Nuclear Weapons in a Transformed World Michael J. Mazarr, 1997 Nuclear Weapons in a Transformed World sets out to examine one of the most pressing issues of the twenty first century the future of nuclear weapons Acknowledging the growing consensus that pushing nuclear weapons to the margins of world politics would represent the wisest political and moral choice for the United States a stellar group of scholars has been assembled in this volume to analyze one solution to the problem virtual nuclear arsenals First proposed by Jonathan Schell in his 1984 book *The Abolition* this option involves removing all nuclear weapons from operational status and placing them in a dismantled virtual condition Essays by many of the world s top experts on arms control and international relations combine to offer the first detailed assessment of what may be the most promising and provocative idea in the field today Thorough balanced and probing *Nuclear Weapons in a Transformed World* opens the debate on a concept which could possibly determine the future of arms control and US policy

*Global Nuclear Disarmament* Nik Hynek, Michal Smetana, 2015-12-22 This book examines the issue of nuclear disarmament in different strategic political and regional contexts This volume seeks to provide a rich theoretical and practical insight to one of the major topics in the field of international security global abolishment of nuclear weapons Renewed calls for a nuclear weapons free world have sparked a wide academic debate on both the attainability of such goal and the steps that should be taken Comparably less attention however has been paid to theoretically informed considerations of the consequences of nuclear abolition Comprising essays from leading scholars and experts within the field this collection discusses the fundamental theoretical and conceptual foundations of nuclear disarmament and subsequently tries to assess its hypothetical impact in global and regional contexts The varied methodological approach of the contributors aims to advance a multi theoretical and multi perspectival view of the issue The book is organized in three main sections Strategic Perspectives dealing with the specific constraints and facilitators for the states to achieve their core objectives Political Perspectives with the focus on the power of norms belief systems and ideas and Regional Perspectives with the analyses of seven regional and or state specific nuclear contexts As a whole the volume provides a detailed complex overview of the risks and opportunities that are embedded in the vision of a nuclear weapon free world This book will be of great interest to students of nuclear proliferation arms control war and conflict studies international relations and security studies *The Politics of Nuclear Weapons* Andrew Futter, 2020-11-23 This comprehensively updated second edition provides an introduction to the political normative technological and strategic aspects of nuclear weaponry It offers an accessible overview of the concept of nuclear weapons outlines how thinking about these weapons has developed and considers how nuclear threats can continue to be managed in the future This book will help you to understand what nuclear weapons are the science behind their creation and operation why states build them in the first place and whether it will be possible for the world to banish these weapons entirely Essential reading for all students of International Relations Security Studies and

Military History      *Minimum Deterrence and India's Nuclear Security* Rajesh M. Basrur, 2009 In this book the leading authority on India's nuclear program offers an informed and thoughtful assessment of India's nuclear strategy Basrur shows that the country's nuclear culture is generally in accord with the principle of minimum deterrence but sometimes drifts into a more open ended view      *The Second Nuclear Age* Colin S. Gray, 1999 The author takes issue with the complacent belief that a happy mixture of deterrence arms control and luck will enable humanity to cope adequately with weapons of mass destruction arguing that the risks are ever more serious      **Stable Nuclear Zero** Sverre Lodgaard, 2016-08-12 This volume examines the conditions necessary for a stable nuclear weapons free world and the implications for nuclear disarmament policy The Nuclear Non Proliferation Treaty NPT is a road map to nuclear zero but it is a rudimentary one and it says nothing about the kind of zero to aim for Preferably this would be a world where the inhibitions against reversal are strong enough to make it stably non nuclear What then are the requirements of stable zero The literature on nuclear disarmament has paid little attention to this question By and large the focus has been on the next steps and discussions tend to stop where the NPT stops with the elimination of the weapons This book seeks to fill a lacuna by examining the requirements of stable zero and their implications for the road map to that goal starting from the vision to the present day The volume highlights that a clear conception of the goal not only is important in itself but can shed light on what kind of disarmament process to promote This book will be of much interest to students of nuclear proliferation global governance security studies and IR      **Nuclear Proliferation and International Order** Olav Njølstad, 2010-09-13 Draws on papers originally presented at Nobel Symposium 142 on Peace stability and nuclear order theoretical assumptions historical experiences future challenges The conference took place at Oscarsborg on 25-27 June 2009 and gathered close to 30 international experts Page xii xiii      **Mass and Elite Views on Nuclear Security: General public** Kerry G. Herron, 2000      **The Russian Armed Forces at the Dawn of the Millennium**, 2000 This anthology is an outgrowth of a conference titled The Russian Armed Forces at the Dawn of the Millennium held at the Collins Center of the Army War College's Center for Strategic Leadership from 7 through 9 February 2000 The genesis for the conference was the realization by several members of the staff of the Collins Center and Army War College faculty that the U S led NATO operation in Kosovo resulted in a significant shift of Russian views on the United States and NATO The conference also complemented our general objective of examining the changing environment in which the United States including its armed forces finds itself The conference brought together over 50 individuals from academia and the policy and intelligence communities to examine the current state of the Russian military Focusing primarily on the socio political dimension of the military but not ignoring the military technical dimension the presentations delivered during the conference looked at Russia's domestic environment the state of the military perceived threats and Russia's capacity to generate responses to those threats DTIC web site      *Russian Military Reform, 1992-2002* Anne C. Aldis, Roger N. McDermott, 2004-11-23 Military reform has featured prominently on the agenda of many countries since the end of the

