so perhaps a reappraisal is in order Lessons of the Gulf War can help reshape America's defense transportation system for the post Cold War era Commitment to a balanced and unified mobility strategy should provide the most cost effective rapidly deployable and sustainable combat capability Regional focus particularly in a multiple conflict scenario and reduced forward presence will significantly increase America's reliance on movement in the future Careful restructuring of military movement capabilities will lessen the risks of distance and time in an unstable world and contribute to the economic well being of the nation To do less might invite confrontation with adversaries willing to test the substance and purpose of our reach *The Multilateral Development Banks* DIANE Publishing Company, 1994-12 Covers the extent of U S business generated as a result of America's participation in the multilateral development banks Outlines how the development banks cooperate with the Export Import Bank other U S Government agencies in increasing business opportunities for U S firms in developing countries Lists several hundred firms in 41 states that have received contracts from the development banks or benefited in some other way from their work

**Of Precision Guided Bombs** Major Donald I. Blackwelder,2015-11-06 This paper examines the long development of precision guided bombs to show that the accuracy attained in Desert Storm was an evolution not a revolution in aerial warfare This evolution continues and gives offensive airpower the advantage over the defense Guided bomb development started during World War One with the aerial torpedo During World War Two the German Fritz X and Hs 293 were visually guided bombs and both experienced success against allied shipping The Army Air Corps also developed a wide variety of TV heat radar and visually guided bombs The visually guided AZON was successful in Burma and the radar guided Bat was successful against Japanese ships During the Korean War visually guided RAZON and TARZON bombs had some success In Vietnam the Paveway I laser guided bombs and Walleye TV guided bombs were successful on a much broader scale Paveway II and III Walleye II and GBU 15s were developed and successfully combat tested throughout the 1970s and 1980s When Desert Storm initiated in 1991 there were very few guided weapons that had not been extensively tested on training ranges and in combat The precision demonstrated to the World during Desert Storm started evolving when airpower was first envisioned as a new dimension for conducting war and was far from a revolution Now the continued development of imaging infrared laser radar synthetic aperture radar and millimeter wave radar autonomous seekers further increases the flexibility range and effectiveness of guided bombs      **Books in Print** ,1991      **Essays on Strategy** ,1994      **World Watch** ,1995
