The book is an interdisciplinary work shaped around films made by different workshop participants using film to access personal interpretations of space and place. It is focused on interacting and engaging with remembering through different memory sites. Travelling along a timeline of memory, Tanja Sakota takes us on a journey through South Africa, Germany, Poland, and Bosnia Herzegovina. Using a camera and short film format, Sakota hosts several workshops in different countries focused on interacting and engaging with remembering through different memory sites. The author sits at the core, but the book is an interdisciplinary work shaped around films made by different workshop participants using film to access personal interpretations of space and place. Questions that underpin the uncovering of memories are: How does one use a camera to make the invisible visible? How does one remember events that one hasn't necessarily experienced? How does one use film to interrogate the past from the future present? As the journey evolves, workshop participants and readers alike enter into a conversation around practice-based research, autoethnography, and film. *From microscope to kaleidoscope*, 2008-01-01

What new understandings concerning children and significant others in their life worlds have become apparent because of the HIV/AIDS pandemic? This innovative book argues that new insights on education and psychosocial aspects surface when research in the realm of HIV/AIDS is viewed through a positive psychology lens. By converging in-depth exploration and description, the book pinpoints vital persons supporting children's wellbeing and posits changed roles due to pandemic-related stressors. The significance of different education role players (children, teachers, caregivers, community members) is addressed in separate chapters using pioneering theory and empirical data that are integrated with dynamic case examples, visual data, and narratives. Ebersohn's edited book emphasises supportive persons and networks as buffers, children's access to mediate their coping when confronted by HIV/AIDS-related stressors. Throughout, the links between psychosocial support, changed roles and responsibilities, and resilience in the advent of adversity are clearly and thoughtfully demonstrated. A concluding chapter questions why and what happens to children's wellbeing when society fails to provide supportive networks and services. **The Memory Activity Book** DK, Helen Lambert, 2018-11-06
