

Reading is a complex cognitive process of decoding symbols in order to construct or derive meaning (reading comprehension). It is a means of language acquisition, of communication, and of sharing information and ideas. Like all language, it is a complex interaction between the text and the reader which is shaped by the reader's prior knowledge, experiences, attitude, and language community which is culturally and socially situated. The reading process requires continuous practice, development, and refinement.

Developmental reading is a systematic instruction in reading skills strategies and it's include spelling and pronunciation.

Why Is Reading Important?

1. Reading is fundamental to function in today's society. There are many adults who cannot read well enough to understand the instructions on a medicine bottle. That is a scary thought - especially for their children. Filling out applications becomes impossible without help. Reading road or warning signs is difficult. Even following a map becomes a chore. Day-to-day activities that many people take for granted become a source of frustration, anger and fear.

2. Reading is a vital skill in finding a good job. Many well-paying jobs require reading as a part of job performance. There are reports and memos which must be read and responded to. Poor reading skills increases the amount of time it takes to absorb and react in the workplace. A person is limited in what they can accomplish without good reading and comprehension skills.

3. Reading is important because it **develops the mind**. The mind is a muscle. It needs exercise. Understanding the written word is one way the mind grows in its ability. Teaching young children to read helps them develop their language skills. It also helps them learn to listen. Everybody wants to talk, but few can really listen. Lack of listening skills can result in major misunderstandings which can lead to job loss, marriage breakup, and other disasters - small and great. Reading helps children (and adults) focus on what someone else is communicating.

4. Why is reading important? It is how we **discover new things**. Books, magazines and even the Internet are great learning tools which require the ability to read and understand what is read. A person who knows how to read can educate themselves in any area of life they are interested in. We live in an age where we overflow with information, but reading is the main way to take advantage of it.

5. **Reading develops the imagination**. TV and computer games have their place, but they are more like amusement. Amusement comes from two words "a" [non] and "muse" [think]. Amusement is non-thinking activities. With reading, a person can go anywhere in the world...or even out of it! They can be a king, or an adventurer, or a princess, or... The possibilities are endless. Non-readers never experience these joys to the same extent.

6. In line with the above, reading develops the creative side of people. When reading to children, stop every once in awhile and ask them what they think is going to happen next. Get them thinking about the story. When it is finished, ask if they could think of a better ending or anything that would have improved it. If they really liked the story, encourage them to illustrate it with their own drawings or to make up a different story with the same characters. Get the creative juices flowing!

7. Reading is fundamental in developing a good self image. Nonreaders or poor readers often have low opinions of themselves and their abilities. Many times they feel as if the world is against them.
