**The Nuclear Predicament** Stephen Shenfield, 2020-11-19 Ideological debate is one component of the intellectual background to Soviet policy making Originally published in 1987 this paper explores how Soviet writers wrestle with the challenge to their ideology that is posed by the threat of nuclear war What for example is the relationship between the values of peace and of socialism What drives the arms race Is capitalism inherently militaristic or is a demilitarized capitalism conceivable Is the outcome of history predetermined or open It is shown that the range of permissible views is wider than often assumed and that the constraints of Soviet ideology do not exclude evolution towards a more cooperative approach to international security     Nuclear predicament: Exploration in soviet ideology Stephen Shenfield, 1987     **National**

**Security and International Relations (Routledge Revivals)** Peter Mangold, 2013-10-14 First published in 1990 National Security and International Relations provides a concise analysis of the problem of national security in the twentieth century It examines the criteria by which states decide what level of security they want to seek in an uncertain and essentially Hobbesian world and why some states tend to underinsure while obsessively insecure states overinsure frequently making others more insecure in the process In the wake of two world wars and the threat of nuclear destruction Peter Mangold argues that war was becoming as much a source of insecurity as the intentions of other states It then explores the different approaches attempted during the twentieth century to ameliorate or ideally escape from the security dilemma These range from international regimes to the restructuring of the international politics of Western Europe so as to substitute cooperation for conflict and U S and Soviet attempts to render nuclear competition safer through arms control and confidence building measures Of special value to students of International Relations and Strategic Studies this book will also interest those keen to understand the challenges embodied in Gorbachev's new thinking in foreign policy     *Neorealism Versus Strategic Culture* John Glenn, 2018-01-18 The debate between Neorealists and Strategic Culturalists centres on whether it is possible to explain predict state behaviour without taking into account the particular characteristics of the state such as its historical experiences geographical context and cultural constitution This informative debate is encapsulated in the first section of the book which considers the theoretical issues raised by both Neorealism and Strategic Culture These issues are then explored in the second section by assessing their relevance to six country case studies Australia Germany India Japan Nigeria and Russia     Military Power in Europe Lawrence Freedman, 1990-06-18 These essays illuminate different aspects of military power and European security It deals with the practicalities of planning and command within an alliance structure or the problems connected and with distinguishing between offensive and defensive operations for purposes of arms control
