Regulating The Automobile Studies In Regulation Of Economic Activity:

The Economic Effects of Airline Deregulation Steven Morrison, Clifford Winston, 2010-12-01 In 1938 the U S Government took under its wing an infant airline industry Government agencies assumed responsibility not only for airline safety but for setting fares and determining how individual markets would be served Forty years later the Airline Deregulation Act of 1978 set in motion the economic deregulation of the industry and opened it to market competition This study by Steven Morrison and Clifford Winston analyzes the effects of deregulation on both travelers and the airline industry The authors find that lower fares and better service have netted travelers some 6 billion in annual benefits while airline earnings have increased by 2 5 billion a year Morrison and Winston expect still greater benefits once the industry has had time to adjust its capital structure to the unregulated marketplace and they recommend specific public policies to ensure healthy competition The Political Economy of American Trade Policy Anne O. Krueger, 2007-12-01 Exploring the political and economic determinants of trade protection this study provides a wealth of information on key American industries and documents the process of seeking and conferring protection Eight analytical histories of the automobile steel semiconductor lumber wheat and textile and apparel industries demonstrate that trade barriers rarely have unequivocal benefits and may be counterproductive They show that criteria for awarding protection do not take into account the interests of consumers or other industries and that political influence and an organized lobby are major sources of protection Based on these findings a final essay suggests that current policy fails to consider adequately economic efficiency the public good and indirect negative effects This volume will interest scholars in economics business and public policy who deal with trade issues *Bowker's Law Books and Serials in Print* ,1995 **Journal of Economic Literature** ,1987 **Government Regulation** ,1980 *Economic Books* ,1986 **Fundamentals of Criminal Procedure** Daniel Edgar Hall, 2023-06-20 With a new approach to understanding criminal procedure Fundamentals of Criminal Procedure by Daniel Hall rethinks the traditional format by providing students with a thorough understanding of the constitutional and procedural dimensions of a criminal case from investigation through sentencing Through real life cases contemporary examples and questions and problems in topical sections students are able to relate to the content and apply what they learn With a focus on current challenges facing the criminal justice system including police accountability and governmental power during national emergencies this timely book is a valuable asset to any course seeking to give students a better than formative understanding of criminal procedure **Choice** ,1986 Government Regulatory Activity United States. Brexit and the Car Industry Matthew Humphreys,Doug Munro,2019-05-23 One of the principal arguments put forth by Brexit supporters is that by freeing the UK from the stranglehold of EU law the country will be able to expand its markets through increased bilateral trade and enhance economic growth This book tests this proposition by reference to the car industry Brexit and the Car Industry explores the international position of the car market to argue that the hope of Brexit bringing regulatory freedom is illusory The book starts by examining the structure of the vehicle industry how its regulatory framework evolved and how the environment in which it operates is constrained by international standards and the practicalities associated with trading across different regulatory systems By examining the evolution of vehicle regulations particularly related to the environment it argues that a UK independent path is not only impractical but self defeating The private car market is structured in such a way that is global and meeting the various international regulatory requirements is a price of entry requirement which no bilateral trade agreements are likely to alter The book also considers changing environment affecting the car industry in the context of an aspiration for regulatory freedom The response to climate change and the impact of technological change specifically driverless vehicles are big questions for the industry and both are examined in this book The book also considers the emergence of large metropolitan areas imposing their own use and environmental requirements operating separately to national standards The future of electric and autonomous vehicles combined with the complexity of the regulatory environment with both international and localised pollution measures make the UK navigating a safe independent path through with a viable car industry highly questionable Providing a comprehensive review of the relationship between regulatory frameworks and free trading models this book is aimed at industry and legal professionals It will also be of interest to students studying market behaviour free trade law and the free movement of goods and environmental protection

Governing for Health

Frances Baum, 2019 Some aspects of public health vary by locality or jurisdiction Political challenges are not one of them As governments on every scale become motivated by short term economic gains the essential causes of public health and equity are regularly subject to political questioning and financial shortcutting Governing for Health is a counterpoint to this myopic approach a passionate rigorous case for why the health of a society is both its greatest measure and its most untapped source of prosperity *Regulatory Program of the United States Government* United States.