Cold War necessitated a re evaluation of the strategic role of the armed forces and nowhere more publicly than in Russia Not since the 1920s have the Russian Armed Forces undergone such fundamental change President Boris Yeltsin and his successor Vladimir Putin have both grappled with the issue with varying degrees of success An international team of experts here consider the essential features of Russian military reform in the decade since the disintegration of the USSR Fluctuations in the purpose and priorities of the reform process are traced as well as the many factors influencing change Chapters analyse the development of Russia s security policy structural reform of the services the social impact of military service and experience of military conflict in Chechnya Critical evaluations of the impact of social change on the Russian Armed Forces capabilities and expectations complement the analysis of the on going debate Russian Military Reform 1992 2002 will prove invaluable to all those interested in civil military relationships and international security as well as to students of military theory and practice

**Deterrence**  
George P. Shultz, Sidney D. Drell, James E. Goodby, 2013-09-01 Drawn from the third in a series of conferences the Hoover Institution at Stanford University on the nuclear legacy of the cold war this report examines the importance of deterrence from its critical function in the cold war to its current role Recognizing that today s international environment is radically different from that which it was during the cold war the need is pressing to reassess the role of nuclear weapons in deterrence in the world of today and to look ahead to the future

**Constructing Regional Security** W. Durch, 2016-04-30 In this book William Durch examines conventional weapons proliferation since World War II the role of arms transfers in fueling regional conflict and prospects for curbing the global arms trade Noting that supply side arms control efforts which seek to constrain the companies and countries that produce and distribute major conventional weapons have a poor international track record Durch argues for a broader approach that tries to get at the demand side of the equation

Addressing the political and regional dynamics that impel arms acquisitions he looks at how arms control might be combined with confidence and security building measures to contain demand and how value based arms trade control measures like codes of conduct could be implemented in stepwise fashion consistent with US national interests in regional stability **U.S. Army War College Guide to Strategy , Strategy for Chaos** Colin Gray,2004-08-02 In this volume Professor Colin Gray develops and applies the theory and scholarship on the allegedly historical practice of the Revolution in Military Affairs RMA in order to improve our comprehension of how and why strategy works The author explores the RMA hypothesis both theoretically and historically The book argues that the conduct of an RMA has to be examined as a form of strategic behaviour which means that of necessity it must work as strategy works The great RMA debate of the 1990s is reviewed empathetically though sceptically by the author with every major school of thought allowed its day in court The author presents three historical RMAs as case studies for his argument those arguably revealed in the wars of the French Revolution and Napoleon in World War I and in the nuclear age The focus of his analysis is how these grand RMAs functioned strategically The conclusions that he draws from these empirical exercises are then applied to help us understand what indeed is and what is not happening with the much vaunted information technology led RMA of today **Realism and Fear in International Relations** Arash Heydarian Pashakhanlou,2016-12-08 This book examines the fascinating story of how the chief architects of realism Hans Morgenthau Kenneth Waltz and John Mearsheimer dealt with some of the most pressing political issues of our time through the lenses of fear Pashakhanlou conducts the most comprehensive evaluation of their works to date comprising of a meticulous analysis of 400 of their publications As such this book is an invaluable resource for practitioners students and concerned citizens that seek to understand how three of the most influential International Relations scholars thought about the implications of fear at the global level In this important book the author gets to the heart of the underlying emotional condition on which so much rational political thought in International Relations is built By uncovering the role of fear within the modern classics of realism the book sheds light on the role that fear plays in producing otherwise rational decision making David Galbreath Professor of International Security University of Bath UK The role played by fear in Realist international theory is under explored and poorly theorised This book addresses this lacuna and provides a thorough and systematic analysis of the significance of fear in Realism In doing so Arash Heydarian Pashakhanlou makes a major contribution to International Relations theory and the emotional turn in the study of contemporary international politics Adrian Hyde Price Professor of International Politics Gothenburg University Sweden **The Politics of Weapons Inspections** Nathan E. Busch,Joseph F. Pilat,2017-03-21 Given recent controversies over suspected WMD programs in proliferating countries there is an increasingly urgent need for effective monitoring and verification regimes the international mechanisms including on site inspections intended in part to clarify the status of WMD programs in suspected proliferators Yet the strengths and limitations of these nonproliferation and arms control mechanisms remain unclear How should these

