Pathology of the Female Genital Tract A. Blaustein, 2013-11-11 The response to the First Edition of this text confirmed our belief that there was a need for a book of this kind The multi authored approach has been retained ensuring that authoritative current information is incorporated into each chapter and that references are up to date The section on diseases of the vagina has been enhanced by a greater emphasis on the clinical aspects The chapter on DES induced lesions has been updated with the data of the DeSAD study and the section on adenocarcinoma of the cervix has been enlarged by the description of the undifferentiated lesions including glassy cell and signet cell carcinoma A departure from the traditional chapter approach has been made in the discussion of endometrial hyperplasia and carcinoma in order to present a conceptual view of these diseases A similar presentation of diseases of the myometrium has been made The subjects of lymphomas and mesenchymal tumors of the ovary have been enlarged upon and presented in a separate chapter Fine needle aspiration in the diagnosis of ovarian tumors and of non malignant disorders of the ovary has become an increasingly useful technique Two new chapters have been added to cover this subject Many of the changes made in the second edition were in response to reviewers of the First Edition It is hoped that their constructive suggestions have been addressed Ance!
