**Architects and Architecture of London** Kenneth Allinson,2008-09-24 Architects and Architecture of London is a visual highly illustrated guide to London s greatest historic buildings and the lives of the architects who designed them Read about the architectural forefathers of London such as Inigo Jones and Sir Christopher Wren Nicholas Hawksmoor Robert Adam and John Nash Butterfield and Street Blomfield and Lutyens Learn about those who in the twentieth century have helped to form the London we now know right up to familiar names such as Rogers and Foster And then there are the others who in amongst the great and remembered architects stand as the forgotten majority talented architects such as Arthur Davis who designed the Ritz hotel In the constantly changing patterns of London s architecture why do some buildings stand as testament to their architect s while others obscure their names from history The book is organised by architect to provide an easy point of reference for today s designers and students and all those interested in the architectural history of London Architects and Architecture of London illuminates the city s two thousand year architectural history through the lives and works of historic architects who remain salient and significant in London s contemporary architectural geography What the press said about Ken Allinson s London s Contemporary Architecture An Explorer s Guide Highly recommended the book is crammed with maps and colour pictures with clear explanations about the design of the buildings Evening Standard The perfect accompaniment to a walk around the capital Homes and Gardens      **An Architecture of Care in South Africa** Nicholas Coetzer,2023-07-10 Architects care It is foundational and germane to the discipline and practice of architecture This book charts the way the Arts and Crafts Movement established the moral ethos of an architecture of care that not only remains embedded in current discourse and practice but also that is being given a more vocal presence in our climate crisis and social justice world By way of genealogical strands the book charts the origin of architecture of care ideas in the Arts and Crafts Movement and their impact on the other progeny architectural projects in South Africa over the past hundred years These range from the translation of inglenooks into an armature architecture of Dignified Places in Cape Town s townships to the ethos of upliftment and care that translates from Octavia Hill through to correcting building regulations and eventually finding a less moralising and more transformative impact in the Hostels to Homes project The birth of design through context and climate in the Arts and Crafts Movement is demonstrated by the shift in South African houses from boxy cottages to solar and nature oriented ribbon plans as demonstrated through the work of Helmut Stauch and Norman Eaton The dislocation of Arts and Crafts ideas to the Cape also demonstrated a limit to the valorising of vernacular architecture and its against

globalization building materials whereby English architects promoted Cape Dutch settler architecture and denigrated African vernacular architecture As a final genealogical strand the book demonstrates the coherence of moral instrumentality with the animism and affects potential of handmade buildings Written for academics students and researchers interested in architectural history it is an eye opening investigation into the role of architecture in society Notes and Queries ,1921
