Shizhaocun Yu Xishanping:

Ritual and Economy in East Asia Rowan Flad, Anke Hein, Bryan K. Miller, 2023-06-01 In commemoration of Lothar von Falkenhausen's 60th birthday this volume assembles eighteen scholarly essays that explore the intersection between art, economy, and ritual in ancient East Asia. The contributions are clustered into four themes: Ritual, Economy, Ritual and Sacrifice, Technology, Community Interaction, and Objects and Meaning, which collectively reflect the theoretical, methodological, and historical questions that Falkenhausen has been examining via his scholarship, research, and teaching throughout his career. Most of the chapters work with archaeological and textual data from China, but there are also studies of materials from Mongolia, Korea, Southeast Asia, and even Egypt, showing the global impact of Falkenhausen's work. The chronological range of studies extends from the Neolithic through the Bronze Age in China into the early imperial, medieval, and early modern periods. The authors discuss art, economy, ritual, interaction, and technology in the broad context of East Asian archaeology and its connection to the world beyond.

Social Memory and State Formation in Early China Min Li, 2018-05-24 A thought-provoking book on the archaeology of power, knowledge, social memory, and the emergence of classical tradition in early China.

The Archaeology of China Li Liu, Xingcan Chen, 2012-04-30 Past, present, and future. The archaeological materials recovered from the Anyang excavations in the period between 1928 and 1937 have laid a new foundation for the study of ancient China. Li C 1977 ix. When inscribed oracle bones and enormous material remains were found through scientific excavation in Anyang in 1928, the historicity of the Shang dynasty was confirmed beyond dispute for the first time. Li C 1977 ix xi. This excavation thus marked the beginning of a modern Chinese archaeology, endowed with great potential to reveal much of China's ancient history. Half a century later, Chinese archaeology had made many unprecedented discoveries which surprised the world, leading Glyn Daniel to believe that a new awareness of the importance of China will be a key development in archaeology in the decades ahead. Daniel 1981: 211. This enthusiasm was soon shared by the Chinese archaeologists when Su Bingqi announced that the Golden Age of Chinese archaeology is arriving. Su B 1994: 139-140. In recent decades, archaeology has continuously prospered, becoming one of the most rapidly developing fields in social science in China.

Liangzhu Culture Bin Liu, Ling Qin, 2019-11-07 The Liangzhu Culture 3300-2300 BC represented the peak of prehistoric cultural and social development in the Yangtze Delta. With a wide sphere of influence centred near present-day Hangzhou City, Liangzhu City is considered one of the earliest urban centres in prehistoric China. Although it remains a mystery for many in the West, Liangzhu is well known in China for its fine jade-crafting industry, its enormous well-structured earthen palatial compound, and recently discovered hydraulic system, and its far-flung impact on contemporary and succeeding cultures. The archaeological ruins of Liangzhu City were added to the UNESCO World Cultural Heritage List in July 2019. *Liangzhu Culture* contextualises Liangzhu in broad socio-economic and cultural backgrounds and provides new first-hand data to help explain the development and structure of this early urban

centre Among its many insights the volume reveals how elites used jade as a means of acquiring social power and how Liangzhu and its centre stand in comparison to other prehistoric urban centres in the world This book the first of its kind published in the English language will be a useful guide to students at all levels interested in the material culture and social structures of prehistoric China and beyond

Late Quaternary Climate Change and Human Adaptation in Arid China D.B. Madsen, F. Chen, X. Gao, 2011-09-22 Due to political pressures prior to the 1990s little was known about the nature of human foraging adaptations in the deserts grasslands and mountains of north western China during the last glacial period Even less was known about the transition to agriculture that followed Now open to foreign visitation there is now an increasing understanding of the foraging strategies which led both to the development of millet agriculture and to the utilization of the extreme environments of the Tibetan Plateau This text explores the transition from the foraging societies of the Late Paleolithic to the emergence of settled farming societies and the emergent pastoralism of the middle Neolithic striving to help answer the diverse and numerous questions of this critical transitional period Examines the transition from foraging societies of the Late Paleolithic to the emergence of settled farming societies and the emergent pastoralism of the middle Neolithic Explores explanatory models for the links between climate change and cultural change that may have influenced the development of millet agriculture Reviews the relationship between climate change and population expansions and contradictions during the late Quaternary
