International Business Ethics Stephan Rothlin, Dennis McCann, 2015-07-29 This book addresses an essential need felt by many who seek to promote best business practices in China and East Asia namely the need for culturally appropriate instructional materials basic information case studies and ethical perspectives that will allow managers and entrepreneurs to understand and embrace the challenge of moral leadership in business In an era characterized by globalization and the increasing importance of the economies of China India Japan and SE Asia international business ethics must reflect the concerns of the people living and working in this area the moral and spiritual traditions that have nurtured them and their specific contributions to sustainable development This book presents twenty important case studies taken from newsworthy events of the past few years in which Asians and others have attempted to respond to this challenge Each case study has been selected and shaped in order to highlight various aspects of doing business in Asia starting with basic principles and moving on to the specific responsibilities that businesses have towards their various stakeholders The authors contend that

the best way to appreciate the relevance of Asian moral and spiritual traditions is to determine their specific contribution to virtue ethics where the ancient traditions of both East and West converge in their focus on the qualities of moral leadership that form the basis of best business practice Exploring the case studies will enable readers to appreciate the continued relevance of these ethical perspectives in Asian business Best business practice clearly involves learning to do business and playing the game according to the rules but the necessity of playing by the rules is not likely to become clear until one takes up the path that leads to a virtuous life in business developing a moral character chiefly based on integrity Business Ethics and Leadership from an Eastern European, Transdisciplinary Context Sebastian Vaduva, Ioan S. Fotea, Andrew R. Thomas, 2016-11-25 This book aims to provide insight into the fields of business and leadership by examining the role of ethics in these areas The papers in this book derive from the 2014 Annual Griffiths School of Management International Conference organized by Emanuel University of Oradea Romania where academics and practitioners interacted and discussed current insights and research in the different dimensions of business ethics and leadership This resulting book offers empirical and theological research on ethics business and leadership from a transdisciplinary and knowledge based context Since the financial crisis in 2008 the debate on business ethics and leadership has dominated the public sphere at all levels of interest from grassroots to the elites in educational institutions governments businesses and NGOs Naturally constructive and transdisciplinary discussions need to take place with due consideration for the specific context of each situation so that propositions upon which to build the future can be formulated These discussions unfold in an ever more intricate world of business powered by ever more pervasive and intelligent technology and scientific development all brought together by globalization In this world organizations are faced with new and more complex ethical issues in their pursuit to serve clients gain profits motivate employees collaborate with partners and act responsibly towards society and the environment A wise approach to changing the future is to understand the mistakes of the past because one must always learn how to overcome past mistakes in order to develop a better future But a necessary approach to building a better future is looking at the world through a transdisciplinary mindset This allows us to see the world as a complex whole it fosters creative interaction between fields of knowledge it opens doors for knowledge and innovation flows across disciplines and it allows the tackling of complex problems and situations Given the current context of our world this is an approach that we ought to pursue Featuring contributions from academics researchers scholars and practitioners from across the globe this book will be of great interest for students and practitioners in the fields of business leadership and ethics International Management Behavior Henry W.
