Nikiforos Diamandouros,Richard Gunther,2001-06-11 In the acclaimed Politics of Democratic Consolidation Nikiforos Diamandouros Richard Gunther and their co authors showed how democratization unfolded in Greece Italy Portugal and Spain culminating in consolidated democratic regimes This volume continues that analysis posing the basic question What kind of democratic politics emerged in those countries It presents systematic analyses of the basic institutions of government and of the dynamics of electoral competition in the four countries set in comparative context alongside several other democracies as well as detailed studies of the evolution of the major parties their electorates their ideologies and their performances in government over the past twenty years The authors reach two major conclusions First the new democracies salient features are moderation centripetalism and the democratization of erstwhile antisystem parties on the Right and Left Second no single Southern European model has emerged the systems differ from one another about as much as do the other established democracies of Europe Contributors P Nikiforos Diamandouros University of Athens Richard Gunther Ohio State University Thomas C Bruneau Naval Postgraduate School Monterey Arend Lijphart University of California at San Diego Leonardo Morlino University of Florence Risa A Brooks Stanford University Jos R Montero Autonomous University of Madrid Giacomo Sani University of Pavia Paolo Segatti University of Trieste Gianfranco Pasquino University of Bologna Takis S Pappas College Year Athens Hans Jrgen Puhle Goethe University Frankfurt am Main Anna Bosco University of Trieste *Mapping Value Orientations in Central and Eastern Europe* Loek Halman,Malina Voicu,2010-11-11 This volume elaborates on a number of issues that seem particular important for the people in Central and Eastern Europe the development and working of democracy the public support for legitimacy and efficacy of democracy and the free market economy and of course the stability of the newly established political culture **Ideology and Identity** Pradeep K. Chhibber,Rahul Verma,2018-08-24 Indian party politics commonly viewed as chaotic clientelistic and corrupt is nevertheless a model for deepening democracy and accommodating diversity Historically though observers have argued that Indian politics is non ideological in nature In contrast Pradeep Chhibber and Rahul Verma contend that the Western European

paradigm of ideology is not applicable to many contemporary multiethnic countries In these more diverse states the most important ideological debates center on statism the extent to which the state should dominate and regulate society and recognition whether and how the state should accommodate various marginalized groups and protect minority rights from majorities Using survey data from the Indian National Election Studies and evidence from the Constituent Assembly debates they show how education the media and religious practice transmit the competing ideas that lie at the heart of ideological debates in India     The Oxford Handbook of Business and Government David Coen,Wyn Grant,Graham Wilson,2010-02-25 Business is one of the major power centres in modern society The state seeks to check and channel that power so as to serve broader public policy objectives However if the way in which business is governed is ineffective or over burdensome it may become more difficult to achieve desired goals such as economic growth or higher levels of employment In a period of international economic crisis the study of how business and government relate to each other in different countries is of more central importance than ever These relationships have been studied from a number of different disciplinary perspectives business studies economics economic history law and political science and all of these are represented in this handbook The first part of the book provides an introduction to the ways in which five different disciplines have approached the study of business and government The second section on the firm and the state looks at how these entities interact in different settings emphasising such phenomena as the global firm and varieties of capitalism The third section examines how business interacts with government in different parts of the world including the United States the EU China Japan and South America The fourth section reviews changing patterns of market governance through a unifying theme of the role of regulation Business government relations can play out in divergent ways in different policy and the fifth section examines the contrasts between different key arenas such as competition policy trade policy training policy and environmental policy The volume provides an authoritative overview with chapters by leading authorities on the current state of knowledge of business government relations but also points to ways in which this work might be developed in the future e g through a political theory of the firm     Global Histories of the Portuguese Revolution Luís Trindade,Rita Lucas Narra,Ricardo Noronha,Pedro Ramos Pinto,2025-05-29 The Portuguese revolution marked the closure of the country s five centuries of imperial history as well as its 48 year authoritarian period a dramatic moment of political radicalization and social conflict that took place against the backdrop of rapid social transformation in an increasingly globalised world This collection goes beyond the limits of national history to locate the revolution at the intersection of transnational historical phenomena such as the long 1960s the Cold War the emergence of the Third World and postwar modernization Foregrounding the complex geographies and chronologies of semi peripheral Portugal this book combines its status as the centre of a global Empire with its subaltern position in Europe Offering a new global approach to this still understudied event chapters explore transnational socialist and grassroots forms of solidarity processes of global communication and Cultural Revolution decolonization feminism and

