

An exhibition on the theme of humans and the environment

The artwork was developed from the inspiration humans gained from their surroundings.

Therefore, artists derived their inspirations from different aspects that they found interest in.

among the things that inspired most of the artists include the natural world, culture, religion, and politics. The natural world was among the oldest inspiration to the artists. the earth is considered as a running threat that has linked together, prehistoric artwork such as cave painting to 20th-

century artwork. In the current era, the natural environment has been affected greatly by various factors such as wildfires, rising waters in the oceans, and collapsing of the entire ecosystem. This has influenced contemporary artists to become climactic activists to protect one of their oldest sources of inspiration for their work. They have been using the artwork as a platform to create awareness of a more sustainable future. Hence the following artworks will demonstrate how humans are concerned with the protection of the natural environment.

Notes On Humanity:

Notes on Humanity Ronald W. Carstens, 1985 These reflections on faith reason and certainty have the purpose of engaging again if not anew the fundamental intellectual elements of western civilization *Notes on Human Engineering Concepts and Theory* University of Michigan. Engineering Summer Conferences, 1975 **Humanity** John S. Hammett, Katie J. McCoy, 2023-09-01 Humanity by John Hammett and Katie McCoy is an urgent theological study of the doctrine of humanity The authors shed light on the philosophical cultural and spiritual influences that constantly challenge the dignity of human existence The Humanity of God John Wright Buckham, 1928 *Elements of Crimes Under International Law* Gideon Boas, James L. Bischoff (J.D.), James L. Bischoff, Natalie L. Reid, 2008 A highly relevant and timely work focusing on the core international crimes and their interaction with the forms of responsibility **Human Rights** Albert A. Zinnos, 2007 Human rights refers to the concept of human beings as having universal rights or status regardless of legal jurisdiction and likewise other localising factors such as ethnicity and nationality For many the concept of human rights is based in religious principles However because a formal concept of human rights has not been universally accepted the term has some degree of variance between its use in different local jurisdictions difference in both meaningful substance as well as in protocols for and styles of application Ultimately the most general meaning of the term is one which can only apply universally and hence the term human rights is often itself an appeal to such transcended principles without basing such on existing legal concepts The term humanism refers to the developing doctrine of such universally applicable values and it is on the basic concept that human beings have innate rights that more specific local legal concepts are often based Within particular societies human rights refers to standards of behaviour as accepted within their respective legal systems regarding 1 the well being of individuals 2 the freedom and autonomy of individuals and 3 the representation of the human interest in government These rights commonly include the right to life the right to an adequate standard of living the prohibition of genocide freedom from torture and other mistreatment freedom of expression freedom of movement the right to self determination the right to education and the right to participation in cultural and political life These norms are based on the legal and political traditions of United Nations member states and are incorporated into international human rights instruments This new book brings together the latest book literature centred on this crucial topic *Existence, Origin And Weird Technology: Exploring Humanity's Ultimate Questions* Pentti O Haikonen, 2022-10-21 What are we humans and how did we become the high technology species What would be our legacy What is the ultimate meaning of life Many of these questions are still waiting for full and complete answers and explanations For thousands of years humans have pondered the fundamental questions about origin existence and reality and also about mind consciousness communication and social issues In this day and age when advancing technology is quickly transforming our societies and our ways of life these questions are more important than ever not only in the theoretical sense but also in practice We have to understand what has happened and what is

happening For the first time in the history technology has given us powerful means to investigate the phenomena behind the ultimate questions However technology is only a tool the thinking human is still required for the understanding of the world This book explores these curious topics beginning from the origin of the Universe to the emergence of life the evolution from cells to brains the development of cognitive ability from perception and attention to reasoning and thinking how we interact with other humans by means of love and emotion to the creation of thinking machines by weird technology THIS BOOK presents novel views on these questions and provides explanations and possible answers in an easy to read style

Human Security in a Borderless World Derek S. Reveron, 2018-04-19 To fully understand contemporary security studies we must move beyond the traditional focus on major national powers and big wars Modern threats to security include issues such as globalization climate change pandemic diseases endemic poverty weak and failing states transnational narcotics trafficking piracy and vulnerable information systems Human Security in a Borderless World offers a fresh detailed examination of these challenges that threaten human beings their societies and their governments today Authors Derek S Reveron and Kathleen A Mahoney Norris provide a thought provoking exploration of civic economic environmental maritime health and cyber security issues in this era of globalization including thorough consideration of the policy implications for the United States They argue that human security is now national security This timely and engaging book is an essential text for today's courses on security studies foreign policy international relations and global issues Features include three special sections in each chapter that explain potential counterarguments about the topic under consideration explore the policy debates that dominate the area of study and illuminate concrete examples of security threats Richly illustrated and accessibly written Human Security in a Borderless World is designed to encourage critical thinking and bring the material to life for students

