*Translation as Criticism* Anna Gadd Colombi, 2018-07-27 Themes places characters and voices of Elizabeth Jolley s Mr Scobie s Riddle are explored in detail in this monograph which provides different narratological and translational analyses of the novel as well as an academic translation into Italian Considering the challenges and issues posited by a literary work s translation helps to shed light on the original work itself In this manner the translation is to be seen as a further analytical instrument to gain insight into the original novel The purpose of this work is to obtain a deeper understanding of the complicated microcosm created by Jolley in the nursing home of St Christopher and St Jude the typically Australian themes of migration isolation place and displacement the Australian culture specific elements the ensemble of curious characters and their entertaining voices This book strives to preserve the above elements in translation as the expression of something Other a different culture and to take Italian readers on a journey to the Australia depicted in Mr Scobie s Riddle so that Jolley s characters voices can echo in the Italian language      *Mr Scobie's Riddle and the Contemporary Vollendungsroman* , 1991

*Rewriting God* Elaine Lindsay, 2021-11-22 Women are rarely if ever mentioned in commentaries upon Australian Christianity and spirituality Only exceptional women are recognized as authorities on religious matters Why is this so Does it matter Don t people from the same religious tradition share similar experiences of the divine regardless of their gender Rewriting God asks whether women have been writing about the divine and whether their insights are different from those contained in malestream accounts of Australian Christianity and spirituality An analysis of the writings of popular theologians and religious commentators over the last twenty years suggests that the most popular form of spirituality among Australian theologians is Desert Spirituality An analysis of women s autobiographical writings however suggests that the desert is irrelevant to many women s spiritual experiences This book through a close investigation of the fictions of Thea Astley Elizabeth Jolley and Barbara Hanrahan attempts to posit alternative forms of women s spirituality and to signal ways in which this spirituality is already being expressed From the evidence gathered here it becomes obvious that traditional expressions of Australian Christianity and spirituality are gender specific and that they have functioned to deny women s religious experiences and to silence their claims to equality in the sight and service of the divine It becomes obvious too that women have been developing their own forms of religious expression and that these may be expected to supplant gradually withering images of Desert Spirituality Whether this new imagery will strengthen Australian Christianity or whether it merely marks a decline in the authority of Christianity remains a moot point      **Answering to the Language** C. *Edge of the Sacred - Jung, Psyche, Earth* David Tacey, Does earth have spirit or soul This is a question being asked ever more frequently especially by those interested in the future of the natural world and the development of consciousness The alchemists said the greater part of the soul is outside the body and indigenous cultures have felt that soul or spirit resides in Nature and the physical environment Such notions have been dismissed by modernity as illusions but we are beginning to have second thoughts about the animation of the earth Science and rationality have not taught us how to love or care for the earth and in the modern era the environment has been disrespected The mythic bonds to Nature such as those found in Aboriginal Australian cultures appear to have real survival value because they bind us to the earth in a meaningful way When these bonds are destroyed by excessive rationality or a collapse of cultural mythology we are left alone outside the community of Nature and in an alienated state In this state we do real damage to the environment because it is no longer
