Reluctant Heroine The Life And Work Of Helene Duhem:

Reluctant Heroine Stanley L. Jaki, 1992 **The Origins of Statics** Pierre Duhem, 2012-12-06 If ever a major study of the history of science should have acted like a sudden revolution it is this book published in two volumes in 1905 and 1906 under the title *Les origines de la statique* Paris the place of publication and the Librairie scientifique A Hermann that brought it be enough of a guarantee to prevent a very different outcome Without prompting anyone for some years yet to follow up the revolutionary vistas which it opened up *Les origines de la statique* certainly revolutionized Duhem's remaining ten or so years He became the single handed discoverer of a vast new land of Western intellectual history Half a century later it could still be stated about the suddenly proliferating studies in medieval science that they were so many commentaries on Duhem's countless findings and observations Of course in 1906 Paris and the intellectual world in general were mesmerized by Bergson's *Evolution creatrice* freshly off the press It was meant to bring about a revolution Bergson challenged head on the leading dogma of the times the idea of mechanistic evolution He did so by noting among other things that to speak of vitalism was at least a roundabout recognition of scientific ignorance about a large number of facts concerning life processes He held high the idea of a vital impetus passing through matter and indeed through all matter or the universe an impetus that could be detected only through intuitive knowledge **Medieval Scholarship: Philosophy and the arts** Helen Damico, Joseph B. Zavadil, Donald Fennema, Karmen Lenz, 1995 This third volume completes this series It presents original biographical essays on scholars in the fields of art music and philosophy whose work has shaped medieval studies for the past 400 years *Spiritual Evolution* John Marks Templeton, K.S. Giniger, 1998-06 These personal essays by esteemed scientists worldwide describe the spiritual journeys they have taken Autohirs share their own experiences of learning to blend an understanding of the Divine with scientific perspectives Biographical Dictionary of Twentieth-Century Philosophers Stuart Brown, Diane Collinson, Robert Wilkinson, 2012-09-10 This Biographical Dictionary provides detailed accounts of the lives works influence and reception of thinkers from all the major philosophical schools and traditions of the twentieth century This unique volume covers the lives and careers of thinkers from all areas of philosophy from analytic philosophy to Zen and from formal logic to aesthetics All the major figures of philosophy such as Nietzsche Wittgenstein and Russell are examined and analysed The scope of the work is not merely restricted to the major figures in western philosophy but also covers in depth a significant number of thinkers from the near and far east and from the non European Hispanic language communities The Biographical Dictionary also includes a number of general entries dealing with important schools of philosophy such as the Vienna Circle or currents of thought such as vitalism These allow the reader to set the individual biographies in the context of the philosophical history of the period With entries written by over 100 leading philosophy scholars the Biographical Dictionary is the most comprehensive survey of twentieth century thinkers to date Structure The book is structured alphabetically by philosopher Each entry is identically structured for ease of access

and covers nationality dates and places of birth and death philosophical style or school areas of interest higher education significant influences main appointments main publications secondary literature account of intellectual development and main ideas critical reception and impact At the end of the book a glossary gives accounts of the schools movements and traditions to which these philosophers belonged and thorough indexes enable the reader to access the information in several ways by nationality by major areas of contribution to philosophy e g aesthetics by major influences on the thinker concerned e g Plato Kant Wittgenstein

Theology and Modern Physics Peter E. Hodgson, 2017-09-08 The new discoveries in physics during the twentieth century have stimulated intense debate about their relevance to age old theological questions Views range from those holding that modern physics provides a surer road to God than traditional religions to those who say that physics and theology are incommensurable and so do not relate At the very least physics has stimulated renewed theological discussions In this critical introduction to the science theology debate Peter E Hodgson draws on his experience as a physicist to present the results of modern physics and the theological implications Written for those with little or no scientific background Hodgson describes connections between physics philosophy and theology and then explains Newtonian physics and Victorian physics the theories of relativity astronomy and quantum mechanics and distinguishes the actual results of modern physics from speculations The connections with theology are explored throughout The concluding section draws discussions together and makes an important new contribution to the debate

Flat Earths and Fake Footnotes Derrick Peterson, 2021-02-17 We are all haunted by histories They shape our presuppositions and ballast our judgments In terms of science and religion this means most of us walk about haunted by rumors of a long war However there is no such thing as the history of the conflict of science and Christianity and this is a book about it In the last half of the twentieth century a sea change in the history of science and religion occurred revealing not only that the perception of protracted warfare between religion and science was a curious set of mythologies that had been combined together into a sort of supermyth in need of debunking It was also seen that this collective mythology arose in the nineteenth and twentieth centuries by historians involved in many sides of the debates over Darwin s discoveries and from there latched onto the public imagination at large Flat Earths and Fake Footnotes takes the reader on a journey showing how these myths were constructed collected together and eventually debunked Join us for a story of flat earths and fake footnotes to uncover the strange tale of how the conflict of science and Christianity was written into history

