Dramatic increases in the rates of divorce, out of wedlock childbirth and relationship violence lead to questions about the developmental precursors of romantic love and commitment. What's wrong with love and can it be fixed? This book brings together a diverse group of experts from various disciplines to address a serious gap in the understanding of adolescent development. Part I focuses on romantic relations and sexual behavior from the perspective of normative adolescent development. Part II centers on high risk adolescents and Part III explores the practical implications of current theory and research for clinicians, educators and health administrators. **Handbook of Interpersonal Commitment and Relationship Stability** Jeffrey M. Adams, Warren H. Jones, 1999-09-30 A fundamental assumption underlying the formation of our most important relationships is that they will persist indefinitely into the future As an acquaintanceship turns into a friendship for example both members of this newly formed interpersonal bond are likely to expect that their interactions will become increasingly frequent diverse and intimate over time This expectation is perhaps most apparent in romantically involved couples who through a variety of verbal and symbolic means make explicit pledges to a long lasting relationship In either case it is clear that these relationships represent something valuable to the individuals involved and are pursued with great enthusiasm Virtually all close relationships are formed within the context of mutually rewarding interactions and or strong physical attraction between partners Friends and romantically involved couples alike are drawn to one another because of similarity of attitudes interests and personality and quite simply because they enjoy one another's company This enjoyment coupled with the novelty that characterizes new relationships almost makes the continuation of the relationship a foregone conclusion As relationships progress however their novelty fades conflicts may arise between partners negative life events may occur and the satisfaction that previously characterized the relationships may diminish      **Applying Personality-Informed Treatment Strategies to Clinical Practice** Bradley Nevins, 2020-06-09 A strategic approach for positive change tailored to the unique qualities of different individuals this text assists readers in factoring personality functioning into any psychotherapeutic undertaking providing a guide for comprehensive Personality Informed assessment and treatment planning Drawing upon research from across scientific disciplines chapters emphasize the importance of a multidisciplinary approach in effectuating enduring therapeutic change
