**Nuclear Strategy, Arms Control, And The Future** P. Edward Haley, 2019-03-05 Balanced and comprehensive in approach this text assembles classic statements on nuclear strategy and arms control made by Soviet and U S policymakers military thinkers and opinion leaders during the last forty years Major Soviet statements rarely appearing in translation reflect the disagreement over whether victory or parity is the goal *Nuclear Strategy, Arms Control, And The Future* P. Edward Haley, Jack Merritt, 1988-12-04 *Bulletin of the Atomic Scientists* , 1985-12 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Arms Control, the FRG, and the Future of East-West Relations** Wolfram F. Hanrieder, 2019-04-05 The political dimension of arms control has always had special significance for the Federal Republic of Germany not only because of the issue of a divided Germany and a partitioned Europe but also because of the country s key position in the Western security alliance In the wake of NATO s recent decision to deploy more nuclear weapons on German soil and in the absence of progress on arms control it has become clear that arms control measures and negotiations have assumed an importance far beyond their military technical components fundamental questions about the nature of East West relations and the future shape of the transatlantic alliance and the European political order also have been raised These essays explore the implications of arms control negotiations for the Federal Republic of Germany and consider why Germany has traditionally found it impossible to divorce considerations of arms control from their larger political context **Milestones in strategic arms control 1945-2000... , Future Soviet Interests in Arms Control** Institute for Defense Analyses. International and Social Studies Division, 1970 *The Future: Warfare, military forces and technology* , 1989 *Energy Abstracts for Policy Analysis* , 1989-07 **The Future of Arms Control** Michael A. Levi, Michael E. O'Hanlon, 2004-12-07 Arms control for decades at the core of the foreign policy consensus today is among the more contentious issues in American politics It is pilloried and considered out of mode in many conservative quarters while being viewed as nearly sacrosanct in many liberal circles In this new book Michael Levi and Michael O Hanlon argue that neither the left nor the right has a correct view of the proper utility of arms control in the age of terror Arms control in the traditional sense lengthy treaties to limit nuclear and other military competitions among the great powers is no longer particularly useful Nor should arms control be pursued as a means to the end of constraining the power of nations or of promoting global government It is still a critical tool though for controlling dangerous technologies particularly those that in the hands of hostile states or terrorist organizations could cause massive death and destruction Arms control and coercive action including military force must be integrated into an overall strategy for preventing proliferation now more than ever before Arms control should be used to gain earlier warning of illicit activities inside dangerous states allowing the international community to take coercive action in a timely way The authors propose three

new criteria to guide future arms control efforts designed to respond to today's geopolitical realities. Arms control must focus on the dangers of catastrophic technology not so much in the hands of major powers as of small states and terrorist groups. Their criteria lead to a natural focus on nuclear and biological technologies. Much tougher measures to prevent countries from gaining nuclear weapons technology while purportedly complying with the Nuclear Non Proliferation Treaty and procedures for controlling dangerous biological technologies will be most prominent in this framework while lower priority is given to efforts such as bilateral nuclear accords and most t

*START and the Future of Deterrence* Michael J. Mazarr, 1990-06-18 Examining the future of nuclear deterrence in the 1990s and beyond this book outlines aspects of the evolving strategic environment. It also projects the likely future of deterrence strategies and strategic force postures. Other topics such as the Soviet nuclear doctrine are also covered.

**Future of Strategic Deterrence** Christoph Bertram, 1981-06-18 *Integrated Arms Control in an Era of Strategic Competition* Rebecca K.C. Hersman, Heather Williams, Suzanne Claeys, 2022-05-12 Can contemporary arms control keep pace with the rapid rate of change in both geopolitics and technology? While the challenges to future arms control point to a rocky road ahead, measures that build confidence, reduce miscalculation, enhance transparency, restrain costly and dangerous military competition, and offer useful mechanisms and venues for addressing sources of conflict will be of increasing value. For arms control tools to succeed, however, they must be adapted to the current security environment, account for rapidly evolving technological and informational factors, and consider alternative structures, modalities, and participation models. Indeed, now is the time for a recoupling of arms control with deterrence in a way that recognizes these new realities. Now is the time for integrated arms control that enhances stability, embraces plurality, and reinforces resiliency. This CSIS study examines the implications and prospects for the future of arms control in a highly competitive security environment in which challenges from advanced technologies and diminished state control over processes of verification become increasingly prominent features, even as the scope and modalities of arms control grow more complex and multifaceted. The report offers a reexamination of the broad contours of arms control and its role in managing competitive security risks and challenges and the implications for U.S. policymakers, academics, and strategic thinkers engaged in U.S. nuclear policy.

Future Survey Annual 1985 Michael Marien, 1987-01-01 NATO and the Future of European and Asian Security Christensen, Carsten Sander, Maisaia, Vakhtang, 2021-06-25 The key role in the security policy of the North Atlantic Treaty Organization (NATO) is to prevent new types of asymmetric challenges and deal with the new architecture of the Euro Atlantic security environment, including the control of weapons of mass destruction. In modern international politics, the growing militaristic policies of the states have created many dangers and raised the need for NATO to address new issues that the Alliance did not face during the Cold War. NATO and the Future of European and Asian Security reflects on difficult geopolitical and geostrategic conditions and reviews how new types of warfare have a drastic impact on NATO's military and defense doctrine. This book provides the

newest data and theories and contributes to the understanding of the transformation of the regional security environment in the aegis of the Euro Atlantic Covering topics including foreign policy global security hybrid warfare securitization and smart defense this book is essential for government officials policymakers public relations officers military and defense agencies teachers historians political scientists security analysts national security professionals administrators government organizations researchers academicians and students