One Hundred Twentieth-Century Philosophers Stuart Brown, Diane Collinson, Dr Robert Wilkinson, Robert Wilkinson, 2008-02-20 One Hundred Twentieth Century Philosophers offers biographical information and critical analysis of the life work and impact of some of the most significant figures in philosophy this century Taken from the acclaimed Biographical Dictionary of Twentieth Century Philosophers the 100 entries are alphabetically organised from Adorno to Zhang Binglin and cover individuals from both continental and analytic philosophy The entries have an identical four part structure making it easy to compare and contrast information comprising biographical

details a bibliography of major works a listing of relevant secondary and critical literature an appraisal of the philosopher s thoughts and achievements A separate glossary provides an introduction to the origins development and main features of major philosophical schools and movements and offers select bibliographies to guide the reader to further research

Medieval Scholarship Helen Helen Damico,2015-12-22 This is the third of a three volume set on medieval scholarship that presents original biographical essays on scholars whose work has shaped medieval studies for the past four hundred years A companion to Volume 1 History and Volume 2 Literature and Philology Volume 3 Philosophy and the Arts covers the lives of twenty eminent individuals from Victor Cousin 1792 1867 to Georges Chehata Anawati 1905 1994 in Philosophy from H J W Tillyard 1881 1968 to Gustave Reese 1899 1977 in Music and from Alois Riegl 1858 1905 to Louis Grodecki 1910 1982 in Art History whose subjects were the art music and philosophical thought of Europe between 500 1500 The scholars of medieval philosophy strove to identify the nexus of philosophical truth whether they were engaged in the clash of the Christian church and secular republicanism as reflected in the tension between theology and philosophy in addressing the conflicting perceptions of Muslim identity or in defining Jewish philosophical theology in non Jewish culture Medieval musicologists who are included as the subjects of the essays pioneered or recontextualized traditional views on the definition of music as subject matter on the relationship between music and philosophical concepts on interpretative distinctions between secular and sacred music monophony and polyphony and concepts of form and compositional style The art historians treated in this volume not only overturn the view of medieval art as an aesthetic decline from classical art but they demonstrate the continual development of form and style inclusive of minor and major arts in textiles architecture and architectural sculpture manuscripts ivory carvings and stained glass The philosophers musicologists and art historians who appear in Volume 3 worked in three newly emerging disciplines largely of nineteenth century origin In their distinguished and extraordinary output of energy in scholarly and academic arenas they contributed significantly to the emergence and formation of medieval studies as the prime discipline of historical inquiry into and hence the key to understanding of the human experience

Reader's Guide to the History of Science Arne Hessenbruch,2013-12-16 The Reader s Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn

Dynamics of Spatio-Temporal Cellular Structures Innocent Mutabazi,Jose Eduardo Wesfreid,Etienne Guyon,2010-06-14 The impact of Benard s discovery on 20th century physics is crucial to any modern research area such as fluid dynamics nonlinear dynamics and non equilibrium thermodynamics just to name a few This centenary review shows the broad scope and development including modern applications edited and written by experts in the field

Technology in the Western Political Tradition Jerry Weinberger,Arthur M. Melzer,Richard

Zinman,2019-05-15 This well integrated group of thirteen papers addresses the intriguing and perplexing issue of whether modern government can handle the problem of technology *The Limits of a Limitless Science* Stanley L. Jaki,2000 This new collection of writings from America s foremost authority on the relationship between science and religion Templeton Prize winner Stanley L Jaki is an incisive overview of the intersection of science with the most fundamental areas of human culture **Encyclopedia of Historians and Historical Writing** Kelly Boyd,2019-10-09 The Encyclopedia of Historians and Historical Writing contains over 800 entries ranging from Lord Acton and Anna Comnena to Howard Zinn and from Herodotus to Simon Schama Over 300 contributors from around the world have composed critical assessments of historians from the beginning of historical writing to the present day including individuals from related disciplines like J rgen Habermas and Clifford Geertz whose theoretical contributions have informed historical debate Additionally the Encyclopedia includes some 200 essays treating the development of national regional and topical historiographies from the Ancient Near East to the history of sexuality In addition to the Western tradition it includes substantial assessments of African Asian and Latin American historians and debates on gender and subaltern studies Praying the Psalms Stanley L. Jaki,2001 The author allows the psalms to speak afresh by interpreting their original meanings with timely comments that bring out their timeless quality He provides precisely enough commentary on the original cultural and theological setting of each psalm to let its full meaning emerge **Lettres de Pierre Duhem à sa fille H  l  ne** Pierre Maurice Marie Duhem,1994 Scientist and Catholic Stanley L. Jaki,1991 The tragic conflict between men of faith and men of science has its origins in a false notion of history a notion that the Middle Ages stultified scientific exploration and scholarship French scientist Pierre Duhem dedicated his life to examining this problem For years however his works were inaccessible to English speaking scholars Stanley Jaki makes available for the first time a systematic treatment of Duhem s work along with twenty seven selections in English translation from his writings This book is a powerful testimony to the unity of faith and reason **A Mind's Matter** Stanley L. Jaki,2002 Yet as a Catholic priest of the Benedictine Order Jaki has never made secret his dislike of the rule that expects one to eliminate religious factors from the so called academic equation To his mind those factors matter very much indeed The Physicist as Artist Pierre Maurice Marie Duhem,1988 **Advances in Dielectric Ceramic Materials** K. M. Nair,A. S. Bhalla,1998 Contains 43 articles on such topics as causes of dielectric dispersion in ferroelectric materials microwave characterization of dielectric ceramics for wireless communications dielectric properties of barium titanate ceramics as a function of grain size single domain intrinsic properties of meso
