Inside the Learning Society Stewart Ranson, 1998-11-01 As an approach to the diverse and shifting learning needs of today the learning society labours under a definitional generosity which has led to three different models evolving with competing claims This book traces the history of the concept and lucidly lays out these three interpretive models learning for work learning for citizenship and learning for democracy The book s close scrutiny concludes with an analysis that synthesizes and sharpens our understanding of the learning society With due consideration given to the emerging critique and with chapters from public bodies engaged in implementing learning society principles Inside the Learning Society offers a comprehensive appraisal of ideas and practices This is a book of great significance for anyone concerned

about or involved in the future of education Policymaking and Democracy Stuart S. Nagel, 2003-01-01 Policymaking and Democracy is the first volume of a three volume set that examines the multi dimensional role of policy in the development and promotion of democracy prosperity and peace The democracy volume brings together international contributions on the policy challenges faced by national and multinational bodies to promote a democratic political culture and encourage the growth and development of civil society The work includes chapters on integration and representation within the European Union the expanding role of NGOs and IGOs international parliamentary organs the future of the nation state in a pluralistic world and the importance of global consensus building Reinventing Democracy João Arriscado Nunes, Boaventura de Sousa Santos, 2014-01-02 The studies gathered in this volume focus on Portuguese society from the creative social and political experimentation by citizen and popular movements during the revolution of 1974 75 to more recent episodes of alternative economic organisation popular mobilization over the claim of local populations to self government local environmental conflicts transformations in trade unionism transnational solidarity movements and citizen participation on territorial planning They explicitly explore the relationships and tensions between difference and equality citizenship and difference state society relationships and local identities and European integration as part of broader processes of globalisation and of the emergence of new experiences of active citizenship This volume was previously published as a special issue of the journal South European Society and Politics **The Social Democratic Dilemma** S. Thomson, 2000-05-26 This book examines the development of social democratic parties in Western Europe and suggests that instead of viewing a single model in the past it was more accurate to consider a Northern and Southern European version Each model varied in its characteristics yet each retained an adherence to the same core values But now a new version of social democracy is emerging that is characterised by an advocacy of the tenets of neo liberalism *The Citizens at Risk* Pedro Jacobi, Gordon McGranahan, Jacob Songsore, Marianne Kjellen, Charles Surjadi, 2010-09-23 Local environments such as cities and neighbourhoods are becoming a focal point for those concerned with environmental justice and sustainability The Citizens at Risk takes up this emerging agenda and analyses the key issues in a refreshingly simple yet sophisticated style Taking a comparative look at cities in Africa Asia and Latin America the book examines the changing nature of urban environmental risks the rules governing the distribution of such risks and their differential impact how the risks arise and who is responsible The authors clearly describe the most pressing urban environmental challenges such as improving health conditions in deprived urban settlements ensuring sustainable urban development in a globalizing world and achieving environmental justice along with the greening of development They argue that current debates on sustainable development fail to come to terms with these challenges and call for a more politically and ethically explicit approach For policy makers students academics activists or concerned general readers this book applies a wealth of empirical analysis and theoretical insight to the interaction of citizens their cities and their environment **Stakeholding and New labour** R.

Prabhakar,2003-05-07 In Stakeholding and New Labour Rajiv Prabhakar examines two core claims Firstly that stakeholding furnishes the centre left with a set of Third Way principles of public policy that differ from those previously deployed by the Labour and Conservative parties Secondly Prabhakar contends that while explicit references to stakeholding have been scaled down by New Labour the concept remains important for understanding the ideology and the policies of New Labour in government **Urban Movements in a Globalising World** Pierre Hamel, Henri Lustiger-Thaler, Margit Mayer, 2003-09-02

A Comparative Political Economy of Industrial Capitalism R. Mascarenhas, 2002-10-04 This comparative study of industrial capitalism is an examination of state economy

relations in mixed economies ranging from the interventionist German and Japanese to the less interventionist Anglo American. Following the postwar consensus that resulted in the golden age 1950-1973 and ended with the energy crisis, the Anglo American economies adopted neoliberalism while Germany and Japan remained interventionist. This resulted in the emergence of national types of capitalism. While analyzing the increased competition between them, R. C. Mascarenhas also notes the influence of globalization as well as alternative capitalism with the survival and re-emergence of industrial districts.