socio economic transformations to offer a non Eurocentric global history from within Europe itself *The 1999-2000 Elections in Russia* Vicki L. Hesli, William M. Reisinger, 2003-08-18 Sample Text **Nationalism, Violence and Democracy** Ludger Mees, 2003-06-24 Ludger Mees offers the first comprehensive study of one of Europe's most protracted ethnic conflicts. He carefully analyzes both the historical roots of the conflict and its later growing violent dimension. Special attention is paid to the framing of a new opportunity structure during the 1990s which facilitated the first serious but ultimately frustrated attempt to broker a settlement. In the light of different theoretical and comparative approaches the reasons for the dramatic return of terrorism and the possibilities of a more successful conflict de-escalation in the near future are discussed *The Politics and Memory of Democratic Transition* Diego Muro, Gregorio Alonso, 2010-11-23 Most accounts on the Spanish transition to democracy of the late 1970s are based on a false dilemma. Its simplest formulation could be: was it the pressure from below, i.e. the organized working classes, students and neighbors associations that triggered political change, or was the elite settlement reached by the regime, soft liners and the moderate sectors of the democratic opposition that established it? This new and innovative volume appraises the movement towards a more democratic Spain from a variety of important perspectives. The collection of essays sheds light on the wide range of crucial processes, institutions and actors involved in the political transformation that operated in the Spanish instance of the Third Wave of democratization. By making comparisons to other democratic transitions, synthesizing the ideas of several leading Spanish History scholars as well as incorporating new voices involved in creating the directions of research to come, *The Politics and Memory of Democratic Transition* offers a thorough and vital look at this key period in contemporary Spanish history, taking stock of critical lessons to be gleaned from the Spanish Transition and pointing the way toward its future as a democratic nation **Democratic Consolidation in Eastern Europe: Volume 2: International and Transnational Factors** Jan Zielonka, Alex Pravda, 2001-06-14 This is the second volume in a two-volume series of books on democratic consolidation in Eastern Europe. The first volume focused on the issue of institutional engineering. This second volume analyses the external parameters of democratic consolidation in thirteen Eastern European countries: how different international actors and various economic, cultural and security types of transnational pressures have shaped democratic politics in the region. The aim is to contrast a set of democracy theories with empirical evidence accumulated in Eastern Europe over the last ten years. The volume tries to avoid complex debates about definitions, methods and the uses and misuses of comparative research. Instead, it seeks to establish what has really happened in the region and which of the existing theories are helpful in explaining these developments. The volume is divided into two parts. The first part presents a conceptual and comparative frame of analysis; the second consists of detailed studies of individual countries undergoing democratic consolidation. Case study chapters deal with the following countries: Estonia and Latvia, Hungary, Poland, the Czech Republic, Slovakia, Romania, Bulgaria and Macedonia, the states of former Yugoslavia, Belarus and Ukraine, and finally Russia. The concluding chapter identifies a set of variables

responsible for the enormous impact of external factors on democratic consolidation in Eastern Europe It conceptualises the interplay of internal and external factors impinging upon democracy and shows the interplay of different positive and negative types of external pressures It also evaluates the conscious Western effort to craft or engineer democracy in Eastern Europe

**Democracy's Voices** Robert M. Fishman, 2018-07-05 Building on one of sociology's core ideas that social ties can shape collective outcomes Democracy's Voices shows that connections across class boundaries can remake public rhetoric and thus the quality of democratic life Robert M Fishman takes up a question of enduring significance to people concerned with the quality of democratic public life focusing on why political rhetoric proves engaging and broadly relevant or disengaging and narrow The answer to that question he argues is to be found not only in the deeds of prominent politicians and the nature of official institutions but also in the existence and the character of social connections among ordinary citizens Fishman's book based on long term fieldwork and systematic survey research in Spain identifies the special contribution to democratic quality made by conversations between intellectuals and workers Fishman focuses on what he calls the discursive horizons of local leaders and communities the actual location of the problems and proposed remedies articulated in political rhetorics Democracy's Voices shows how the subcultural context of social ties may accentuate or diminish their power to reshape rhetorics Fishman argues that conversations are able to remake public rhetorics whereas ties that take the form of brokerage lack that ability The book also offers a general critique of social capital theory and argues that the full ability of social ties to shape collective outcomes can only be observed when one distinguishes in useful ways among types of ties

**Power, Money, and Media** Jinquan Li, 2000 This book addresses as few books in English have a broad range of topics pertaining to China's expanding media and telecommunications systems American and Chinese experts in journalism communication government and political science use fieldwork including participant observations surveys and in depth interviews conducted within media organizations to provide richly detailed analyses of the issues and of the changing face of media in China

