Exploration and Monitoring of the Continental Shelf Underwater Environment Iftikhar B. Abbasov, 2018-10-02 Dedicated to the unique developments of hydroacoustical equipment to monitor the sea coastal shelf environment this groundbreaking unique study presents a survey of modern methods and technical monitoring facilities including the diagnostics of underwater engineering when monitoring offshore There is still so much about the oceans that scientists do not know and exploring the continental shelves of the world is a huge part of finding out more about these underwater environments Further to that it is extremely important that while scientists and engineers explore and monitor the continental shelf no damage is done to these precious environments That is the needle that this study intends to thread giving scientists and engineers a better method and processes for exploring these underwater mysteries while protecting the environment and wildlife thriving beneath Written by a proven scientist in this area this book is dedicated to the unique developments of hydroacoustical equipment to monitor the coastal shelf The results of the original experimental sonar studies with application of the parametric antenna are presented The book presents a survey of the modern methods and technical monitoring facilities of the coastal aqueous environment The basic characteristics of the parametric antennas are given considering propagation of the acoustic waves in the environments with dispersion and acoustical absorption The author and his colleagues consider the questions of formation of the parametric antenna field in layered heterogeneous media and the peculiarities of sounding of the interfaces and bottom sediments Ecological monitoring methods of the basic parameters of quality and condition of the aqueous environment are analyzed The peculiarities of diagnostics of the underwater engineering constructions when monitoring the offshore strips are described For both veteran engineers and students in the field alike this breakthrough study is a must have for any scientific library concerned with studying the oceans and especially the continental shelf

Hydroacoustic Ocean Exploration Iftikhar B. Abbasov, 2016-09-06 The only book that offers a comprehensive and fully up to date coverage of hydroacoustic ocean exploration this work deals with the diagnostics of non uniformities in a water medium using the hydroacoustic parametric antenna The non uniformities of the water medium in the study are of geometrically regular shape i e the shape of a sphere a cylinder and a spheroid An account is given of theoretical and experimental studies of wave processes that occur in the event of the scattering of non linearly interacting acoustic waves at a sphere a cylinder and a spheroid Scattering problems are formulated solutions to the inhomogeneous wave equation are found in the first and second approximations using the successive approximations method For the first time high frequency asymptotic expressions of acoustic pressure for all spectral components of the secondary field are obtained for the nonlinear scattering problem The scattering diagrams are calculated and plotted and then analyzed and compared Results of experimental studies of the parametric acoustic antenna field scattering at solid steel spheres are presented Experimental scattering diagrams both for the parametric antenna pump waves and for the secondary field waves including

the difference frequency wave the sum frequency wave and the second harmonic wave are presented 3D modeling of wave processes is also considered A must have for researchers and specialists in nonlinear hydroacoustics and ocean acoustics it also may be of use for postgraduates and students specializing in hydroacoustics and ocean exploration Exploring Entrepreneurship Richard Blundel,Nigel Lockett,2011-01-13 The text explores the nature of entrepreneurial activity in the 21st century and aims to develop the skills required by aspiring entrepreneurs Readers will gain a deeper insight into the activities of entrepreneurs and reflect critically on the nature of entrepreneurship and its role in the creation of new ventures

A Cold Colonialism Tina Adcock,2025-06-01 Exploration has long been pivotal to southern engagements with northern Canada but it is most often associated with the nineteenth century or earlier A Cold Colonialism offers the first extended examination of twentieth century exploration in the Canadian North Modern exploration helped southerners establish and maintain distinctive kinds of colonial and settler colonial power over northern Indigenous homelands Who explored the North between 1918 and 1965 What forms did exploration take What did it mean to explorers and others affected by it Tina Adcock focuses on four representative explorers with richly documented careers mining engineer George Douglas surveyor Guy Blanchet ethnologist Vilhjalmur Stefansson and filmmaker Richard Finnie Despite limited experience in and knowledge of the Canadian North these explorers helped southern militaries industries and governments exert control over northern peoples and their lands Each also claimed belonging in and authority over the North in ways that still resonate among southern settlers in Canada today

Advances in Geology and Resources Exploration Ahmad Safuan Bin A Rashid,Shiqi Huang,2022-09-19 Advances in Geology and Resources Exploration provides a collection of papers resulting from the conference on Geology and Resources Exploration ICGRED 2022 Harbin China 21 23 January 2022 The primary goal of the conference is to promote research and developmental activities in geology resources exploration and development and another goal is to promote scientific information interchange between scholars from the top universities business associations research centers and high tech enterprises working all around the world The conference conducted in depth exchanges and discussions on relevant topics such as geology resources exploration aiming to provide an academic and technical communication platform for scholars and engineers engaged in scientific research and engineering practice in the field of engineering geology geological resources and geothermal energy By sharing the status of scientific research achievements and cutting edge technologies this helps scholars and engineers all over the world to comprehend the academic development trend and to broaden research ideas With a view to strengthen international academic research academic topics exchange and discussion and promoting the industrialization cooperation of academic achievements
