Mathematics Education and the Use of MatCos Software in Primary and Secondary Schools Costabile, Francesco Aldo,Altomare, Mariavittoria,Tricoli, Gianluca,2020-08-07 The theme of inserting new digital technologies into the teaching and learning of mathematics from primary and secondary schools has provoked a wide and interesting debate One such debate is the reformation of the foundations of mathematics to include computation what and how to calculate among the traditional themes Arithmetic Geometry etc of mathematics Thus the authors propose the MatCos Project as a new approach for solving this issue Computer Based Mathematics Education and the Use of MatCos Software in Primary and Secondary Schools is a critical reference source that proposes a new pedagogical learning paradigm that guides students in the formation of an active logical sequential intuitive and creative thinking that directs them towards problem solving and starts students with computational thinking and programming in a natural way The content of the book is divided into two parts with the first exploring theoretical and pedagogical notes on mathematics and the second examining the MatCos programming environment and its systematic inclusion in teaching practice Highlighting themes that include computer assisted instruction teaching learning sequences and programming this book is ideal for in service teachers mathematics instructors academicians researchers and students *Resources in Education* ,1999 **Computers in Education** ,1983

Computers in Education: Report of a research conference ,1983 Mathematical Modelling in Education Research and Practice Gloria Ann Stillman,Werner Blum,Maria Salett Biembengut,2015-07-20 In this volume cultural social and

cognitive influences on the research and teaching of mathematical modelling are explored from a variety of theoretical and practical perspectives The authors of the current volume are all members of the International Community of Teachers of Mathematical Modelling and Applications the peak research body in this field A distinctive feature of this volume is the high number of authors from South American countries These authors bring quite a different perspective to modelling than has been showcased in previous books in this series in particular from a cultural point of view As well as recent international research there is a strong emphasis on pedagogical issues including those associated with technology and assessment in the teaching and learning of modelling Applications at various levels of education are exemplified The contributions reflect common issues shared globally and represent emergent or on going challenges *Electronics Mathematics* Robert Donovan, 2002 Suitable as a two semester stand alone math text for electronics students at the Community College Proprietary School or Vo Tech Center Course is most likely found in departments of electronics technology or electronics engineering technology Written with the understanding that incoming students are often excited about beginning their study of electronics but are not so enthused about math this book provides an accessible application driven approach to algebra and trigonometry In addition to a strong mathematical understanding its many practical examples and exercises are designed to develop the solid work habits and thought processes that are essential for success in the workplace *Translations on Communist China* ,1969-10
