Regulatory Realities The Implementation And Impact Of Industrial Environmental Regulation:

Regulatory Realities Andrew Gouldson, Joseph Murphy, 2013-11-05 Arguing that the performance of industrial environmental regulation is determined by the level and nature of the innovation it stimulates this text aims to analyze the influence of different structures and styles of implementation on innovation in regulated companies Further aims include examining the economic and environmental performance of different forms of innovation developed and applied by industry in response to regulation describing the conditions under which industrial environmental regulation can be improved outlining the implementation approaches required for regulated companies to overcome barriers which prevent them from exploiting the economic and environmental potential of particular forms of innovation demonstrating how technological and organizational change could lead to lower costs and higher benefits from regulatory compliance and putting forward to governments and industry proposals to improve the relationship between environmental protection and industrial competitiveness

The New Environmental Regulation Daniel J. Fiorino, 2006 Winner 2007 Louis Brownlow Award presented by the National Academy of Public Administration NAPA and 2006 Best Book in Environmental Management and Policy American Society for Public Administration Environmental regulation in the United States has succeeded to a certain extent in solving the problems it was designed to address air water and land are indisputably cleaner and in better condition than they would be without the environmental controls put in place since 1970 But Daniel Fiorino argues in *The New Environmental Regulation* that given recent environmental economic and social changes it is time for a new more effective model of environmental problem solving Fiorino provides a comprehensive but concise overview of U S environmental regulation its history its rationale and its application and offers recommendations for a more collaborative flexible and performance based alternative Traditional environmental regulation was based on the increasingly outdated assumption that environmental protection and business are irreversibly at odds The new environmental regulation Fiorino describes is based on performance rather than on a narrow definition of compliance and uses such policy instruments as market incentives and performance measurement It takes into consideration differences in the willingness and capabilities of different firms to meet their environmental obligations and it encourages innovation by allowing regulated industries especially the better performers more flexibility in how they achieve environmental goals Fiorino points to specific programs including the 33 50 Program innovative permitting and the use of covenants as environmental policy instruments in the Netherlands that have successfully pioneered these new strategies By bringing together such a wide range of research and real world examples Fiorino has created an invaluable resource for practitioners and scholars and an engaging text for environmental policy courses

Agribusiness and Society Kees Jansen, Sietze Vellema, 2013-07-04 This volume examines how far agribusiness corporations are responding to the opportunities and pressures resulting from emerging environmental awareness In particular in what ways are they changing their R some changed their production practices in a sustainable way while others have complied with or resisted state environmental regulation notably labelling systems and certification Each study explores how institutional cultural economic political and technological contexts shape the strategies of big business Topics include green bananas genetically modified tomatoes and soy the new markets in organic produce health and pesticides and access to justice The book explains why some corporations are successful in introducing environmentally friendly innovations and others are not The key to understanding contrasting outcomes is examining the interaction between internal corporate environments where profit and efficiency considerations predominate and external environments where consumer preferences NGO pressures and government regulation are important The book also explores possible new roles for the public sector The result is a sophisticated and critical analysis of business practices and regulatory systems in the agro food sector

International Harmonization of Financial Regulation? Hyoungh-kyu Chey, 2014-01-02 It is often argued that international financial regulation has been substantially strengthened over the past decades through the international harmonization of financial regulation There are however still frequent outbreaks of painful financial crises including the recent 2008 global financial crisis This raises doubts about the conventional claims of the strengthening of international financial regulation This book provides an in depth political economy study of the adoptions in Japan Korea and Taiwan of the 1988 Basel Capital Accord the now so called Basel I which has been at the center of international banking regulation over the past three decades highlighting the domestic politics surrounding it The book illustrates that despite banks formal compliance with the Accord in these countries their compliance was often cosmetic due to extensive regulatory forbearance that allowed their real capital soundness to weaken Domestic politics thus ultimately determined national implementations of the Accord This book provides its novel innovative study of the Accord through scores of interviews with bank regulators and analysis of various primary documents It suggests that the actual effectiveness of international financial regulation relies ultimately on the domestic politics surrounding it It implies as well that the past trend of international harmonization of financial regulation may be illusory to at least some extent in terms of its actual effectiveness This book may interest not only political economists but also scholars working on the intersection of law economics and institutions

