Mesothelial Cell And Mesothelioma:

The Mesothelial Cell and Mesothelioma Marie-Claude Jaurand, Jean Bignon, 1994-07-28 Detailing the epidemiology immunocytochemistry and molecular and cellular biology of mesothelioma this up to date reference describes mesothelial cell transformation under the effect of mineral fibers providing a thorough evaluation of the various therapeutic approaches to mesothelioma Considering mesothelioma in the context of the overall biological effects of asbestos The Mesothelial Cell and Mesothelioma offers much needed information to help prevent diagnose and manage mesothelial carcinogenesis explores the possibility of a hereditary predisposition for malignant mesothelioma examines the phenotypical and genotypical changes associated with mesothelial cell transformation explains the use of transmission electron microscopy as well as specific and unspecific antibodies in diagnosing mesothelioma discusses whether there is or has been a background incidence of mesothelioma in humans unrelated to the industrial use of asbestos analyzes new treatment strategies including gene

therapy immunotherapy and chemotherapy and more **Mesothelial Cell and Mesothelioma** M. C Jaurand, J Bignon, P Brochard, 1993 **Pathology of the Mesothelium** John S.P. Jones, 2012-12-06 Many books have been written about the pathology of the major organs of the body such as the lungs heart gastrointestinal tract etc Included in these are descriptions often with a minor emphasis of pathological conditions which affect their serosal surfaces In this book I have endeavoured to reverse the process and treat the mesothelium as an organ in its own right rather than being the no man s land between various major structures A number of pathological conditions are common to the coverings of the three major body cavities the pleura pericardium and peritoneum while some abnormalities are exclusive to one or other sites I hope that the contents of this book cover a broad enough spectrum of mesothelial diseases to be of help to service pathologists who are ever increasingly being asked to make diagnoses particularly on small biopsies of pleural and peritoneal tissues It is also my hope that the various aspects of the subject have been dealt with in sufficient depth to be of use to pathol ogists engaged in teaching and research and to those whose interests lie in the structure and function of the mesothelium There is still much to be learned in understanding the way the mesothelium behaves in the realm of both inflammatory response and tumour formation If this book provides a stimulus to furthering research in these fields I feel it will have achieved its objective

Malignant Mesothelioma Andrea Tannapfel, 2011-04-11 Malignant mesothelioma is an aggressive and fatal neoplasm of serous membranes that still shows a rising incidence worldwide This book covers all the important aspects of the disease by bringing together contributions from selected experts in the fields of epidemiology imaging pathological diagnosis therapy genetics and screening Special emphasis is placed on the latest diagnostic techniques and current therapy standards In addition the mineralogy of asbestos is reviewed and clear advice is included on the analysis of tissue mineral fiber content By providing a compact scientifically based and up to date overview of the management of malignant mesothelioma this volume will be invaluable for all clinicians and pathologists who are engaged in the diagnosis and treatment of the disease or in
