Nuclear Proliferation Problems:

The comparative analysis of the solutions to the problem of nuclear proliferation Paul Shoust, 2010-12-07
Research Paper undergraduate from the year 2010 in the subject Politics Topic Peace and Conflict Security grade Good
European University at St Petersburg course Security and Disarmament in Europe language English abstract The world has not become safer in the 21st century But there is only limited number of really global threats Those include inter alia international terrorism climate change and the issue of nuclear proliferation In its Resolution on the Convention on the Prohibition of Use of Nuclear Weapons the UN General Assembly underlined that the use of nuclear weapons poses the most serious threat to the survival of mankind But despite a nearly universal recognition of the threat posed by the mere existence of the nuclear arsenals the issue of further nuclear proliferation among the members of the international community is yet to be solved In this paper we attempt to conduct a comparative analysis of possible approaches to the issue of nuclear proliferation The goal of the research however is not the elaboration of practical solution of the issue We will focus on the conceptual value of the one or another option instead The aim is to define main dimensions of the problem that can be faced by the international community be it in the universal fora e g the UN General Assembly or in the exclusive clubs the UN Security Council First part will be dedicated to the theoretical approaches that may be employed in the research Also the framework for the comparative analysis per se will be defined In the second part of the paper we will focus on the determination of factors that should be taken into account during the comparative evaluation of the solutions In the third part the set of factors will be applied to the potential solutions and we will try to define common and specific characteristics of every option There are a lot of competent research papers dedicated to the problem of nuclear proliferation Many of them were published before the end of the Cold War and therefore provide us with the dynamic view on the issue Most of the literature used in the paper is dedicated to the problem of the theoretical and legal dimensions of the nuclear proliferation A number of international documents were used as well the Nonproliferation Treaty the UN General Assembly Resolutions etc Mass media sources proved to be a rich source of information Additional information was derived from the statistical data publications caselaw of the International Court *Nuclear Proliferation Problems* Stockholm International Peace Research Institute, 1974 Bilag The Non Proliferation Treaty NPT optryk af tekst i traktat om ikke spredning af kernev ben side 307 312

Problems of Nuclear Proliferation Richard N. Rosecrance, 1966 Weapons of mass destruction : current nuclear proliferation challenges : hearing , **Global and Regional Problems** Vilho Harle, 2016-04-22 Distinctive due to explicit and systematically developed links between international relations IR and related disciplines this book addresses global and

regional interactions and the complex policy problems that often characterise this agenda. Such enhanced communication is crucial for improving the capacity of IR to engage with concrete issues that today are of high policy relevance for international organisations, states, diplomats, mediators and humankind in general. Whilst the authors do not reject the present IR, they offer a wider research agenda with new directions intended not only for those IR scholars who are unsatisfied with the analytical power of the current discipline but also for those working on international, foreign, global or interregional issues in other disciplines and fields of research. In this instance, they pay particular attention to linking up with peace research, international political economy (IPE) and cultural political economy (CPE), sociology, political geography, development studies, linguistics, cultural studies, environmental studies and energy research, gender studies and traditions of area studies.

Nuclear Proliferation Council on Foreign Relations. Independent Task Force on Nuclear Proliferation, 1995. *Global Problems and Common Security* Josef Rotblat, Vitalii I. Goldanskii, 2012-12-06. After many years of sterile arms control negotiations between the super powers which did not produce a single genuine disarmament measure and sometimes had the opposite effect of stimulating the development of new weapons to serve as bargaining chips, an agreement to abolish completely two categories of nuclear weapons, the INF Treaty, was signed and is now being implemented. This historical event, the first actual destruction of deployed nuclear missiles, although not of their warheads, became possible largely because of the radical changes in the policies of the Soviet Union, the new way of thinking advanced by its leader Mikhail Gorbachev. The relaxation of tension that resulted from this policy was one of the factors contributing to the successful conclusion of the INF Treaty. Another no less important factor was the acceptance by the Soviet Union of on-site inspections as a basic element of a verification system essential to ensure compliance with the Treaty. This breakthrough led to the mutual acceptance of an elaborate and precise verification regime and thus made possible the signing of the INF Treaty, which in turn contributed to the further lessening of tension between East and West. But perhaps the most important factor, one which carries much promise for the future, was the changed approach to security problems.

Problems of the Nonproliferation of Nuclear Weapons Vasilii Semenovich Emel'ianov, 1982. Nuclear Non-Proliferation Michael P. Fry, N. Patrick Keatinge, Josef Rotblat, 2012-12-06. This volume appears at a time when the prospects for banishing the threat of nuclear annihilation are brighter than at any time since the first atomic device exploded over the desert at Alamogordo. The last few years have seen an extraordinary change in the climate of East-West relations. The programme of political and economic reform which President Gorbachev initiated in the Soviet Union and which is now spreading throughout most of Eastern Europe has been paralleled by serious efforts to reach agreement on measures for conventional and nuclear disarmament. This has led to new hope that international peace and security can at last be built upon the firm foundation of justice, respect for international law and a determination to approach problems in a spirit of genuine co-operation rather than one of distrust and confrontation. This new climate encourages us in the belief that the obvious

common sense of preventing the further spread of nuclear weapons will come to be shared by all nations At the same time we have to recognize two very disturbing facts which imply that there can be no slackening of our efforts to strengthen the non proliferation regime *The Future of U.S. Foreign Policy* United States.