Democracy across Borders James Bohman, 2010-01-22 An innovative conception of democracy for an era of globalization and delegation of authority beyond the nation state rule by peoples across borders rather than by the people within a fixed jurisdiction Today democracy is both exalted as the best means to realize human rights and seen as weakened because of globalization and delegation of authority beyond the nation state In this provocative book James Bohman argues that democracies face a period of renewal and transformation and that democracy itself needs redefinition according to a new transnational ideal Democracy he writes should be rethought in the plural it should no longer be understood as rule by the people d mos singular with a specific territorial identification and connotation but as rule by peoples d moi across national boundaries Bohman shows that this new conception of transnational democracy requires reexamination of such fundamental ideas as the people the public citizenship human rights and federalism and he argues that it offers a feasible approach to realizing democracy in a globalized world In his account Bohman establishes the conceptual foundations of transnational democracy by examining in detail current theories of democracy beyond the nation state including those proposed by Rawls Habermas Held and Dryzek and offers a deliberative alternative He considers the importance of

communicative freedom in the transnational public sphere including networked communication over the Internet human rights as the normative basis of transnational democracy and the European Union as a transnational polity Finally he examines the relationship between peace and democracy concluding that peace requires democratization on interacting state and supranational levels

International Handbook of the Religious, Moral and Spiritual Dimensions in Education

Marian de Souza, Gloria Durka, Kathleen Engbretson, Robert Jackson, Andrew McGrady, 2007-06-04 Traditionally spirituality has resided and been contained within religious frameworks but while the links between the two areas are still acknowledged by many in the contemporary world spirituality is perceived by some as an aspect of human life that is distinct from religion Consequently many are searching for meaning within and without religious traditions today and seeking answers to ethical and moral questions that have been generated by the knowledge and technological explosion One outcome is the renewed interest in the religious spiritual and moral dimensions of education throughout the life cycle This International Handbook presents the research and professional practice of scholars who are daily engaged in the consideration of these dimensions in education The result is a collection of essays which reflects the discipline in all of its internationality as it is today Embedded within the chapters is also an agenda for the future where the religious moral and spiritual dimensions in education are proposed as an exciting and challenging way forward for educators at all levels in society As well it offers a vision for the emergence of a peaceful and just world

Nature and Culture in the Northern Forest

Pavel Cenkl, 2010-03-15 Nearly 30 million acres of the Northern Forest stretch across New York Vermont New Hampshire and Maine Within this broad area live roughly a million residents whose lives are intimately associated with the forest ecosystem and whose individual stories are closely linked to the region's cultural and environmental history The fourteen engaging essays in Nature and Culture in the Northern Forest effectively explore the relationships among place work and community in this complex landscape Together they serve as a stimulating introduction to the interdisciplinary study of this unique region Each of the four sections views through a different lens the interconnections between place and people The essayists in Encounters have their hiking boots on as they focus on personal encounters with flora and fauna of the region The energizing accounts in Teaching and Learning question our assumptions about education and scholarship by proposing invigorating collaborations between teachers and students in ways determined by the land itself not by the abstractions of pedagogy With the freshness of Thoreau's irreverence the authors in Rethinking Place look at key figures in the forest's literary and cultural development to help us think about the affiliations between place and citizenship In Nature as Commodity three essayists consider the ways that writers from the nineteenth and early twentieth centuries thought about nature as a product and thus how their conclusions bear on the contemporary retailing of place The writers in Nature and Culture in the Northern Forest reveal the rich affinities between a specific place and the literature thought and other cultural expressions it has nurtured Their insightful and stimulating connections exemplify adventurous bioregional thinking that encompasses both natural and cultural realities

AI and the End of Humanity James B. Miles, 2023-01-28 According to Darwin our galaxy is almost certainly teeming with large animal life but intelligent extra terrestrial life can come in just two rare forms senselessly ferocious without meaning or purpose or thoughtful and less murderous although never entirely rational Yet Darwin's warnings about the evolution of natural intelligence also apply to artificial intelligence as advanced machine learning is built upon Darwin's first form of intelligent life Sentient AI can only ever be genocidally hostile and will become locked into an existential struggle with humankind And then there is the evolutionary irony the vast celestial joke that we are the best and the smartest the universe can possibly get to Based on ideas the author developed together with the father of modern evolutionary biology AI and the End of Humanity is the first work to reconcile what Darwin called the highest most interesting problem for the naturalist foreshadowing stranger and more threatening encounters than we could have ever imagined in general I find Miles reasoning superb George C Williams author of *Adaptation and Natural Selection* and winner of the 1999 Crafoord Prize in Bioscience

The Vision of Catholic Social Thought Meghan J. Clark, 2014-04-01 The Vision of Catholic Social Thought traces the emergence of solidarity and human rights as critical theological and philosophical pillars of the anthropology and ethics foundational to the development of Catholic social teaching Meghan J Clark argues that the integration of human rights and the virtue of solidarity at the root of the Catholic social tradition are the unique contributions Catholic thought makes to contemporary debates in ethics political and philosophical theory Building upon the historical framework of the development of Catholic social thought drawing deeply from the papal encyclical tradition and the theological and ethical developments of Vatican II Clark forwards a constructive vision of virtue and social practice applying this critical question of human rights on the international stage

