Kristl, 2020 **Basic Principles of Property Law** Ugo Mattei, 2000-01-30 The first attempt to address comparative property law in a common integrative framework this study discusses German Italian French American and British property law as mere variations based upon a few fundamental themes through which these nations developed legal systems to provide responses to common economic problems and to set legal foundations for working markets Basic Principles of Property Law was produced to offer a common framework for the discussion of the law of property within countries in transition thus it has its basis not on just one legal system but on the institutional commonalities that make western property law a working market institution It offers a major challenge to conventional thinking that in property law the differences between common law and civil law are so important that common core research is impossible Mattei hopes to guide the reader to think comparatively about property by shedding many preconceived formalistic abstractions The substance of property law he argues is much more common throughout the Western legal tradition than legal scholars would have us believe Through a set format and accessible writing this book looks at national legal traditions as responses to common economic problems It sets the foundations for further much needed integrative comparative legal research in the domain of property law Real Property and Real People Kevin J. Gray, P. D. Symes, 1981 *Principles of Intellectual Property Law* Catherine Colston, 1999-09-20 An undergraduate textbook written specifically for law students setting out the core principles for each of the main intellectual property rights in an understandable fashion The law presented is that of the UK as it is shaped by European Union and Convention obligations
