Matriarchs Of Englands Cooperative Movement A Study In Gender Politics And Female Leadership 1883 1921:

The Matriarchs of England's Cooperative Movement Barbara J. Blaszkak, 2000 Current thinking considers the Women's Cooperative Guild within the English Cooperative Movement to have been an independent and democratically run organization whose leaders built sisterhood across class lines and achieved many benefits for married working class women. This study of the dynamics of gender within the movement between 1883 and 1921 arrives at different conclusions. Blaszkak examines what freedoms of speech and activity women were permitted within the movement as well as what resources they were given to accomplish their tasks. Ultimately the parameters set by the men would determine the type of female leadership that emerged and whether it was able to realize its feminist and utopian agendas. Setting the organization's activities within the context of gender relations in the Cooperative Movement, Blaszkak finds that the Guild was much more dependent and much less democratically directed than has usually been supposed. Restrictions established by male cooperators and enhanced by the realities of working class life turned the Guild into a clique dominated by a few. Even the Guild's most revered leader, Margaret Llewelyn Davies, found it impossible to escape the gendered socio-economic circumstances in which she labored at her ministry to improve the lives of working class women. Consequently her leadership inadvertently assisted male cooperators in their attempts to limit possibilities for women.

The Co-operative Movement and Communities in Britain, 1914-1960 Nicole Robertson, 2016-03-23 The co-operative movement has played a notable role in the retail, wholesale, productive, political, educational, and cultural life of Britain. As a movement, it has consciously represented consumer interests and has carried out work in the arena of consumer protection. However, its study has suffered relative neglect when compared to research into the Labour Party, trade unions, and the wider politics of retail and consumption. This book reassesses the impact of the co-operative movement on various communities in Britain during the period 1914-1960, providing a comprehensive account of the grass roots influence of co-operatives during both war and peace. This is a national study with a local dimension. It considers how national directives and perspectives were locally applied if indeed they were applicable within the context of individual societies. Each chapter focuses on a different aspect of the co-operative movement by examining various societies in England, Scotland, and Wales. Particular attention is paid to the Midlands due to the movement's expansion here during the interwar period, with consideration also given to comparative developments in Europe. The author explores the movement's relationship with other labour organizations, its cultural and social aspects, including the role sport played in co-operative societies, the politicization of the movement, and local response to the formation of the Co-operative Party, the education of co-operators, what co-operative membership entailed, and how co-operative ideology was expressed. The economic impact membership could have on families, including the provision of financial assistance and credit, and the co-operative movement's development alongside consumer activism. The book is a major national study of the growth of Co-operation during this crucial period of British social, economic, and consumer history.

Chan, 2014-07-28 This book explores Virginia Woolf's engagement with the professions in her life and writing Woolf underscored the significance of the professions to society such as the opportunity they provided for a decent income and the usefulness of professional accreditation However she also resisted their hierarchical structures and their role in creating an overspecialised and fragmented modernity which prevented its members from leading whole fulfilling lives This book shows how Woolf's writing reshaped the professions so that they could better serve the individual and society and argues that her search for alternatives to existing professional structures deeply influenced her literary methods and experimentation **A Workforce Divided** Leslie A. Schuster, 2002-12-30 In this study of the life and work of Saint Nazaire's shipbuilding workers in the 30 years before World War I Schuster shows that the consequences of industrial production for workers differed sharply according to their resources and experiences She details the competing identities and divergent values maintained by shipbuilding workers demonstrating that they were fostered by the interaction between state programs industrial production and the traditions pursued in the local realm Third Republic economic policies for shipbuilding promoted unemployment and worker dependence on state officials over union leaders and the uneven application of capitalist methods of production meant multiple workplace experiences that further undercut association A workforce composed of industrial workers and agricultural producers brought markedly different priorities to the workplace Urban dwelling industrial workers proved dependent on shipbuilding while workers commuting from La Grande Bri D ere a nearby marshland were property owning

Building Co-operation John F. Wilson, Anthony Webster, Rachael Vorberg-Rugh, 2013-10-10 Building Co operation traces the development of The Co operative Group and its predecessor the Co operative Wholesale Society CWS over the course of 150 years Born from the efforts of the Rochdale Pioneers and others who established successful consumer co operatives across Britain in the mid nineteenth century by the 1860s the proponents of the CWS were ready to pioneer a new effort a federation democratically run and collectively owned that would enable co operatives to become their own suppliers From humble origins the CWS grew into one of Britain s largest businesses within a generation pioneering modern retailing and distribution on a national scale expanding into factory production and financial services and establishing an international supply network that stretched across Europe and beyond Throughout the late nineteenth century and well into the twentieth co operative societies provided essential services to millions of members across Britain ranging from food and clothing to banking insurance travel agency pharmacy and even funeral services However in the second half of the twentieth century co operatives experienced a protracted period of decline facing a series of internal structural challenges fierce competition amongst food retailers and a rapidly changing marketplace By the turn of the twenty first century when many commentators were ready to consign co operatives to the past The Co operative Group emerged with a revitalised business model that has helped to re invigorate the British co operative sector and bring new attention to the important role of co operative and mutual enterprises worldwide Based on extensive archival research including many records available to historians for the first time Building Co operation is the story of a distinctive business model as it evolved over time While since the inauguration of the CWS in 1863 the commercial landscape has changed nearly beyond recognition the values at the heart of The Co operative Group have remained relevant to succeeding generations focusing on member benefits and a commitment to ethical trading

The Making of Consumer Culture in Modern Britain Peter Gurney, 2017-05-18 CHOICE OUTSTANDING ACADEMIC TITLE AWARD WINNER 2018 It is commonly accepted that the consumer is now centre stage in modern Britain rather than the worker or producer Consumer choice is widely regarded as the major source of self definition and identity rather than productive activity Politicians vie with each other to fashion their appeal to citizen consumers When and how did these profound changes occur Which historical alternatives were pushed to the margins in the process In what ways did the everyday consumer practices and forms of consumer organising adopted by both middle and working class men and women shape the outcomes This study of the making of consumer culture in Britain since 1800 explores these questions introduces students to major debates and cuts a distinctive path through this vibrant field It suggests that the consumer culture that emerged during this period was shaped as much by political relationships as it was by economic and social