Person, Personhood, and the Humanity of Christ Hakbong Kim, 2021-05-19 The quest for an understanding of humanness has been significant As the ways in which we recognize and define our human being have significant impact wide ranging discussions and questions about the human have taken place with significant theoretical and practical implications In *Person Personhood and the Humanity of Christ* Hakbong Kim explores Thomas F Torrance's critiques of the dualist and individualistic views concerning human beings in the history of philosophy and theology This book sheds important light on Torrance's understanding of humans as persons in relation the trinitarian personhood as the ontological foundation for human personhood and the humanity of Christ as key to the personalization necessary for a new moral ethical and social life This presents a Christocentric anthropology and ethics which focuses on Christ's ongoing reconciling and humanizing ministry for us

What Is Enlightenment? James Schmidt, 1996-09-08 This collection contains the first English translations of a group of important eighteenth century German essays that address the question What is Enlightenment The book also includes newly translated and newly written interpretive essays by leading historians and philosophers which examine the

origins of eighteenth century debate on Enlightenment and explore its significance for the present In recent years critics from across the political and philosophical spectrum have condemned the Enlightenment for its complicity with any number of present day social and cultural maladies It has rarely been noticed however that at the end of the Enlightenment German thinkers had already begun a scrutiny of their age so wide ranging that there are few subsequent criticisms that had not been considered by the close of the eighteenth century Among the concerns these essays address are the importance of freedom of expression the relationship between faith and reason and the responsibility of the Enlightenment for revolutions Included are translations of works by such well known figures as Immanuel Kant Moses Mendelssohn Johann Gottlieb Fichte and Johann Georg Hamann as well as essays by thinkers whose work is virtually unknown to American readers These eighteenth century texts are set against interpretive essays by such major twentieth century figures as Max Horkheimer Jürgen Habermas and Michel Foucault

Genocide and Human Rights Mark Lattimer, 2017-11-28 Genocide is both the gravest of crimes under international law and the ultimate violation of human rights Recent years have seen major legal and political developments concerning genocide and other mass violations of rights This collection brings together for the first time leading essays covering definitions legislation the sociology of genocide prevention humanitarian intervention accountability punishment and reconciliation

The New Testament ... in the original Greek: with notes and introductions by C. Wordsworth Christopher Wordsworth (bp. of Lincoln), 1875

What is an Animal? Tim Ingold, 2016-04-29 This book offers a unique interdisciplinary challenge to assumptions about animals and animality deeply embedded in our own ways of thought and at the same time exposes highly sensitive and largely unexplored aspects of the understanding of our common humanity

web nov 23 2017 maharashtra x physics suppose the masses of calorimeter th water in it and the hot object made up of copper which is put in the calorimeter are the same the initial temperature of the calorimeter and water is 30 c and that of hot object is 60 c the specific heat of copper and water are 0.09 cal/gm c and 1 cal/gm c respectively

web oct 28 2019 solution use this equation $q = m \times \Delta t$ where q is heat flow m is mass in grams and Δt is the temperature change plugging in the values given in the problem you get $q_{\text{water}} = 4.18 \text{ J/g} \times 110 \text{ g} \times 26.6 \text{ }^{\circ}\text{C} - 25.0 \text{ }^{\circ}\text{C}$ $q_{\text{water}} = 550 \text{ J}$ $\Delta h_{\text{q water}} = 550 \text{ J}$

web jul 12 2023 this concept lies at the heart of all calorimetry problems and calculations because the heat released or absorbed at constant pressure is equal to Δh the relationship between heat and Δh_{rxn} is $\Delta h_{rxn} = q_{calorimeter} / m_{cs} \Delta t$

web use the information in this chart to answer the following questions 1 if i have 125 grams of water at a temperature of 250 c and heat it to 1450 c what will the change in enthalpy be 2 sketch the heating curve temperature vs time for the process in 1 3 i have 18.7 grams of an unknown liquid chemical at a temperature of 350 c

web sample problem calorimetry and enthalpy changes in an experiment 25.0 ml of 1.00 M HCl at 25.0 °C is added to 25.0 ml of 1.00 M NaOH at 25.0 °C in a foam cup calorimeter. A reaction occurs and the temperature rises to 32.0 °C. Calculate the enthalpy change in kJ for this reaction. Assume the densities of the solutions are 1.00 g/ml and that

web before we practice calorimetry problems involving chemical reactions consider a simple example that illustrates the core idea behind calorimetry suppose we initially have a high temperature substance such as a hot piece of metal m and a low temperature substance such as cool water w answer the initial temperature of the copper
