Law in American History, Volume III G. Edward White, 2019-04-25 In Law in American History Volume III 1930 2000 the eminent legal scholar G Edward White concludes his sweeping history of law in America from the colonial era to the near present Picking up where his previous volume left off at the end of the 1920s White turns his attention to modern developments in both public and private law One of his findings is that despite the massive changes in American society since the New Deal some of the landmark constitutional decisions from that period remain salient today An illustration is the Court's sweeping interpretation of the reach of Congress's power under the Commerce Clause in Wickard v Filburn 1942 a decision that figured prominently in the Supreme Court's recent decision to uphold the Affordable Care Act In these formative years of modern American jurisprudence courts responded to and affected the emerging role of the state and federal governments as regulatory and redistributive institutions and the growing participation of the United States in world affairs They extended their reach into domains they had mostly ignored foreign policy executive power criminal procedure and the rights of speech sexuality and voting Today the United States continues to grapple with changing legal issues in each of those domains Law in American

History Volume III provides an authoritative introduction to how modern American jurisprudence emerged and evolved of the course of the twentieth century and the impact of law on every major feature of American life in that century White s two preceding volumes and this one constitute a definitive treatment of the role of law in American history

The Television Code Deborah L. Jaramillo,2018-09-26 The broadcasting industry s trade association the National Association of Broadcasters NAB sought to sanitize television content via its self regulatory document the Television Code The Code covered everything from the stories images and sounds of TV programs no profanity illicit sex and drinking negative portrayals of family life and law enforcement officials or irreverence for God and religion to the allowable number of commercial minutes per hour of programming It mandated that broadcasters make time for religious programming and discouraged them from charging for it And it called for tasteful and accurate coverage of news public events and controversial issues Using archival documents from the Federal Communications Commission NBC the NAB and a television reformer Senator William Benton this book explores the run up to the adoption of the 1952 Television Code from the perspectives of the government TV viewers local broadcasters national networks and the industry s trade association Deborah L Jaramillo analyzes the competing motives and agendas of each of these groups as she builds a convincing case that the NAB actually developed the Television Code to protect commercial television from reformers who wanted more educational programming as well as from advocates of subscription television an alternative distribution model to the commercial system By agreeing to self censor content that viewers local stations and politicians found objectionable Jaramillo concludes the NAB helped to ensure that commercial broadcast television would remain the dominant model for decades to come

The Television Code Deborah L. Jaramillo,2018-09-26 The

broadcasting industry's trade association the National Association of Broadcasters NAB sought to sanitize television content via its self-regulatory document the Television Code. The Code covered everything from the stories, images, and sounds of TV programs: no profanity, illicit sex, and drinking; negative portrayals of family life and law enforcement officials; or irreverence for God and religion. It also set the allowable number of commercial minutes per hour of programming. It mandated that broadcasters make time for religious programming and discouraged them from charging for it. And it called for tasteful and accurate coverage of news, public events, and controversial issues. Using archival documents from the Federal Communications Commission, NBC, the NAB, and a television reformer, Senator William Benton, this book explores the run-up to the adoption of the 1952 Television Code from the perspectives of the government, TV viewers, local broadcasters, national networks, and the industry's trade association. Deborah L. Jaramillo analyzes the competing motives and agendas of each of these groups as she builds a convincing case that the NAB actually developed the Television Code to protect commercial television from reformers who wanted more educational programming as well as from advocates of subscription television, an alternative distribution model to the commercial system. By agreeing to self-censor content that viewers, local stations, and politicians found objectionable, Jaramillo concludes, the NAB helped to ensure that commercial broadcast television would remain the dominant model for decades to come.

Television, Regulation and Civil Society in Asia Philip Kitley, 2003-08-29 This highly topical book exposes the tensions between state policies of broadcasting regulation and practices of civil society in the Asian region, which is struggling with its incorporation into a new globalized electronic information and entertainment world. Kitley critically compares Western principles of broadcasting, civil society, and cultural regulation with alternative Asian practices of regulation and organization. Over the past forty years, Asian states have used television as a normative cultural force in nation building, but more recently, many states have deregulated their television sectors and introduced national commercial and international satellite services. As Asian states wrestle with a perceived loss of cultural control and identity through deregulation, this book considers their viewpoints and the question of whether the television public sphere offers space for the representation of popular sovereignty and transversal concerns about human rights, press freedom, gender, environmental, and world trade issues.

Violent Television Programming and Its Impact on Children Kevin J. Martin, 2007-08 Television is an integral part of the lives of American families.