**The Legacies of Law** Jens Meierhenrich, 2008-10-13 Focusing on South Africa during the period 1650-2000 this book examines the role of law in making democracy work in changing societies The Legacies of Law sheds light on the neglected relationship between path dependence and the law Meierhenrich argues that legal norms and institutions even illiberal ones have an important and hitherto undertheorized structuring effect on democratic outcomes Under certain conditions law appears to reduce uncertainty in democratization by invoking common cultural backgrounds and experiences In instances where interacting adversaries share qua law reasonably convergent mental models transitions from authoritarian rule are shown to be less intractable Meierhenrich's historical analysis of the evolution of law and its effects in South Africa during the period 1650-2000 compared with a short study of Chile from 1830-1990 shows how and when legal norms and institutions serve as historical causes to both liberal and illiberal rule

**Citizens, Democracy, and Markets Around the Pacific Rim** Russell J. Dalton, To-ch'öl Sin, 2006-11-02 East Asia is one

of the most dynamic areas of political change in the world today what role do citizens play in these processes of change Drawing upon a unique set of coordinated public opinion surveys conducted by the World Values Survey this book provides a dramatically new image of the political cultures of East Asia Most East Asian citizens have strong democratic aspirations even in still autocratic nations Most East Asians support liberal market reforms even in nations where state socialism has been dominant The books findings thus provide a new perspective on the political values of Asian publics We demonstrate that the dramatic socioeconomic changes of the past several decades have transformed public opinion altering many of the social norms traditionally identified with Asian values and creating public support for further political and economic modernization of the region Political culture in East Asia is not an impediment to change but creates the potential for even greater democratization and marketization Comparative Politics is a series for students and teachers of political science that deals with contemporary government and politics The General Editors are Max Kaase Professor of Political Science Vice President and Dean School of Humanities and Social Science International University Bremen Germany and Kenneth Newton Professor of Comparative Politics University of Southampton The series is produced in association with the European Consortium for Political Research

*Political Disaffection in Contemporary Democracies* Mariano Torcal, José Ramón Montero, 2006-04-18 Citizens of many democracies are becoming more critical of basic political institutions and detached and disaffected from politics in general This is a new comparative analysis of this trend that focuses on major democracies throughout Latin America Asia and Central Europe It brings together leading scholars to address three key areas of the current debate the conceptual discussion surrounding political disaffection the factors causing voters to turn away from politics the actual consequences for democracy This is a highly relevant topic as representative democracies are coming to face new developments It deals with the reasons and consequences of the so called democratic deficit in a systematic way that enables the reader to develop a well rounded sense of the area and its main debates This book is an invaluable resource for all students of political science sociology cultural studies and comparative politics

*Democracy, Intermediation, and Voting on Four Continents* Richard Gunther, Hans-Jürgen Puhle, José R. Montero, 2007 This book presents the results of systematic comparative analyses of electoral behavior and support for democracy in 13 countries on four continents It is based on national election surveys held in old and new democracies in Europe Germany Britain Spain Greece Italy Portugal Bulgaria North and South America the United States Chile and Uruguay and Asia Hong Kong between 1990 and 2004 It is methodologically innovative notwithstanding the fact that its core concern with political intermediation i e the flow of political information from parties and candidates to voters through the mass communications media membership in secondary associations and direct face to face contacts within interpersonal networks was first introduced to the study of electoral behavior by Paul Lazarsfeld and his collaborators in the 1940s In addition to reviving that long neglected analytical framework this book breaks new ground by systematically exploring the impact of socio political values on electoral behavior

It also analyzes the role of political intermediation in forming basic attitudes towards democracy which are crucial for the consolidation of new democracies and in turn channeling those orientations into various forms of political behavior Some of the findings presented in this volume are dramatic and clearly reveal that these channels of information are among the most powerful factors influencing the development of political attitudes and partisan electoral behavior So too are socio political values in some countries particularly the United States This volume is the first book length product of the now 18 country Comparative National Elections Project Contemporary Greece and Europe Achilleas Mitsos, Elias Mossialos, 2019-07-17 This title was first published in 2000 Contemporary Greek society is characterized by an all embracing trend for reform This task however is constrained by problems of Greek polity rooted in the historical and political culture This text explores the important facets of divergence between Greece and the EU examining the process through which they affect the relative performance of the country in the economic social political and international relations fronts together with significant attempts to modernize and rationalize internal and external policies and structures The book is in five parts In the first introductory section Greece s Alternate Minister of Foreign Affairs the late Yannis Kranidiotis analyzes the fundamental objectives of Greek foreign policy whilst the editors explore the challenges of EU membership for Greek domestic and foreign politics and Greece s participation in the process of European integration The second part deals with Greece and the EMU the third analyzes the issues related to state modernization and adjustment A fourth section examines the welfare state and related policies and the final part analyzes Greece s foreign policy and external relations with particular emphasis on the Balkans and Greek Turkish relations