Governing Technology for Sustainability Joseph Murphy, 2012-06-25 In a world of

growing complexity and dwindling resources the relationship between technology and sustainability is a pressing issue of concern at the highest levels This book improves our understanding by examining the ways that people technology and governance shape each other with implications for sustainability It is the first book to link technology studies and governance research to this problem Contributions from leading environmental social scientists are included with each chapter reporting on new research and tackling complex but vital issues Drawing on examples such as wave and tidal power wind power micro generation community waste recycling and eco housing the book provides powerful new insights into the governance of technology for sustainability A detailed introduction and conclusion discuss existing research directions and identify the contribution that the book makes in advancing our understanding of the people technology governance nexus and its implications for sustainability This is essential reading for all those in academia government and industry working at the critical interface between how we develop deploy and govern technology in the pursuit of sustainability **International**

Aid and China's Environment Katherine Morton, 2006-05-17 Rapid economic growth in the world's most populous nation is leading to widespread soil erosion desertification deforestation and the depletion of vital natural resources The scale and severity of environmental problems in China now threaten the economic and social foundations of its modernization Using case studies Morton analyzes the relationship between international and local responses to environmental problems in China challenging the prevailing wisdom that weak compliance is the only constraint upon local environmental management in China It advances two interrelated discussions first it constructs a conceptual framework for understanding the key dimensions of environmental capacity This is broadly defined to encompass the financial institutional technological and social aspects of environmental management Second the book presents the results of an empirical inquiry into the implementation of donor funded environmental projects in both China's poorer and relatively developed regions By drawing upon extensive fieldwork it seeks to explain how and under what conditions international donors can strengthen China's environmental capacity especially at the local level It will be of interest to those studying Chinese politics environmental studies and international relations *The Regulation of Animal Health and Welfare* John McEldowney, Wyn Grant, Graham

Medley, 2013-09-05 *The Regulation of Animal Health and Welfare* draws on the research of scientists lawyers economists and political scientists to address the current and future regulatory problems posed by the issues of animal health and disease Recent events such as the outbreak of mad cow disease epidemics of foot and mouth disease concerns about bluetongue in sheep and the entry into the food chain of the offspring of cloned cattle have heightened awareness of the issues of regulation in animal disease and welfare This book critically appraises the existing regulatory institutions and guiding principles of how best to maintain animal health in the context of social change and a developing global economy Addressing considerations of sound science the role of risk management and the allocation of responsibilities it also takes up the theoretical and practical challenges which here and elsewhere attend the co operation of scientists social scientists lawyers

and policy makers Indeed the collaboration of scientists and social scientists in determined and regulatory contexts such as that of animal disease is an issue of ever increasing importance This book will be of considerable value to those with interests in this issue as well as those concerned with the law and policy relating to animal health and welfare Resource Recovery from Wastes Lynne E Macaskie, Devin J Sapsford, Will M Mayes, 2019-10-15

The concept of a circular economy has been gaining increasing attention in recent years Many of the sources of chemicals we have become reliant on are dwindling and the accumulation of waste products poses a serious environmental problem By recovering resources from these waste materials we can reduce our dependence on virgin feedstocks that may not be sustainable as well as reducing the quantity of material going to landfill sites Incorporating different perspectives from a global authorship this book aims to introduce systems thinking to the field of waste and resource management The topics covered range from the use of biogeochemical processes in resource recovery to the application of engineered nanomaterials with information relevant to both academia and industry The broad range and cross disciplinary nature of the topics in this book make it a valuable resource for those working in circular economy research green chemistry and waste and resource management **Corporate Criminal**