regimes best be implemented What are the technological political and other limitations to these tools What technologies and other innovations should be utilized to make these regimes most effective How should recent developments such as the 2015 Iran nuclear deal or Syria's declared renunciation and actual use of its chemical weapons influence their architecture The Politics of Weapons Inspections examines the successes failures and lessons that can be learned from WMD monitoring and verification regimes in order to help determine how best to maintain and strengthen these regimes in the future In addition to examining these regimes technological political and legal contexts Nathan E Busch and Joseph F Pilat reevaluate the track record of monitoring and verification in the historical cases of South Africa Libya and Iraq assess the prospects of using these mechanisms in verifying arms control and disarmament and apply the lessons learned from these cases to contemporary controversies over suspected or confirmed programs in North Korea Iran and Syria Finally they provide a forward looking set of policy recommendations for the future

*Kenneth Waltz* Paul R. Viotti, 2024-04-02 Kenneth Waltz 1924-2013 is perhaps the most enduringly influential figure in international relations theory of the second half of the twentieth century He is considered the father of the structural realist or neorealist school and his views on core questions such as the causes of war and the structure of the international system are foundational to the field today and likely will remain so for decades to come Waltz's writings on both theoretical and policy related topics from the balance of power to the spread of nuclear weapons continue to fuel debate This book is a groundbreaking intellectual biography of Kenneth Waltz shedding new light on the development and significance of his key contributions Paul R Viotti draws on extensive candid interviews with Waltz as well as Waltz's personal files and archival research to provide a nuanced account of the great scholar's life and thought He traces the intellectual sources and personal experiences that shaped Waltz's work including an intense Lutheran upbringing service in World War II and the Korean War and the academic environments of Oberlin College Columbia University and the University of California Berkeley Viotti examines the key influences on Waltz's major works *Man the State and War* and *Theory of International Politics* and analyzes their distinctive insights Engaging with the views of Waltz's critics and featuring reminiscences from his colleagues this book is a compelling portrait of an intellectual titan

**From Lambs to Lions** Thomas Preston, 2009-03-16 While many books discuss how nations can prevent the proliferation of biological and nuclear weapons this unique and controversial volume begins with the premise that these weapons will certainly multiply despite our desperate desire to slow this process How worried should we be and what should we do In *From Lambs to Lions* Thomas Preston examines current trends in the proliferation of nuclear and biological weapons capabilities know how and technologies for both state and non state actors and then projects these trends over the coming ten to fifteen years to assess how they might impact existing security relationships between states With a new preface to the paperback edition Thomas Preston also addresses the threat of biological and nuclear weapons proliferation that faces the Obama administration How might a nuclear North Korea or Iran constrain U S freedom of action in its foreign or military policies How might U S security

be impacted by the current biotechnical revolution and spread of bioweapons know how to opponents How might terror groups like Al Qaeda make use of such weapons in future attacks against the United States or its allies around the world These are the central most fundamental questions facing American security policy over the coming decades and to ignore them is to put ourselves at risk for new 9 11 style surprises For answers and for some potentially surprising reassurances this clear and informative book will be invaluable

**The Myth of the Nuclear Revolution** Keir A. Lieber, Daryl G. Press, 2020-06-15

Leading analysts have predicted for decades that nuclear weapons would help pacify international politics The core notion is that countries protected by these fearsome weapons can stop competing so intensely with their adversaries they can end their arms races scale back their alliances and stop jockeying for strategic territory But rarely have theory and practice been so opposed Why do international relations in the nuclear age remain so competitive Indeed why are today's major geopolitical rivalries intensifying In *The Myth of the Nuclear Revolution* Keir A. Lieber and Daryl G. Press tackle the central puzzle of the nuclear age the persistence of intense geopolitical competition in the shadow of nuclear weapons They explain why the Cold War superpowers raced so feverishly against each other why the creation of mutual assured destruction does not ensure peace and why the rapid technological changes of the 21st century will weaken deterrence in critical hotspots around the world By explaining how the nuclear revolution falls short Lieber and Press discover answers to the most pressing questions about deterrence in the coming decades how much capability is required for a reliable nuclear deterrent how conventional conflicts may become nuclear wars and how great care is required now to prevent new technology from ushering in an age of nuclear instability
