M. Lindquist,2012 Addressing a strangely neglected key issue in the history of art this volume engages the variety and complexity of medieval representations of the unclothed human body The Meanings of Nudity in Medieval Art breaks ground by offering a variety of approaches to explore the meanings of both male and female nudity in European painting manuscripts and sculpture ranging from the late antique era to the fifteenth century *Rethinking the Arts after Hegel* Richard Dien Winfield,2023-10-18 In this book Richard Dien Winfield builds upon Hegel s Aesthetics to provide a comprehensive and systematic analysis of the individual fine arts which remedies Hegel s inconsistencies and major omissions In addition to conceiving the general aesthetics and particular stylistic forms of architecture sculpture painting music and literature Winfield determines the fundamental character of the new arts of photography and cinema that the master thinkers of aesthetics never had the opportunity to consider Winfield s analysis covers a wide ranging array of artistic creations from diverse periods and cultures while engaging in debate with the most important aesthetic theorists of the past and present **Visualising Ethnicity in the Southwest Borderlands** Jing Zhu,2020-01-29 This book explores the mutual constitutions of visibility and empire from

the perspective of gender probing how the lives of China's ethnic minorities at the southwest frontiers were translated into images. Two sets of visual materials make up its core sources: the Miao album, a genre of ethnographic illustration depicting the daily lives of non-Han peoples in late imperial China, and the ethnographic photographs found in popular Republican era periodicals. It highlights gender ideals within images and develops a set of visual grammar of depicting the non-Han. Casting new light on a spectrum of gendered themes including femininity, masculinity, sexuality, love, body and clothing, the book examines how the power constructed through gender helped to define order, popularise, celebrate and imagine possessions of empire.

**Sexually Explicit Art, Feminist Theory, and Gender in the 1970s** Christian Liclair, 2022-05-30. Structured around sexual desire as the central analytical category, this monograph systematically approaches a heterogeneous array of artworks to purposefully examine the entanglements of art, feminist theory, gender and sexuality. This book considers the potential of sexually explicit art to challenge a socially constructed conception of sexuality as well as gender and explores the sexually explicit as a means to re-claim agency for marginalized subjectivities and to emancipate desire from within the patriarchal and heteronormative system. In distinct case studies, the author focuses on works by four US American artists: Robert Mapplethorpe, Joan Semmel, Betty Tompkins and Tee A. Corinne and situates them in relation to contemporaneous debates associated with the insurgent Sexual Liberation Movements of the 1970s. The book will be of interest to scholars working in art history, visual culture and gender and sexuality studies.

Curatorial Challenges Malene Vest Hansen, Anne Folke Henningsen, Anne Gregersen, 2019-03-04. Curatorial Challenges investigates the challenges faced by curators in contemporary society and explores which practices, ways of thinking and types of knowledge production curating exhibitions could challenge. Bringing together international curators and researchers from the fields of art and cultural history, the book provides new research and perspectives on the curatorial process and aims to bridge the traditional gap between theoretical and academic museum studies and museum practices. The book focuses on exhibitions as a primary site of cultural exchange and argues that as highly visible showcases, producers of knowledge and historically embedded events, exhibitions establish and organize meanings of art and cultural heritage. Temporary exhibitions continue to increase in cultural significance and yet the traditional role of the museum as a Bildung institution has changed. As exhibitions gain in significance, so too do curatorial strategies. Arguing that new research is needed to help understand these changes, the book presents original research that explores how curatorial strategies inform both art and cultural history museums in contemporary society. The book also investigates what sort of critical, transformative and perhaps even conservative potential can be traced in exhibition cultures. Curatorial Challenges fosters innovative interdisciplinary exchange and brings new insights to the field of curatorial studies. As such, it should be of great interest to academics, researchers and postgraduate students engaged in the study of curatorial practice, museum studies, the making of exhibitions, museum communication and art history.

*In Defense of Reason After Hegel* Richard Dien Winfield, 2022-03-08 In Defense of Reason After Hegel repudiates the assault on truth pervading public life and the academy by drawing upon arguments pioneered by Hegel These arguments show how thought can free itself of arbitrary foundations and establish the exclusive validity of self determination in knowing conduct and aesthetic worth Wide ranging in scope and radically subverting the reigning orthodoxies in contemporary culture the essays of In Defense of Reason After Hegel forge a path for restoring the authority of rational autonomy in theory and