Liability in Environmental Jurisprudence Indrajit Dube, Mia Mahmudur Rahim, 2025-09-08 Environmental jurisprudence is a dynamic field that integrates insights from various disciplines including basic sciences earth science economics and law At its core this discipline emphasizes the importance of enforcing rights as environmental pollution poses significant threats to individuals and society as a whole The repercussions of pollution are not confined to the immediate vicinity they can reverberate across vast regions and impact countless future generations Addressing pollution as a wrong or crime demands a nuanced understanding of the law making the study of environmental jurisprudence essential This book explores corporate polluter liability within the framework of environmental jurisprudence While protective measures for the environment have been embedded in various statutes since the early 20th century the notion of environmental jurisprudence has only recently come to the forefront of legal discourse This field is crucial for safeguarding the natural and legal rights of individuals communities and the state With a comprehensive approach that encompasses both national and international dimensions this book critically engages with the foundational concepts of environmental jurisprudence exposing the rampant environmental violations perpetrated by corporations and outlining how these entities can be held accountable within regulatory frameworks Furthermore it provides a thorough analysis of essential international instruments aimed at combatting corporate induced environmental degradation offering recommendations to elevate corporate criminal liability within the realm of environmental jurisprudence scholarship Highlighting the urgent need for accountability but also inspiring action toward a sustainable future this book will interest legal scholars researching on criminal liability and environmental law

Implementing European Environmental Policy Matthieu Glachant, 2001-12-21 This significant book investigates the political economy of environmental policy in Europe with a careful analysis of how EU directives are realised in the member

states The authors explore this issue through a comparative evaluation of the implementation of three pieces of EU environmental legislation in France Germany the Netherlands and the UK Areas covered by the legislation include air emission standards for waste incinerators the electricity supply industry and the certification of environmental management systems The results vary across cases even though overcompliance is observed in certain cases The regularity arising from the different case studies is related to the determinants of the environmental outcomes that are observed When environmental directives are implemented they are likely to interact with parallel policy processes and these interactions can exert a strong positive or negative influence on the success of the policy in question The central policy problem is the fact that these interactions are very difficult to anticipate at the policy formulation stage It leads the authors to propose that effective environmental policy should therefore be adaptable in order to cope with these unanticipated effects

Sustainability Michael Redclift, 2002-02-07 Michael Redclift is a very big name in this area of study and well known for his previous work and publications The book deals with most of the main components of sustainable development health economic policy land use ethics and education Covers both developed and developing countries many books on sustainable development just cover developing Written by a multi disciplinary team of contributors from an interdisciplinary department geographers economists lawyers and sociologists Topic of sustainability has enjoyed increasing popularity over the last 5 years or so and many of the already published volumes are now out of date

Conflict, Consensus, and Rationality in Environmental Planning Yvonne Rydin, 2003-02-20 We all now recognize the importance of talk today In policy settings there are more and more calls for consultation collaboration and deliberation This is particularly the case in environmental planning with its disputes over genetically modified organisms power plants and new roads Rydin provides an in depth and fully theorized account of the role of talk or discourse within environmental planning combining theory reported research and original empirical case studies She highlights the problem that planners and others face when trying to expand the space for talk within planning situations and provides a detailed assessment of the prospects for consensus building and deliberative democracy She also highlights the role that discourse plays in legitimizing institutions of planning and discusses how a rationality of sustainable development may be embedded within new institutional arrangements

Ahead of the Curve K. Green, P. Groenewegen, P.S. Hofman, 2012-12-06 The debate on sustainable production often ends in discussions on the feasibility of far reaching changes in relation to the competitiveness of companies Industry itself and policy makers tend to back away from engaging in profound processes of industrial transformation Examples of companies who have voluntarily moved beyond what is seen as reasonable and feasible can overcome this deadlock This book collects a fine sample of companies who have taken up their responsibility in this respect To quote the editors of this book They are cases that might provide other firms and policy makers with ideas for innovative environmental responses that are outside the slowly rising trend of improvement that we are currently observing in short the cases are of firms and ideas that are ahead of the curve

The editors and many of the authors of this volume are members of the Greening of Industry Network and have been debating with one another for years. Founded in 1991, the Greening of Industry Network comprises over 1500 individuals representing academia, business, public interest, labor, and government from more than 50 countries. Participants work together to build policies and strategies toward creating a sustainable future through many vehicles: coordinating research efforts, publications, planning, and participating in workshops, public forums, and conferences. To provide benefit to broader society, the Network stimulates public dialogue and brings together academic researchers from many disciplines with other stakeholders who traditionally do not work together in coalitions.

