Remapping Gender in the New Global Order Marjorie Griffin-Cohen, Janine Brodie, 2007-06-11 This book analyses changes in gender relations as a result of globalization in countries on the semi periphery of power Semi periphery refers to those nations which are not drivers of change globally but have enough economic and political security to have some power in determining their own responses to global forces Individual countries obviously face challenges that are to some extent unique although the prescriptions for economic and social restructuring are based on a common competitive logic Remapping Gender in the New Global Order draws on examples from four countries on the semi periphery of power but still located in the top category of the UNDP s Human Development Index At one end is Norway one of the world s richest and most developed welfare states and at the other is Mexico a country that is considerably poorer and more susceptible to the power of the United States and international agencies Australia and Canada the other two semi peripheral countries examined are in the middle Also included are comparisons with the epicentre of the

core base of power the United States The individual chapters focus on the effect on specific groups of people including males and indigenous groups the mechanisms people use to both cope with dramatic social changes and the strategies and alliances that are used to affect the course of changes It covers topics that range from implications of labour migration on care regimes to globalism s effect on masculinity and the male breadwinner model **Asia's New World Order** George T. Mittelman,2011-02-25 Few authors have sought to explain the links among development global governance and globalization Contesting Global Order

traces dominant values and patterns on a world level over the last half century Including a framing introduction written for the volume this book brings together for the first time James H Mittelman s most influential works offering cross regional analysis and including fieldwork in nine countries in Africa and Asia **Making Global Institutions Work** Kate Brennan,2014-09-19 This book seeks to think differently about what we recognize as global institutions and how they could work better for the people who need them most By so doing the contributions show that there is a group of institutions that influence enough people s lives in significant enough ways through what they protect provide or enable that they should be considered together as global institutions The United Nations the World Bank the internet as well as private military and security companies leave a heavy footprint on the social political and economic landscape of the planet We are all aware in different ways of the existence of these global institutions but their importance in achieving change in the twenty first century is often underestimated In this book contributors seek to explain what associations exist between change in global institutions and the reduction of poverty and inequality as well as the achievement of security and justice The work makes sense of processes of change and identifies the most significant obstacles that exist offering suggestions for future action that will be of interest to students and scholars of global institutions *New World Order* Gordana Yovanovich,2003-09-05 Contributors to the book suggest an alternative discourse and value system to that of the market led corporate global agenda one that does not directly challenge corporate globalization but recognizes a parallel reality Need and ingenuity are creating a culture that is clearly different from both North American pop culture and the high culture of the intellectual elites and which can lead the world away from an economics of death to a more positive world The New World Order does not however encourage naive optimism as it recognizes that the lethal inversion of our value system which is only beginning to be recognized may not be acknowledged and counteracted in time to prevent disaster Contributors include Meenakshi Bharat University of New Delhi James Bisset former Canadian ambassador to Yugoslavia Leigh S Brownhill OISE University of Toronto Keith Ellis University of Toronto Mar a Figueredo University of Toronto Michael Mandel Osgoode Hall Law School John McMurtry University of Guelph J Nef University of Guelph Jennifer Sumner University of Guelph Terisa E Turner University of Guelph Edward Vargo the Assumption University in Bangkok and Gordana Yovanovich *European Union and New Regionalism* Mario Telò,2018-02-06 This title was first published in 2001 This is a collection of papers that look at the structure of the global economy and its changing paradigms over the years The contributors look at how the classic concept of state autonomous sovereign and freed of all constraint never really reflected the reality of the international scene despite the role it has played in realist and neo realist theory for many decades Instead they consider that the political social and economic characteristics originally attributed to states seem increasingly to be expressed through regional constructs The papers in this volume show that even within regionalism there are a variety of different models that exist and examine five of those models the European Union Mercosul Mercosur the North American Free Trade Area NAFTA the Association of South

Charles Moore, 2020-05-10 Because most people and their countries seek wealth and power and because money and credit are the biggest single influence on how wealth and power rise and decline if one does not seek knowledge of how money works one cannot understand the biggest driver of politics within and between countries hence one cannot understand how the world order works If one doesn't understand how the world order works one can't understand the post pandemic debt tsunami that's coming I believe that the times ahead will be radically different from the times we have experienced so far in our lifetimes As one reads this reference book remember that which I don't understand will always remain much greater than that which I truly understand So whenever information I provide you with and what I think as I'm writing this book please realise that I'm but one voice doing the best I can to openly convey to you my understanding and thinking based upon 20 years of financial systems development and research In the end of the day it's up to you to assess for yourself what I've learned and do what you like with it The digital revolution post pandemic will lead to a radical departure from the traditional model of monetary exchange The creation of a Digital Financial Market Infrastructure will underpin the unbundling and re-bundling of the functions of money within society Although digital money itself is not new to modern economies digital legal tender DLT facilitates instantaneous peer to peer transfers of value in a way that today is impossible The importance of digital connectedness will often supersede the importance of macroeconomic links and lead to the establishment of Digital Financial Markets linking the currency to membership of a particular financial market rather than to a specific country Capitalism underpins wealth generation and hence the existence of a digital financial market Capitalism is an economic system in which private individuals or corporations own and control the flow of capital throughout society Capitalism is built on the idea that compensation and profits derived from capital allocations reflect the relative contribution an individual or firm makes from the utilisation of capital to the total wealth of a society The genius of capitalism lies in its ability to produce organic answers to most problems of scarcity and resource allocation Markets tend naturally to reward the ideas that prove most useful and to penalize dysfunctional behaviour They can bring about broad based outcomes that states cannot by driving vast numbers of individuals to adjust their behaviour in response to price signals Capital is the defining feature of modern economies that transforms mere wealth into an asset that creates more wealth Capital is the lifeblood of capitalist societies yet capital unequal distribution throughout the community codifies the widening wealth gap between the holders of capital and everybody else This book seeks to rewire the global Financial Markets Infrastructures to support a more equitable access to capital and ensure its convertibility into a nation state central bank issued digital fiat cash or legal tender Additionally the universal World Currency Unit is defined to support the global transfer of value between any two people on the planet today without the need for any financial service providers or intermediaries Universal access to capital which is readily convertible to globally trusted units of account combined with a censorship resistant means of payment underpins

global trade will improve market access for both holders of low per unit value intellectual property rights producers and consumers in developing and developed countries The described Global Financial Market Infrastructure technologies are aligned with the relevant CPSS IOSCO Principles for financial market infrastructures and hence operate entirely within the relevant national laws and regulations without change The Vision is a Borderless Global Market underpinning universal wealth creation which never closes

Migration, Work and Citizenship in the New Global Order Ronaldo Munck, Carl Schierup, Raúl Wise, 2013-09-13 Any consideration of global migration in relation to work and citizenship must necessarily be situated in the context of the Great Recession A whole historical chapter that of neoliberalism has now closed and the future can only be deemed uncertain Migrant workers were key players during this phase of the global system supplying cheap and flexible labour inputs when required in the rich countries Now with the further sustainability of the neoliberal political and economic world order in question what will be the role of migration in terms of work patterns and what modalities of political citizenship will develop While informalization of the relations of production and the precarization of work were once assumed to be the exception that is no longer the case As for citizenship this book posits a parallel development of precarious citizenship for migrants made increasingly vulnerable by the global economic crisis But we are also in an era of profound social transformation in the context of which social counter movements emerge which may halt the disembedding of the market from social control and its corrosive impact This book was published as a special issue of Globalizations
