Raynaud's disease, essential hypertension, neuromuscular problems, elimination disorders and much more. Textbook of Complementary and Alternative Medicine Chun-Su Yuan, Eric J. Bieber, 2003-02-11. The popularity of complementary and alternative medicine (CAM) has risen sharply in the last decade. This consumer-driven movement affects all specialties of conventional medicine and can influence the decision-making process and practice of primary care physicians. It is critical for today's medical professionals to be familiar with the potential benefits, adverse effects, and interactions of different CAM therapies. Textbook of Complementary and Alternative Medicine presents a sound academic understanding of the healing therapies, approaches, and systems of CAM. The editors take a two-pronged approach to the subject. They discuss the underlying principles and their relevance to conventional medicine and provide in-depth information on specific therapies for common medical conditions. The book focuses on the CAM therapies most often used and therefore most likely to effect a physician's practice. There are a number of CAM books available. However, most of the authors of these books are CAM practitioners, neuropathic physicians, or both. This book is unique in that the contributors are academic physicians and other mainstream professionals. Thoroughly referenced, Textbook of Complementary and Alternative Medicine is a science-based guide to the wide range of herbal and other CAM therapies and to understanding their application to human health and their interaction with conventional medicine.

Stress Scripting Jonathon C. Smith, 1990-12-11. Stress Scripting presents a unique and tested program of stress management. Its basic idea is that writing thought and action scripts for stress situations can enhance effective coping. Comprehensive, scholarly, and very accessible, it is unlike any other stress management book. With a focus on assertiveness training, cognitive restructuring, stress inoculation training, and relaxation, this book is an extremely versatile tool for therapy workshops, university instruction, business consultation, and self-help groups. Innovative topics include the link between assertiveness, defense, and coping; the similarity of problem solving and negotiation; relapse prevention; the phases of stress and stress inoculation training; coping philosophies; and cognitive behavioral relaxation training. Divided into four parts, Stress Scripting is carefully designed to be used either in its entirety or each chapter separately. Part I presents the basic ideas of stress scripting, defense and coping, assertiveness, thinking, and stress cues, reinforcement, and the phases of stress. It concludes with an option to contract for behavior change. Concentrating on behavior change, Part II introduces assertiveness scripts, relapse prevention, problem solving, and negotiation, desensitization, and the coping philosophy. Part III presents an optional cognitive behavioral relaxation training program. Stress Scripting can be integrated with whatever approach the user prefers. Part IV concludes this volume with an extensive series of individual and group exercises.
