Nuclear Deterrence Ethics And Strategy:

Nuclear Deterrence Russell Hardin, 1985-01 *Ethics and Strategic Defense* Douglas P. Lackey, 1989 *Energy Abstracts for Policy Analysis*, 1987 Ecoviolence and the Law: Supranational Normative Foundation of Ecocrime Laura Westra, 2021-11-22 Exploring such acts of environmental violence as ecocrimes the author builds the case that the international law principles of jus cogens and erga omnes justify characterizing ecocrime as a just crime requiring action to curb their occurrence and punishment to deter them The book discusses the obstacles that defining environmental assaults as ecocrimes will face both in national and international circumstances The author concludes by proposing the creation of an International Environmental Court that would adjudicate ecocrime issues This forward thinking work will be of great interest to all involved in the human rights issues of environmental threats Published under the Transnational Publishers imprint

Ethics, Nuclear Deterrence, and War Jack N. Barkenbus, 1992 The Logic of Internationalism Kjell Goldmann, 2002-11 Is internationalism plausible in today's world or must global relations be characterised by tension and war The author analyses internationalism's coercive and accommodative dimensions and considers practical problems WAR, PEACE AND VICTORY: STRATEGY AND STATECRAFT FOR THE NEXT CENTURY Colin S. Gray, 1991-06-15 From Simon Schuster War Peace and Victory is Colin S Gray's exploration of strategy and statecraft for the next century In War Peace and Victory Colin S Gray shows how geography technology history and national culture shape government policy and explains how nations pursue their strategic interests in times of peace **Perspectives on Strategy** Colin S. Gray, 2013-03-28 Perspectives on Strategy examines in depth five aspects of strategy from the perspectives of intellect morality culture geography and technology The author asks and answers the most challenging and rewarding questions that can be posed in order to reveal the persisting universal nature but ever changing character of strategy *Fighting to the End* C. Christine Fair, 2014-04-25 Since Pakistan was founded in 1947 its army has dominated the state The military establishment has locked the country in an enduring rivalry with India with the primary aim of wresting Kashmir from it To that end Pakistan initiated three wars over Kashmir in 1947 1965 and 1999 and failed to win any of them Today the army continues to prosecute this dangerous policy by employing non state actors under the security of its ever expanding nuclear umbrella It has sustained a proxy war in Kashmir since 1989 using Islamist militants as well as supporting non Islamist insurgencies throughout India and a country wide Islamist terror campaign that have brought the two countries to the brink of war on several occasions In addition to these territorial revisionist goals the Pakistani army has committed itself to resisting India's slow but inevitable rise on the global stage Despite Pakistan's efforts to coerce India it has achieved only modest successes at best Even though India vivisected Pakistan in 1971 Pakistan continues to see itself as India's equal and demands the world do the same The dangerous methods that the army uses to enforce this self perception have brought international opprobrium upon Pakistan and its army And in recent years their erstwhile proxies have turned their guns on the Pakistani state itself Why does the

army persist in pursuing these revisionist policies that have come to imperil the very viability of the state itself from which the army feeds In *Fighting to the End* Christine Fair argues that the answer lies at least partially in the strategic culture of the army Through an unprecedented analysis of decades worth of the army's own defense publications she concludes that from the army's distorted view of history it is victorious as long as it can resist India's purported drive for regional hegemony as well as the territorial status quo Simply put acquiescence means defeat *Fighting to the End* convincingly shows that because the army is unlikely to abandon these preferences Pakistan will remain a destabilizing force in world politics for the foreseeable future

Strategy and Ethnic Conflict Laure Paquette, 2002-02-28 Ethnic conflict now presents the thorniest problems for military and civilian strategists of all stripes This book presents a new general theory of strategy encompassing studies of the relationship between values interest and strategy as these relate to ethnic conflicts It focuses on the relationship between values and strategy building a theory on the hypothesis that national values influence national strategy Paquette's research reveals that national values influence national strategy through three mechanisms cognition appreciation and evaluation Each mechanism and indeed the whole value focused approach to strategic thinking is described using a network of interrelated statements Paquette develops a methodology specific to the issues of international security and ethnic considerations She tests this theory extensively for internal consistency before applying it to a single historical case French decision making on national strategy between 1955 and 1970 however because of its generality this same theory could easily be applied to other cases As with any theory it is possible to vary successively or simultaneously assumptions or conditions and to derive new predictions This process of deriving variations has the potential to help in the training of strategists both military and civilian

Desiring the Bomb Calum Lister Matheson, 2018-11-13 A timely interdisciplinary study that applies psychoanalysis and the rhetorical tradition of the sublime to examine the cultural aftermath of the Atomic Age Every culture throughout history has obsessed over various end of the world scenarios The dawn of the Atomic Age marked a new twist in this tale For the first time our species became aware of its capacity to deliberately destroy itself Since that time the Bomb has served as an organizing metaphor a symbol of human annihilation a stand in for the unspeakable void of extinction and a discursive construct that challenges the limits of communication itself The parallel fascination with and abhorrence of nuclear weapons has metastasized into a host of other end of the world scenarios from global pandemics and climate change to zombie uprisings and asteroid collisions *Desiring the Bomb* Communication Psychoanalysis and the Atomic Age explores these world ending fantasies through the lens of psychoanalysis to reveal their implications for both contemporary apocalyptic culture and the operations of language itself What accounts for the enduring power of the Bomb as a symbol What does the prospect of annihilation suggest about language and its limits Thoroughly researched and accessibly written this study expands on the theories of Kenneth Burke Jacques Lacan Sigmund Freud and many others from a variety of disciplines to arrive at some answers to these questions Calum L Matheson undertakes a series of case studies including the

Trinity test site nuclear war games urban shelter schemes and contemporary survivalism and argues that contending with the anxieties individual social cultural and political born of the Atomic Age depends on rhetorical conceptions of the real an order of experience that cannot be easily negotiated in language Using aspects of media studies rhetorical theory and psychoanalysis the author deftly engages the topics of Atomic Age survival extinction religion and fantasy along with their enduring cultural legacies to develop an account of the Bomb as a signifier and to explore why some Americans have become fascinated with fantasies of nuclear warfare and narratives of postapocalyptic rebirth Special Bibliography Series ,1957

The War That Must Not Occur Jean-Pierre Dupuy, 2023-09-19 The possibility of a nuclear war that could destroy civilization has influenced the course of international affairs since 1945 suspended like a sword of Damocles above the heads of the world's leaders The fact that we have escaped a third world war involving strategic nuclear weapons indeed that no atomic weapon of limited power has yet been used under battlefield conditions seems nothing short of a miracle Revisiting debates on the effectiveness and ethics of nuclear deterrence Jean Pierre Dupuy is led to reformulate some of the most difficult questions in philosophy He develops a counterintuitive but powerful theory of apocalyptic prophecy once a major catastrophe appears to

be possible one must assume that it will in fact occur Dupuy shows that the contradictions and paradoxes riddling discussions of deterrence arise from the tension between two opposite conceptions of time one in which the future depends on decisions and strategy and another in which every occurring event is one that could not have failed to occur Considering the immense destructive power of nuclear warheads and the almost unimaginable ruin they are bound to cause Dupuy reaches a provocative conclusion whether they bring about good or evil does not depend on the present or future intentions of those who are in a position to use them The mere possession of nuclear weapons is a moral abomination
