Herbicides and Environment Andreas Kortekamp, 2011-01-08 Herbicides are much more than just weed killers They may exhibit beneficial or adverse effects on other organisms Given their toxicological environmental but also agricultural relevance herbicides are an interesting field of activity not only for scientists working in the field of agriculture It seems that the investigation of herbicide induced effects on weeds crop plants ecosystems microorganisms and higher organism requires a multidisciplinary approach Some important aspects regarding the multisided impacts of herbicides on the living world are highlighted in this book I am sure that the readers will find a lot of helpful information even if they are only slightly interested in the topic *Transformation Products of Emerging Contaminants in the Environment* Dimitra A.

Metabolic Maps of Pesticides Hiroyasu Aizawa, 2012-12-02 Metabolic Maps of Pesticides provides a summary of investigations and drawings of the metabolic patterns on pesticides that were collected with the aid of Chemical Abstracts Service CAS for the years 1970-1979 Some maps were taken from the original reports some were slightly modified for clarity and some were tentatively drawn from descriptions in the original articles The pesticides are classified based on their chemical structures as functional groups or based on common chemical nomenclature The chemical classifications highlight the properties of the mother pesticides and the impact of their degenerative metabolites on the environment Metabolic maps are provided for the following acid amides amidines and guanidines anilines and nitrobenzenes biphenyl ethers DDT and its analogs dithio and thiolcarbamates five and six membered heterocyclic compounds imides organochlorine compounds oxime carbamates phenoxyacetic acids phenyl ring fused five membered heterocyclic compounds phenyl aryl carbamates phenylureas and related compounds phosphonothiolates and phosphonothioates phosphonates phosphorothioamides phosphates phosphorothiolates pyrethroids pyridines triazines and substituted benzenes and miscellaneous compounds

Hydrolysis in Drug and Prodrug Metabolism Bernard Testa, Joachim M. Mayer, 2003-08 Many drugs and other xenobiotics e.g. preservatives insecticides and plastifiers contain hydrolyzable moieties such as ester or amide groups In biological media such foreign compounds are therefore important substrates for hydrolytic reactions catalyzed by hydrolases or proceeding non enzymatically Despite their significance until now no book has been dedicated to hydrolysis and hydrolases in the metabolism of drugs and other xenobiotics This work fills a gap in the literature and reviews metabolic reactions of hydrolysis and hydration from the point of view of enzymes substrates and reactions

Metabolic Pathways of Agrochemicals Terry R Roberts, David H Hutson, Philip W Lee, Peter H Nicholls, Jack R Plimmer, Marie Roberts, 2007-10-31 This important publication provides a comprehensive summary of data and information on the metabolism and chemical degradation of agrochemicals in soils plants and animals Part 1 Herbicides and Plant Growth Regulators and Part 2 Insecticides and Fungicides together provide a major bibliography as each entry is fully referenced Contents include metabolic products pathways and mechanisms together with useful details on physico chemical properties and mode of action Both parts are organised by class of chemical for easy reference There are separate entries for each pesticide covering most commercially available chemicals in use today In addition an overview of the metabolism of each major class provides the reader with an informed summary of key similarities and significant differences between individual chemicals Information is based primarily on literature from the past 40 years of research together with some important previously unpublished work provided by the agrochemical companies Presented in a systematic easy to read

Metabolic Pathways of Agrochemicals is an invaluable reference for chemists biochemists and biologists working in the discovery development and registration of agrochemicals as well as scientists in related areas such as design and mode of action of pharmaceuticals Journal American Chemical Society,2001 Advanced Bioactive Compounds Countering the Effects of Radiological, Chemical and Biological Agents Grant N. Pierce,Volodymyr I. Mizin,Alexander Omelchenko,2014-07-08 The probability for exposure to damaging radiation toxic chemicals in the environment and adverse biological agents has increased exponentially today The more frequent and faster travel that we experience today also escalates the risk of contraction and transmission of potentially deadly infections This has created a very real and escalating risk for injuries and deaths This is accentuated in the military and medical staff that is more frequently exposed to radiological chemical and biological agents in their normal working environment Understanding the mechanisms whereby these toxic agents inflict damage to our bodies is essential to prepare us for these challenges Much of the damage is inflicted through the generation of free radicals and non radical oxidants which then act through oxidative mechanisms to injury the body This volume will discuss the damage caused by these radiological chemical and biological environmental stressors the mechanisms through which the damage can occur and the novel strategies that can be used to reduce the injury inflicted by these toxic compounds Using basic and clinical research approaches the contents of this book discuss new ideas for the development of bioactive products and environmental approaches to lessen or negate the biological damage inflicted by these noxious compounds **Sustainable Agrochemistry** Sílvia Vaz Jr.,2019-05-28 This book presents a broad range of technologies for sustainable agrochemistry e g semiochemicals for pest management nanotechnology for release of eco friendly agrochemicals and green chemistry principles for agriculture It provides a concise introduction to sustainable agrochemistry for a professional audience and highlights the main scientific and technological approaches that can be applied to modern agrochemistry It also discusses various available technologies for reducing the negative impacts of agrochemicals on the environment and human health Fungal Secondary Metabolites Kamel A.
