## **Regulations Institutions And Commitment Comparative Studies Of Telecommunications:**

**Regulations, Institutions, and Commitment** Brian Levy, Pablo T. Spiller, 1996-08-28 Currently privatization and regulatory reform are often viewed as the solution to the problem of poor performance by telecommunications and other public utilities This volume argues that these high expectations may not always be met because of the way a country's institutions and systems interact *Handbook of Regulatory Authorities* Maggetti, Martino, Di Mascio, Fabrizio, Natalini, Alessandro, 2022-08-12 Featuring a comprehensive analytical collection of interdisciplinary research on regulatory authorities this innovative Handbook combines contributions from leading scholars and regulatory practitioners to present the fundamental theoretical concepts empirical achievements and challenges in the contemporary study of regulatory authorities *Understanding Regulation* Robert Baldwin, Martin Cave, Martin Lodge, 2012 An introduction to the practical and theoretical issues that are central to the study of regulation which a particular focus on contested areas and how they are dealt with *The International Telecommunications Regime: Domestic Preferences and Regime Change* Juan Ratto-Nielsen, 2009-12-26 This study examines the evolution of the international regime in telecommunications with the main objective of furthering our understanding of the process of regime transformation The dominant theories of international relations realism and institutional liberalism specify how states with shared interests use institutions to realize joint gains and to minimize the possibility of defection But these theories have little to say about when states will attempt to change the objectives that lead them to create the international institution in the first place The main goal of this book is to investigate and test the assumption that domestic politics by themselves can explain the dynamics of regime creation evolution and change as it happened within the International Telecommunications Union ITU **The Economics of Contracts** Eric Brousseau, Jean-Michel Glachant, 2002-10-17 A contract is an agreement under which two parties make reciprocal commitments in terms of their behavior to coordinate As this concept has become essential to economics in the last 30 years three main theoretical frameworks have emerged incentive theory incomplete contract theory and transaction costs theory These frameworks have enabled scholars to renew both the microeconomics of coordination with implications for industrial organization labor economics law and economics organization design and the macroeconomics of market decentralized economies and of the institutional framework These developments have resulted in new analyses of a firm's strategy and State intervention regulation of public utilities anti-trust public procurement institutional design liberalization policies etc Based on contributions by the leading scholars in the field this 2002 book provides an overview of developments in these analytical currents presents their various aspects and proposes expanding horizons for theoreticians and practitioners **Evaluation and Development** Robert Picciotto, Eduardo Wiesner DurÃ¡n, 1998 The Institutional Dimension **Evaluation and Development** Eduardo Wiesner, 2017-09-08 This study illustrates the social and political principal that institutions matter It explores not only how to get institutions to work efficiently but also how to assess the proper

relationship between institutions and development challenges through evaluative techniques *Thirsting for Efficiency* M. Shirley, 2002-04-18 One billion people in the world lack safe drinking water and almost 2 billion lack adequate sanitation services As a result millions suffer and die every year from water and sanitation related diseases Poor management and inefficient investment are often responsible for this situation and countless past attempts at reform have accomplished little Recently some developing countries have tried to reverse years of mismanagement of their water and sewerage systems by auctioning contracts to private operators Why do countries that have tolerated mismanagement for decades develop a thirst for efficiency What are the results of their efforts to change What determines success or failure This book fills a gap in the literature by systematically answering these important questions It does so by analyzing reforms in six developing country capitals Buenos Aires Argentina Lima Peru Mexico City Mexico Santiago Chile Abidjan Cote d Ivoire and Conakry Guinea and the United States in the 19th century It not only assesses economic factors but also explores the roles of laws politics and norms It provides an economic theory of water that encompasses institutional political and economic aspects of reform

*Media and Communications Policy Making* Robert G. Picard, 2020-03-25 This textbook focuses on how media and communications policy is made and what influences its design It explores the structures and processes in which policymaking takes place worldwide the factors that determine its forms influence its elements and affect its outcomes It explores how to analyze policy proposals evaluate policy and use policy studies approaches to examine policy and policymaking Truly international in scope it lays out the variety of political social economic and institutional influences on policy the roles of industries and policy advocates in the processes and issues and factors that complicate effective policymaking and skew policy outcomes This textbook is a valuable resource for advanced undergraduate and postgraduate students **From the "democratic Deficit" to a "democratic Surplus"** Athanasios Psygkas, 2017 Challenging the conventional narrative that the European Union suffers from a democratic deficit Athanasios Psygkas argues that EU mandates have enhanced the democratic accountability of national regulatory agencies This is because EU law has created entry points for stakeholder participation in the operation of national regulators these avenues for public participation were formerly either not open or not institutionalized to this degree By focusing on how the EU formally adopted procedural mandates to advance the substantive goal of creating an internal market in electronic communications Psygkas demonstrates that EU requirements have had significant implications for the nature of administrative governance in the member states Drawing on theoretical arguments in favor of decentralization traditionally applied to substantive policy making this book provides insight into regulatory processes to show how the decentralized EU structure may transform national regulatory authorities into individual loci of experimentation that might in turn develop innovative results It thus contributes to debates about federalism governance and public policy as well as about deliberative and participatory democracy in the United States and Europe This book informs current understandings of regulatory agency operations and institutional design by drawing on an

original dataset of public consultations and interviews with agency officials industry and consumer group representatives in Paris Athens Brussels and London The on the ground original research provides a strong foundation for the directions the case law could take and small and larger scale institutional reforms that balance the goals of democracy accountability and efficiency

Jacket Institutions and Development M. M. Shirley, 2010-01-01 Both economic research and the history of foreign aid suggest that the largest barriers to development arise from a society s institutions its norms and rules This book explains how institutions drive economic development It provides numerous examples to illustrate the complex interlocking and persistent nature of real world rules and norms
