**European Security** Thomas Jäger, Gerhard Kümmel, 2016-07-27

The authors of this collection combine different national and institutional perspectives. They cover a broad range of subjects: new threats to Europe's security, the advantages and disadvantages of the present security architecture in Europe, the problem of nuclear weapons and their control, the options for enlargement and partnership for peace, the shifts in Europeans' public opinion about security matters and the prospects for a European defence industry. This collection provides an incomparable synthesis of some of the most crucial problems for the emergence of Europe as an independent actor in international politics.

**Nuclear Weapons and European Security**, 1996

*European Security since the Fall of the Berlin Wall* Frederic Merand, Martial Foucault, Bastien Irondelle, 2011-02-05

There have been dramatic changes to the landscape of European security in the twenty years since the fall of the Berlin Wall. The essays in *European Security Since the Fall of the Berlin Wall* collectively take stock of how approaches to security in Europe have changed both in practice and in theory since the end of the Cold War. Organized into three sections, this collection begins with an exploration of the broad changes in Europe's security environment relating to issues such as terrorism and the rising importance of energy security. The second section describes the adaptations of Europe's institutional framework including the transformation of NATO and the evolution of European armed forces, while the closing essays examine regional security issues with the Middle East, the Balkans and Russia. Covering a broad spectrum of theoretical approaches and written in a clear, engaging style, *European Security Since the Fall of the Berlin Wall* will illuminate European security debates for years to come.

*The New European Security Disorder* S. Duke, 1994-10-07

The *New European Security Disorder* presents a clear and comprehensive overview of the main actors, institutions and changes in European security since the end of the Cold War. Special emphasis is put on the assessment of threats to Europe's security, the lack of coherent leadership in Bosnia and elsewhere, and the need for pan-European security institutions.

*The Dynamics of European Security Cooperation, 1945-91* Gülnur Aybet, 2016-01-12

This is the first integrated analysis of all aspects of security cooperation in western Europe from 1945 to 1991. It provides an accessible yet sophisticated survey of the wider dynamics of security cooperation in each decade throughout this period. It covers all aspects of security cooperation which range from the political, such as a European voice in arms control, to military, such as a European input into NATO strategy, and economic, involving collaboration in defence technology and production.

Reforging European Security Kurt Gottfried, Paul Bracken, 2019-06-26

This book provides some answers to the questions of how to pursue the build down of the East-West military confrontation in Europe and of how to build up an enduring and effective security system for Europe. It is the result of a three-year study of European security affairs.

**Britain, Germany and the New European Security Debate** Oliver

Ramsbotham,1991      European Security Bjørn Møller,2016-04-22 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it      Emerging Dimensions of European Security Policy Wolfgang F. Danspeckgruber,2019-04-08 This book represents an overview of European security affairs as of 1989 1990 It deals with fundamental theoretical and political strategic considerations looks at arms control developments and examines European defense economies and military industrial capabilities of U S      European Security in the 1990s W. Laqueur,L. Sloss,2013-11-11 Rarely if ever have the political economic and military foundations of the Western Alliance been in such a state of flux Walter Laqueur and Leon Sloss therefore deserve credit not just for the quality of the analysis in this superb book but also for the timeliness of its appearance As Laqueur says in his chapter Touring the Western European Defense Horizon if the likely development of European defense policies is not particularly reassuring at least it gives no grounds for despair The list of problems we face is a daunting one First there is the spiralling cost of defense expenditures particularly in the absence of significant NATO or inter European cooperation This is particularly serious in light of the reluctance to increase or even maintain current expenditures in the midst of Mikhail Gorbachev's peace offensive and the extraordinary changes in Eastern Europe both of which have had a dramatic impact on Western public opinion There is also a problem in the perceived relative economic decline of the United States vis a vis Western Europe and Japan which only exacerbates calls to reduce the number of American troops in Europe Other dangers to the political cohesion and military credibility of the

alliance include demographic trends that threaten current manpower levels transatlantic acrimony over the burden sharing issue and political pressures particularly in West Germany toward denuclearization and even neutralism *EU Security Strategies* Spyros Economides, James Sperling, 2017-12-06 This volume offers a coherent analysis of the European Union's security strategies within a comparative framework If the EU is to survive and prosper as an effective security actor it requires that greater attention be devoted to taking a cohesive and common position on the relationship between EU foreign policy means and goals The major claim of this edited collection is that there is a European grand security strategy that disciplines member state security strategies That grand strategy has two distinct substantive goals 1 the preservation and expansion of the EU system of security governance and 2 the implementation of specific strategies to meet internal and external threats and sources of insecurity The EU has sought to develop a grand security strategy that not only accounts for the proliferation of threats possessing a military or non military character and differentiates between core and peripheral regions of interest but also addresses the requirements to bridge the increasingly blurred boundary between internal and external security threats and the necessary reconciliation of the competing security preferences of its member states The empirical contributions to this volume examine the EU security strategies for specific issue areas and regional threat complexes These case studies assess whether and how those strategies have consolidated or expanded the EU system of security governance as well as their successes and limitations in meeting the security threats confronting the EU and its member states This volume will be of great interest to students of EU policy foreign policy security studies and IR