Environmental Politics in Southern Europe K. Eder, M. Kousis, 2012-12-06. Europe is sometimes credited with a polis but not a demos. Political integration and economic globalisation cannot diminish local identity and social memories. This fascinating collection of national case studies shows why there will always be a local demos located in ecology, economy, and society. But there will never be a transnational demos precisely because locality is the basis for meaningful sustainability. Long may it triumph. Tim O'Riordan, CSERGE, University of East Anglia. The book offers a refreshing perspective on the diversity of Europe and at the same time on the interdependence of the policies, economies, and societies of European countries. Going beyond the dichotomies of good and bad and leaders and laggards in environmental matters, the authors contribute to a different understanding of the North-South divide in the process of European integration. Angela Liberatore, European Commission Directorate General for Research. This is a self-consciously revisionist volume whose findings are theoretically significant, policy relevant, and timely. Its insistence on bringing society back in its debunking of the notion of a Mediterranean syndrome, its emphasis on developmental leapfrogging, capacity of late comers to emerge as leaders in contexts of late modernity, and its systematic attempt to reconceptualize the politics of Europeanization should be carefully listed to students and policy makers concerned with collective action. Southern Europe: European integration and environmental politics. P. Nikiforos Diamandouros, University of Athens.

Ecosociology Sources. Series: «Ecosociology» I. Kulyasov, 2017-12-13. In the book, the theoretical sources and the development of ecosociology are covered. Designed for ecosocialism graduate and undergraduate students, ecologists, ecopolitical, and environmental studies.

Corporate Social Responsibility Baxi C.V. & Ray, Rupamanjari Sinha, 2012. Corporate Social Responsibility: A Study of CSR Practices in Indian Industry takes a close look at the CSR scenario in India. While throwing light on the various issues faced by companies and their stakeholders during the implementation of CSR, it also offers strategies and recommendations for improved synergy among the stakeholders and a more effective CSR. The book is based on the authors' primary research study and is illustrated with various company examples and primary surveys on how CSR implementation varies from organization to organization, including family-based firms, public sector enterprises, multinational corporations, and professional enterprises. Sectoral differences in CSR implementation have also been covered, as well as the important issue of CSR reporting practices. With CSR and sustainability

as emerging domains the book will prove to be invaluable for researchers academicians students practitioners and public policy makers

The Handbook of Environmental Voluntary Agreements Edoardo Croci, 2005-10-06 EDOARDO CROCI IEFE Universit Bocconi Milano Italy

Voluntary approaches in environmental policy represent a third wave of regulation in the environmental field Command and control was the first wave Its core is based on uniform emission standards the respect of which needs to be enforced through extensive monitoring and severe sanctions The expected cost of sanction for non compliance calculated as its amount multiplied for the probability to be caught must be superior to the benefits of non compliance in order to let the sanction be effective As the benefits of non compliance can vary among firms sanctions need to be very high in order to be effective In fact sanctions are ordinary correlated to environmental damage and not to the benefits of non compliance But very high sanctions can be difficult to enforce as they appear unfair and can lead to dramatic consequences on firms and workers up to shut downs of plants Ambient standards reduce these problems but oblige the regulator to know a huge amount of information regarding the specific contribution of each polluter to the polluted body Information is difficult to obtain because of asymmetric information and costly to produce because it requires large and skilled regulating and enforcing organizations Nevertheless complex regulation is the base of any environmental policy framework as it allows the policy maker to fully exercise its power of composition of various interests in a relatively transparent way Economic instruments were the second wave
