

The background of the book cover is a monochromatic, reddish-brown illustration. It depicts a scene from a Victorian-era story. In the foreground, a man in a dark suit is leaning over a woman who is lying down, possibly on a bed or a sofa. The woman has her eyes closed and a pale, possibly lifeless or unconscious expression. In the background, another woman in a long, dark dress stands near a window, looking on. The overall mood is somber and dramatic, suggesting themes of passion and pathology.

Passion And Pathology In Victorian Fiction:

Passion and Pathology in Victorian Fiction Jane Wood, 2001 Nervous illness and the study of how body and mind connected were of intense interest to Victorian medical writers and novelists alike This elegant study offers an integrated analysis of how medicine and literature figured the connection between the body and the mind Alongside detailed examinations of some of the era's most influential neurological and physiological theories Jane Wood offers fresh readings of fictions by Charlotte Brontë George MacDonald George Eliot Wilkie Collins Thomas Hardy and George Gissing *Passion and Pathology in Victorian Fiction* Jane Wood, 2001 In what was once described as The Century of Nerves a fascination with the processes governing physical and psychological states was shared by medical and fiction writers alike This is a study of pathology in Victorian fiction

Hysterical Men Mark S MICALE, Mark S Micale, 2009-06-30 Over the course of several centuries Western masculinity has successfully established itself as the voice of reason knowledge and sanity the basis for patriarchal rule in the face of massive testimony to the contrary This book boldly challenges this triumphant vision of the stable and secure male by examining the central role played by modern science and medicine in constructing and sustaining it

The Female Body in Medicine and Literature Andrew Mangham, Greta Depledge, 2013-08-15 Drawing on a range of texts from the seventeenth century to the present The Female Body in Medicine and Literature explores accounts of motherhood fertility and clinical procedures for what they have to tell us about the development of women's medicine The essays here offer nuanced historical analyses of subjects that have received little critical attention including the relationship between gynecology and psychology and the influence of popular art forms on so-called women's science prior to the twenty-first century Taken together these essays offer a wealth of insight into the medical treatment of women and will appeal to scholars in gender studies literature and the history of medicine

Media, Technology, and Literature in the Nineteenth Century Margaret Linley, 2016-04-29 Operating at the intersection where new technology meets literature this collection discovers the relationship among image sound and touch in the long nineteenth century The chapters speak to the special mixed media properties of literature while exploring the important interconnections of science technology and art at the historical moment when media was being theorized debated and scrutinized Each chapter focuses on a specific visual acoustic or haptic dimension of media while also calling attention to the relationships among the three Famous works such as Wordsworth's I wandered lonely as a cloud and Shelley's Frankenstein are discussed alongside a range of lesser-known literary scientific and pornographic writings Topics include the development of a print culture for the visually impaired the relationship between photography and narrative the kaleidoscope and modern urban experience Christmas gift books poetry painting and music as remediated forms the interface among the piano telegraph and typewriter Ernst Heinrich Weber's model of rationalized tactility and how the shift from visual to auditory telegraphic instruments amplified anxieties about the place of women in nineteenth-century information networks Full of surprising insights and connections the collection offers

new impetus for stimulating historical conversations and debates about nineteenth century media while also contributing fresh perspectives on new media and re mediation today George Gissing and the Woman Question Christine Huguet,2016-04-22 Approaching its subject both contextually and comparatively George Gissing and the Woman Question reads Gissing s novels short stories and personal writings as a crux in European fiction s formulations of gender and sexuality The collection places Gissing alongside nineteenth and twentieth century authors as diverse as Paul Bourget Ella Hepworth Dixon May Sinclair and Theodore Dreiser theorizing the ways in which late Victorian sexual difference is challenged explored and performed in Gissing s work In addition to analyzing the major novels essays make a case for Gissing as a significant short story writer and address Gissing s own life and afterlife in ways that avoid biographical mimetics The contributors also place Gissing s work in relation to discourses of subjectivity and intersubjectivity identity public space class and labour especially literary production Increasingly viewed as a key chronicler of the late Victorian period s various redefinitions of sexual difference Gissing is here recognized as a sincere uncompromising chronicler of social change **George Gissing, the Working Woman, and Urban Culture** Emma Liggins,2017-09-29 George Gissing s work reflects his observations of fin de si cle London life Influenced by the French naturalist school his realist representations of urban culture testify to the significance of the city for the development of new class and gender identities particularly for women Liggins s study which considers standard texts such as The Odd Women New Grub Street and The Nether World as well as lesser known short works examines Gissing s fiction in relation to the formation of these new identities focusing specifically on debates about the working woman From the 1880s onward a new genre of urban fiction increasingly focused on work as a key aspect of the modern woman s identity elements of which were developed in the New Woman fiction of the 1890s Showing his fascination with the working woman and her narrative potential Gissing portrays women from a wide variety of occupations ranging from factory girls actresses prostitutes and shop girls to writers teachers clerks and musicians Liggins argues that by placing the working woman at the center of his narratives rather than at the margins Gissing made an important contribution to the development of urban fiction which increasingly reflected current debates about women s presence in the city Prosthetic Body Parts in Nineteenth-Century Literature and Culture Ryan Sweet,2021-12-03 This open access book investigates imaginaries of artificial limbs eyes hair and teeth in British and American literary and cultural sources from the nineteenth and early twentieth century Prosthetic Body Parts in Nineteenth Century Literature and Culture shows how depictions of prostheses complicated the contemporary bodily status quo which increasingly demanded an appearance of physical wholeness Revealing how representations of the prostheticized body were inflected significantly by factors such as social class gender and age Prosthetic Body Parts in Nineteenth Century Literature and Culture argues that nineteenth century prosthesis narratives though presented in a predominantly ableist and sometimes disablist manner challenged the dominance of physical completeness as they questioned the logic of prostheticization or presented non normative subjects in

threateningly powerful ways Considering texts by authors including Charles Dickens Edgar Allan Poe and Arthur Conan Doyle alongside various cultural medical and commercial materials this book provides an important reappraisal of historical attitudes to not only prostheses but also concepts of physical normalcy and difference **Tears, Liquids and Porous**

Bodies in Literature Across the Ages Norbert Lennartz, 2021-08-26 Taking in works from writers as diverse as William Shakespeare William Wordsworth Charlotte Bront John Keats James Joyce and D H Lawrence this book spans approximately 300 years and unpacks how bodily liquidity porosity and petrification recur as a pattern and underlie the chequered history of the body and genders in literature Lennartz examines the precarious relationship between porosity and its opposite closure containment and stoniness and explores literary history as a meandering narrative in which female porosity and manly stoniness clash showing how different societies and epochs respond to and engage with bodily porosity This book considers the ways that this relationship is constantly renegotiated and where effusive and feminine genres such as sloppy letters and streams of consciousness are pitted against stony and astringent forms of masculinity like epitaphs sonnets and the Bildungsroman **Literature and Science** Martin Willis, 2014-12-01 This Guide introduces literature and science as a vibrant field of critical study that is increasingly influencing both university curricula and future areas of investigation Martin Willis explores the development of the genre and its surrounding criticism from the early modern period to the present day focusing on key texts topics and debates
